Subject: ITTO 25 years young

Dear Gerhard,

Usually I addressed to you and colleagues noteworthy info and facts on wood-based **bio-energy** issues. Among such info recently the Bavarian experience of a joint venture: sustainable use of forests together with wind-energy harvested on top of them.

Dr. Hwan [Ma] and Dr. Tetra [Yanuariadi] will remember the slogan from Hannover 2007 Conference and the subsequent regional fora : "energy grows on trees".
Now we may expand the slogan: Energy grows **on and above trees**.

The wisdom derived from this - **on the occasion of ITTO´s 25 th.**- appears to be: Foresters at ITTO´s various levels and beyond can achieve more by not only solving their inherited problems (a full list since 25 years...) but also exploring and using variety of given and future bio-energy opportunities. **With this in mind I wish ITTO full success for the next 25 years!!**

Gerhard, please accept my best regards and extend them to many colleagues,

not forgetting:

The ED;

other ITTO-"old-growth" like Ishikawa-san (we already met during UNCTAD preparatory meetings at Geneva prior to the agreement more than 35 years ago)

and the promising, flowering younger staff members, you name them -.

Peter
