Mangroves 2017

Session 1 - SFM

14:00-17:00, 18 April

Session 1: Promoting the sustainable management of mangrove ecosystems

Session 1: Key Questions for Facilitated Discussions

- 1. Can mangroves can be managed sustainably for timber production and simultaneously supply environmental services and maintain the livelihoods of local communities?***
- 2. Please share examples of where mangroves are being sustainably managed for timber production or other purposes.***
- 3. What are the key barriers to the sustainable management of mangroves in your location, and what policies and actions are required to ensure mangrove sustainability?***
