### **INFORMATION SHARING**

The following format has been agreed by the Council to assist Members in the preparation of information as required under Articles 27 and 28 and for informing the Council of progress towards meeting the Year 2000 Target.

In agreeing to this format, Council sought to rationalise the various statistical and other returns which are requested by the Organization into one which would be completed annually. However, Members would continue to be encouraged to provide updated data to the Organization as soon as possible.

The Council would expect Members to provide information only on those aspects relevant to their own specific circumstances and which are within the scope of the Agreement. At the same time Council recognised the benefits to be gained from information sharing for individual Members, in promoting the activities of the Organization and objectives of the ITTA and encouraged Members to provide as comprehensive information as possible.

Council recognises that the availability of data is presently limited for some Members and that this will affect their ability to prepare this information.
