# Project 433/06 R3 (I) "Sustainable Model for the Brazilian Wood Flooring Production Chain"

#### LIST OF STANDARDS

This document reports the fulfillment of the objectives related to OUTPUT 03 (Quality Certification Program for Wood Flooring) and activities 3.2 / 3.5 related to the development of Brazilian official technical standards for lumber and wood flooring.

Below are described the standards already published and which are available to interested parties. In this case the standards themselves are the indicators of attendance of the objective and the assumption defined in the project.

Along with the standards are indicated the ABNT links where the standards may be acquired. The internet pages of ABNT are also annexed to this document.

### **CONIFEROUS SAWN TIMBER (SOFTWOOD)**

### 1) ABNT NBR ISO 737:2011 - Coniferous sawn timber - Sizes - Methods of measurement

<u>Scope and field of application</u>: This Standard defines methods of measurement of thickness, width, length and volume of coniferous sawn timber. It covers unplaned square-edged and unedged coniferous sawn timber. Terms and definitions are given in ABNT NBR ISO 1032.

Available in: <a href="http://www.abntcatalogo.com.br/norma.aspx?ID=87867">http://www.abntcatalogo.com.br/norma.aspx?ID=87867</a>

# 2) ABNT NBR ISO 738:2011 - Coniferous sawn timber - Sizes - Permissible deviations and shrinkage

Scope and field of application: This Standard specifies permissible deviations, due to inaccuracies in sawing, from nominal thicknesses, widths and lengths, for coniferous sawn timber. It also gives, for information, average values for shrinkage for some wood species. It is applicable to unplanned square-edged and unedged coniferous sawn timber having thicknesses or widths in the range 10 mm (0.393 7 in) to 310 mm (12.204 7 in).

Available in: <a href="http://www.abntcatalogo.com.br/norma.aspx?ID=87866">http://www.abntcatalogo.com.br/norma.aspx?ID=87866</a>

### 3) ABNT NBR ISO 3179:2011 - Coniferous sawn timber - Nominal dimensions

<u>Scope</u>: This Standard specifies the nominal dimensions of coniferous sawn timber. It applies to unplaned square-edged and unedged sawn timber 16 mm to 300 mm thick, of following widths:

- From 75 mm to 300 mm: for square-edged timber with parallel edges;
- 60 mm and over: for unedged and square-edged timber with tapered edges.

Available in: http://www.abntcatalogo.com.br/norma.aspx?ID=86435

# 4) ABNT NBR ISO 1030:2010 - Coniferous sawn timber - Defects - Measurement

<u>Scope</u>: This Standard specifies international methods for measurement of defects of coniferous sawn timber, classified in ISO 1029, Coniferous sawn timber - Defects - Classification. This Standard covers unplanned sawn timber surfaced to size or planed but without profiling.

Available in: http://www.abntcatalogo.com.br/norma.aspx?ID=79659

## 5) ABNT NBR ISO 1032:2010 - Coniferous sawn timber - Sizes - Terms and definitions

<u>Scope:</u> This standard establishes the first series of terms and definitions for a correct and adequate understanding of the terms relating to square-edged and unedged <sup>1)</sup>, sawn timber, its geometrical elements and sizes.

Available in: http://www.abntcatalogo.com.br/norma.aspx?ID=79542

#### **BROADLEAVED SAWN TIMBER (HARDWOOD)**

1) ABNT NBR ISO 8903:2011 - Broadleaved sawn timber - Nominal sizes Scope: This Standard specifies nominal sizes of unplanned, square-edged and unedged, broadleaved saw timber.

Available in: <a href="http://www.abntcatalogo.com.br/norma.aspx?ID=87865">http://www.abntcatalogo.com.br/norma.aspx?ID=87865</a>

# 2) ABNT NBR ISO 2301:2011 - Sawn timber of broadleaved species - Defects - Measurement

<u>Scope</u>: This Standard specifies international methods of measuring defects of sawn timber of broadleaved species, classified in ISO 2299, Sawn timber of broadleaved species – Defects - Classification. This Standard covers unplanned sawn timber and sawn timber surfaced to size of planed but without profiling.

Available in: http://www.abntcatalogo.com.br/norma.aspx?ID=86460

### 3) ABNT NBR ISO 2299:2011 - Sawn timber of broadleaved species - Defects - Classification

<u>Scope</u>: This Standard specifies the international classification of defects of sawn timber of broadleaved species growing in the temperature zone of the globe. This Standards cover unplanned sawn timber, and sawn timber surfaced to size of planed but without profiling.

Available in: http://www.abntcatalogo.com.br/norma.aspx?ID=79589

### 4) ABNT NBR ISO 4470:2011 - Sawn timber - Determination of the average moisture content of a lot

<u>Scope</u>: This Standard specifies two methods for the determination of the average moisture content of a homogeneous lot of sawn timber of the same cross-section.

The method using an electrical moisture meter is applicable to timber having moisture contents from 7% to 28% (m/m), and does not require cutting of the test pieces. The method cannot be used for determining the moisture content of frozen sawn timber.

If measuring the moisture content of sawn timber having a wet surface, due to water or to a surface protection treatment, the electrical moisture meter should be used with electrode needles that are covered, except for their tips, with an insulated coating.

The method by drying requires cutting of the pieces. It is applicable irrespective of the moisture content, and is the only method applicable in cases of dispute.

Available in: http://www.abntcatalogo.com.br/norma.aspx?ID=86436

### **WOOD FLOORING**

#### 1) ABNT NBR 15798:2010 - Wood flooring - Terminology

<u>Scope</u>: This Standard defines the relative terms for solid wood flooring.

Available in: http://www.abntcatalogo.com.br/norma.aspx?ID=57713

# 2) ABNT NBR 15799:2010 - Wood flooring prefinished and unfinished - Standardization and quality grades

<u>Scope</u>: This Standard establishes the quality grades and levels tolerance of defects that shall be analyzed for determination of the standard of quality for solid wood flooring type plank and strip.

### Annex A - Statement of the standards in ABNT's website

ABNT NBR ISO 737:2011 - Coniferous sawn timber - Sizes - Methods of measurement

ABNT NBR ISO 738:2011 - Coniferous sawn timber - Sizes – Permissible deviations and shrinkage

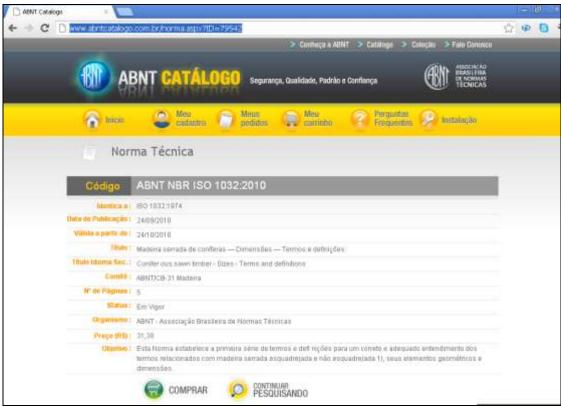

ABNT NBR ISO 3179:2011 - Coniferous sawn timber - Nominal dimensions

ABNT NBR ISO 1030:2010 - Coniferous sawn timber - Defects - Measurement

ABNT NBR ISO 1032:2010 - Coniferous sawn timber - Sizes - Terms and definitions

ABNT NBR ISO 8903;2011 - Broadleaved sawn timber - Nominal sizes

ABNT NBR ISO 2301:2011 - Sawn timber of broadleaved species - Defects - Measurement

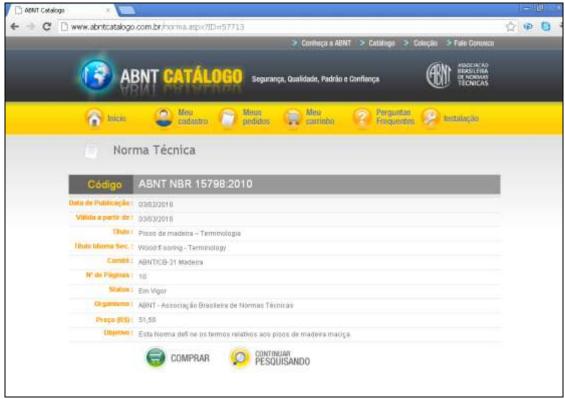

ABNT NBR ISO 2299:2011 - Sawn timber of broadleaved species - Defects - Classification

ABNT NBR ISO 4470:2011 - Sawn timber - Determination of the average moisture content of a lot

ABNT NBR 15798:2010 - Wood flooring - Terminology

ABNT NBR 15799:2010 - Wood flooring prefinished and unfinished - Standardization and quality grades
