ITTO PUBLICATIONS LIST

I BRIEF INFORMATION ON ITTO PUBLICATIONS

ITTO publications are classified into eleven categories: 1) General Information (GI), 2) Technical Series (TS), 3) Policy Development Series (PS), 4) Pre-Project Reports (PPR), 5) Pre-Project Publications (PPD), 6) Project Reports and Publications (PD), 7) Report of Seminars, Workshops and other Meetings (SRS), 8) ITTO Information Papers (IP), 9) Mission Reports (MR), 10) Other Publications (OP), and 11) Serial Publications

Publications under the General Information category (GI) are about the Organization in general, its objectives, rules and procedures, and records of its activities. Annual reports, Session reports and Annual Reviews are also included in this category.

The Technical Series (TS) reports the results of technical research, studies and activities which were conducted ITTO.

The ITTO Policy Development Series (PS) category has been created to house the various guidelines on sustainable management promoted by the Organization. It is hoped that member countries will take these guidelines into account when forming their national forest policies.

ITTO finances Pre-projects and Projects through support from various ITTO member countries and other donors. On completion of each Pre-project or Project, implementing agencies submit to ITTO Completion Reports containing results and/or knowledge gained from such Pre-Projects or Projects. These are then published by ITTO as Pre-Project Reports (PPR) or Project Reports (PD). Publications issued in course of ITTO Pre-Projects or Projects taking forms other than reports are under the category of Pre-Project Publication (PPD) or Project Publication (PD).

Reports of Seminars, Workshops and other Meetings (SRS), is a self-explanatory category. As this heading suggests, material under this category are reports and proceedings from workshops, seminars and meetings which not only promote ITTO's mandate but serve as fora for consultation among member governments to discuss key issues towards the achievement of ITTO's goals and objectives.

ITTO Information Papers (IP) include studies undertaken for ITTO by research organizations or other intergovernmental agencies which are primarily concerned with scientific data that are relevant to ITTO supported projects and activities.

Mission Reports (MR) include results and reports of missions undertaken by consultants or fact-finding teams for the purpose of assisting member countries in assessing the status of their forest management and ways to attain it.

Publications that do not fall under any of the afore-mentioned categories are classified under Other Publications (OP). OP includes Audio-visual materials, computer databases, training manuals and subjects ranging from sustainable forest management to timber trade.

ITTO is supporting three regular publications, the Market Information Service (MIS), the Tropical Forest News (TFN), and the Tropical Forest Update (TFU). The MIS is a bi-weekly newsletter in English that reports on the tropical timber market. TNF is an electronic newsletter in English that provides insights into ITTO's latest initiatives and work and published every two months, while the TFU is a quarterly publication that promotes conservation and sustainable management of tropical forests as well as providing information on trade and industry. The TFU is published in English, French and Spanish.
