1. INVESTMENT POLICY

1.1 BACKGROUND

The authority to invest funds is provided pursuant to Articles 7 and 18 of the International Tropical Timber Agreement 2006 (ITTA 2006), under the ITTO Financial Rules and Rules Related to Projects and by decisions of Council.

1.2 INTENT

The intent of this document is to establish ITTO's investment policy and guidelines regarding the investment of funds.

The activities of the investment officers or fund managers responsible for stewardship of ITTO's funds will be measured against the standards and objectives in this Policy.

Activities that defy the spirit and intent of the Policy will be deemed contrary to the Policy.

1.3 SCOPE

For the purpose of this Policy, investments are defined as arrangements that are undertaken or acquired with the expectation of achieving a financial return through interest, profit or capital growth. This Policy applies to the investment of funds held by ITTO and undertaken in accordance with the ITTO Financial Rules.

Investments are to be made in a capital guaranteed cash fund or an approved cash management product.

2. POLICY STATEMENT

2.1 AUTHORITY

All investments are to be made in accordance with this policy.

2.2 ETHICS AND CONFLICTS OF INTEREST

2.2.1 Prudent person standard

The standard of prudence is to be used by ITTO investment officers when managing the overall portfolio. Investments will be managed with the care, diligence and skill that a prudent person would exercise in managing the affairs of other persons. This includes having in place appropriate reporting requirements that ensure the investments are being reviewed and overseen regularly.

ITTO Investment officers are to manage the investment portfolios not for speculation, but for investment in accordance with the intent of this Policy. They are to avoid any transaction that might harm confidence in or the reputation of ITTO. They must consider the safety of capital and income objectives when making an investment decision.

2.2.2 Ethics and conflicts of interest

ITTO Investment officers shall refrain from personal activities that would conflict with the proper execution and management of ITTO's investment portfolio. This includes activities that would impair the investment officer's ability to make impartial decisions.

Employees responsible for making investment decisions are required to disclose to the Executive Director any conflict of interest or any investment positions that could be related to ITTO's investment portfolio.

Actions inconsistent with this policy are a violation of ITTO Financial Rules or ITTO Staff Regulations and Rules. As described in ITTO's Whistleblower policy, it is the duty of staff members to report any breach of ITTO Regulations and Rules.

2.2.3 Delegation of authority

The Executive Director is responsible for overseeing implementation of the Investment Policy. Authority for the day-to-day management of the Council's investment portfolio may be delegated by the Executive Director to the Assistant Director for Operations (or other senior officials of the organization).

2.3 INVESTMENT OBJECTIVES

In priority order, the investment objectives shall be preservation of capital, liquidity, and return on investment.

2.3.1 Preservation of capital

Preservation of capital shall be the principal objective of the investment portfolio. Investments are to be managed in a manner that seeks to ensure security of principal of the overall portfolio. This includes managing credit and interest rate risk within given risk management parameters and avoiding any transactions that would prejudice confidence in ITTO or its associated entities or affiliates.

Credit Risk

ITTO will evaluate and assess credit risk prior to making any form of investment. Credit risk is the risk of loss due to the failure of an investment issuer or guarantor. The investment officer will minimize credit risk in the investment portfolio by pre-qualifying all transactions including the brokers/securities dealers with which they do business, diversify the portfolio and limit transactions to secure investments.

Interest Rate Risk

The investment officers shall seek to minimize the risk of a change in the market value of the portfolio because of a change in interest rates. This would be achieved by considering the cash flow requirements of ITTO and structuring the portfolio accordingly. This will avoid having to sell securities prior to maturity in the open market thus reducing optimal return. Secondly, interest rate risk can be limited by investing in shorter term securities.

2.3.2 Maintenance of liquidity

Pursuant to ITTO Financial Rules, ITTO maintains accounts with banks for its day-to-day operating transactions.

In addition to the balances held in its operational bank accounts for routine operating requirements, the investment portfolio will maintain sufficient liquidity to meet all reasonably anticipated operating cash flow requirements of ITTO, as and when they fall due, without incurring significant transaction costs occasioned by prompt sale of an investment.

For these purposes, *illiquid investments* are defined as investments that are not publicly traded in sufficient volume to facilitate, under most market conditions, prompt sale without severe market price effect.

Examples of *illiquid investments* include:

- investment in private placements;
- a security that is not supported or priced by at least two approved brokers/securities dealers;
- sub investment grade (i.e. a lower than rating BBB- (Standard and Poor's) or equivalent), and in most cases, BBB rated investments; and
- unrated securities.

2.3.3 Return on investments

The ITTO investment portfolio is expected to achieve a market average rate of return taking into account ITTO's risk tolerance and current interest rates, budget considerations, and the economic cycle. Any additional return target may be set by the Council will also consider the risk limitations, prudent investment principles and cash flow characteristics identified within the Policy.

2.3.4 Comparison of performance

In making investments, the Executive Director should ensure ITTO achieves value-for-money or a competitive price after considering the costs of the investment.

In comparing performance, the portfolio will be market valued and take into account all coupons, deposits and withdrawals to/from the portfolio.

2.4 PORTFOLIO ESTABLISHMENT AND OVERSIGHT

2.4.1 Authorized personnel

The Executive Director is authorized to invest ITTO's funds in investments consistent with this Policy. As provided for in section 2.2.3, the Executive Director may delegate this authority.

The Executive Director will provide quarterly reports on investments to the Council through the Committee on Finance and Administration (CFA) and its Investment Oversight Panel.

2.4.2 Investment Oversight Panel

To ensure effective oversight, an Investment Oversight Panel (IOP) is established. The IOP shall include the Executive Director, and two (2) experts, to the extent possible, one from each ITTO Member Group, to be designated by the Council Chair and Vice-chair. The Investment Oversight Panel shall function as an advisory Panel to the CFA and Council.

Its purpose is to:

- oversee the development and update of this Policy and its guidelines;
- make recommendations to the Council regarding modifications to this Policy;
- monitor compliance with ITTO Financial Rules and related Council Decisions) and;
- review ITTO's periodic investment reports to the CFA and Council.

An officer independent to the execution of investment transactions will provide compliance and investment analysis to the Investment Oversight Panel (Assistant Director, Operations).

The Investment Oversight Panel is proscribed from direct investment decisions, selecting fund managers, or becoming involved in the routine operations of the portfolio.

The role of the IOP is to review and ensure that procedures and processes are at all times adequate and to refer investment decisions to the CFA and Council, if required.

2.4.3 Internal controls

The Executive Director of ITTO shall establish internal controls and processes that will ensure investment objectives are met and that the investment portfolios are protected from loss, theft or inappropriate use. To this end, the Executive Director shall establish an executive management group or review group.

The Investment Oversight Panel is responsible for reviewing the approved lists and investment guidelines, which are updated regularly and recorded at *Appendix 1*. The guidelines set by the Panel may, if required, be more conservative than the Policy. However, in no instance will they override this Policy or its objectives.

The established processes will include appropriate reporting (including compliance reporting), as well as an annual review of the Policy. The internal controls will address the following:

- control of collusion;
- measures to avoid conflict of interest;
- separate the transaction authority from accounting and record keeping;
- safekeeping;

- avoid physical delivery of securities;
- clearly delegate authority to ITTO investment officers;
- confirmation requirements for settlement of securities;
- compliance and oversight of investment parameters; and
- reporting of breaches.

The Investment Oversight Panel shall conduct an annual review of the activities of the portfolio to verify compliance with this Policy.

2.5 INVESTMENT PARAMETERS

2.5.1 Investible funds

For the purposes of this Policy, investible funds are the investment moneys available for investment at any one time and include the ITTO's bank account balance. Included in this balance are any moneys held by the ITTO on behalf of external parties. However, this Policy does not apply to moneys held in trust for third parties where those funds are subject to specific conditions.

The investible funds should match the cash flow needs of ITTO deemed by the Executive Director after preparing ITTO's budget. Once the Executive Director has determined that the cash flow requirements can be met, funds may be invested for the required term. In this regard, it is appropriate for the Executive Director to be conservative (i.e. where possible, investments should not be broken to meet cash flow obligations).

It is the responsibility of the Executive Director to assess the cost of direct investment management by ITTO relative to the return generated. This should be compared with the cost of investing funds with a reliable capital guaranteed cash fund.

Any such investment decisions are to be undertaken with the concurrence of the IOP.

2.5.2 Authorized investments

Investment may include:

- interest bearing deposits
- commercial paper
- bank accepted/endorsed bank bills
- bank negotiable certificates of deposit
- short term bonds
- long term bonds
- floating rate notes

2.5.3 Prohibited investments

This Policy prohibits any investment carried out for speculative purposes. The Investment Oversight Panel may include a prohibited investments list within the investment guidelines and approved lists (established pursuant to section 2.4.3 of this Policy).

The following investments are prohibited by this investment policy:

- derivative based instruments (excluding floating rate notes);
- securitized debt instruments;
- structured products;
- principal only investments or securities that provide potentially nil or negative cash flow;
- standalone securities issued that have underlying futures, options, forward contracts and swaps of any kind;

2.5.4 Portfolio investment parameters and credit requirements

The following table shows the credit ratings and counterparty limits for ITTO:

<i>Short Term Rating (Standard & Poor's) or equivalent</i>	<i>Individual Counterparty Limit</i>	<i>Total Limit</i>
A1+	30%	100%
A1	15%	30%
A2 (Financial Institutions only)	10%	20%
A3 (Financial Institutions only)	5%	0%
Unrated	Nil	Nil

It is noted that for the purposes of this investment portfolio, the percentage limits apply effective from the date of purchase as a percentage of the market value of the portfolio.

Appendix 2 provides a comprehensive definition of rating definitions for Standard & Poor's, Moody's & Fitch.

2.5.5 Maturity

The maturity structure of the portfolio will reflect a maximum term to maturity of one year, except as approved by Council, and includes an interest rate reset of no longer than six months (185 days).

2.5.6 Liquidity requirement

Given the nature of the funds invested, no more than 10 per cent of the investment portfolio will be held in illiquid securities and at least 10 per cent of the portfolio can be called at no cost or will mature within 0-7 days.

2.5.7 Approved lists

The Investment Oversight Panel shall prepare and maintain the following approved counterparty lists for the investment of funds:

- approved banks;
- approved commercial paper and medium term note issuers;
- approved brokers/dealer and direct issuers for purchase or sale of security with a minimum Standard and Poor's long-term credit rating of A+ (or equivalent); New investment products as they emerge;

A new investment product requires a full risk assessment by management and requires approval by the ITTC.

2.5.8 Breaches

Any breach of this Investment Policy is to be reported to all members of the Investment Oversight Panel and rectified by the Secretariat within 24 hours of the breach occurring. The Investment Oversight Panel will report any such breach to the Council Chair.

The Assistant Director for Operations will investigate the nature and import of the breach and will, if the breach is serious and amounts to an alleged breach under ITTO Staff Regulations and Rules, seek to initiate disciplinary procedures against the staff member responsible for the transaction, in a transparent and equitable manner pursuant to those rules.

Where ITTO holds an investment that is downgraded below the minimum acceptable rating level, as prescribed under regulation for the investment arrangement, ITTO shall within 28 days after the change becomes known, either obtain Executive Director's approval for continuing with the investment arrangement or sell the investment arrangement (including, for example, withdrawing a deposit).

2.5.9 Safekeeping and custody

Each investment transaction will require written confirmation by the broker/dealer/bank. ITTO will hold security documents, or alternatively a third party custodian authorized by the Executive Director and evidenced by safekeeping receipts may hold security documents.

These security documents must be held in a secure manner and must at all times be available for inspection by all authorized parties including the independent external auditor.

2.5.10 Criteria for selection of authorized dealers and brokers

ITTO will maintain a list of authorized financial institutions and securities brokers that the ITTO investment officers may deal with. These financial intermediaries must have a minimum long term rating of at least either A+/A1/A+ from Standard and Poor's, Moody's or Fitch.

All transactions undertaken on behalf of the investment portfolio of ITTO will be executed either by ITTO directly, or through securities brokers registered as Japanese Financial Service Licensees (Japanese Financial Services Agency) with an established sales presence in Japan, or direct issuers that directly issue their own securities which are registered on ITTO's approved list of brokers/dealers and direct issuers.

The Investment Oversight Panel will implement a process to investigate and endorse new brokers, including a requirement for references/testimonials which will assist with the broker selection and then seek Council approval for these processes.

A comprehensive selection criterion for financial advisers and brokers will be implemented including:

- assessment, evaluation and selection using an independent and transparent competitive Bid and Tender Policy;
- credit ratings of the firm;
- market capitalization of their business entity to determine credit worthiness and business sustainability;
- capability to execute transactions verified by testimonials from reputable business clients;
- As a guide, a minimum credit rating of A+ (Standard & Poor's) should be expected of broker counterparties along with provision of annual audited financial statements and securities dealer certification;
- Brokers must be further required to certify that they have read the requirements of ITTA 2006, ITTO Financial Rules and this ITTO Investment Policy;
- ITTO will at all cost refrain from selecting and engaging brokers or financial advisers who are paid through inappropriate commission arrangements.

2.6 INVESTMENT GUIDELINES

Pursuant to section 2.4.3 of this Policy, the Investment Oversight Panel may reduce the maturity limits in this Policy to a shorter period, or prescribe higher ratings through their own internal investment guidelines and approved lists.

Council approval is required for investments with a period of greater than 12 months.

3. REPORTING AND PERFORMANCE MEASUREMENT

3.1 REPORTING

The Assistant Director for Operations will prepare a quarterly report and evaluation of the transactions, investment concentrations, performance and compliance of the investment portfolio. The report is to be provided to the Investment Oversight Panel within 10 days of the period end. The report will include:

- list of securities held at the end of the reporting period by maturity date/call date;
- weighted average yield to maturity of the portfolio;
- percentage of the portfolio held by investment type; and
- performance of the portfolio (relative to appropriate benchmarks and by review of monthly statements, press releases and related media articles).

On a quarterly basis, the Executive Director will provide the Investment Oversight Panel and the Council with a detailed report on the investment portfolio, including a statement of compliance with this Policy and ITTO Financial Rules. The report is to list securities by issue name, maturity date, par and monetary amount invested.

On an annual basis, the Investment Policy will be reviewed and amended where required. Any amendments are to be reviewed by the Investment Oversight Panel and CFA and approved by the Council prior to implementation.

3.2 PERFORMANCE MEASUREMENT

The investment return for the portfolio shall be measured using the market value of the portfolio, including withdrawals and deposits, and total performance of the portfolio compared to the independent expert and independent indices issued by the Bank of Japan.

The review will also monitor the performance of investments advisers during the reporting period.

This is to include changes in the capital value of assets held (where applicable), income from managed investment portfolio assets, proceeds of sales of assets sold and cost of assets acquired.

The market value of the portfolio is to be calculated quarterly.

In defining market value, at least two pricing sources should be included in the valuation of the securities.

1. Review the minutes of the last CFA meeting and any decisions taken by that committee having audit consequences which should be recorded in the Audit Planning Report.
2. In addition, the FASO will consider the following issues which will impact on the audit function and process:
 - Previous audit findings, recommendations and Management Letters issued by External Audit;
 - Changes to significant accounting policies;
 - Significant changes to the business structure and operations;
 - Matters which have a material impact on the presentation of the financial statements and may require special audit review and investigation i.e. asset impairment, asset revaluations, fraudulent practices, going concern verification etc.
3. Once this process has been completed, the FASO will meet with the Assistant Director Division of Operations, the Executive Director and the Assistant Directors of all business units of ITTO to discuss the emerging Audit Plan seeking feedback and confirmation from all members of the Executive Management Team about all material items that impact on the audit cycle.
4. These matters will be incorporated in the Audit Plan which will determine the audit methodology required which may only necessitate routine audit of the Financial Statements and the Books and Records or give rise to a range of additional auditing and investigative services.
5. Once the Audit Plan has been completed specifying the scope and methodology that are anticipated for the forthcoming audit, the draft Audit Plan will be presented to the Chair of the CFA for review and clearance before discussions are held with the appointed external auditor. This process is the precursor to the negotiation with the appointed external auditor on the audit scope and methodology which will be adopted in the annual Audit Engagement Letter. These matters are also covered in the ITTO Auditing Standard (Annex 4) paragraphs 3.1 and 4.5.

1.2 AGREEMENT ON AUDIT SCOPE AND ENGAGEMENT LETTER

1. Once pre-planning has been completed the FASO and the Assistant Director Division of Operation will meet with the External Auditor to consider the forthcoming engagement and will then negotiate the Scope of the Audit in compliance with the ITTO Auditing Standard (Annex 4) and where necessary negotiate additional audit services required to cover all aspects of ITTO operations for the year.
2. Upon request of the external auditor, management shall authorize the predecessor auditor to respond fully to the auditor's inquiries regarding matters that will assist the auditor in determining whether to accept the engagement.
3. Once all terms and scope of the audit have been agreed, the External Auditor will issue the draft Engagement Letter which the FASO and Assistant Director Division of Operations will review and endorse. Once this process has been completed, the Executive Director will sign the Engagement Letter confirming the scope and nature of agreed audit services pursuant to paragraph 4.5 of the ITTO Auditing Standard.

ensure that all audit observations raised during the audit process are cleared to the satisfaction of the external auditor with a view to avoiding any qualifications in the audit opinion.

3. If, prior to completing the audit engagement, the auditor is requested to change the audit engagement by management, the external auditor shall communicate the circumstances of the request to Council.

3. The Operations Division will be responsible for disseminating the audited financial statements, auditors' report, auditors' management letter and management responses thereto in electronic form (or written form upon request), to CFA and then to Council pursuant to the ITTO Auditing Standard (Annex 4) paragraphs 4.7- 4.9.
4. Once Council approves the audited financial statements, the Executive Director shall post the full external audit report on ITTO's publicly accessible website.
5. These processes will provide a comprehensive control framework which will lead to clarity and a clear understanding of all aspects of the audit process and the impacts and exposures that it has on the Organization which will allow CFA and the Council to make informed decisions about the finances and governance of ITTO.

1. DELEGATIONS AT ITTO

Assignment of delegations can be transferred if an officer is acting in a higher position or in a similar capacity.

The Executive Director of ITTO may assign his/her delegations to a nominated officer during his/her absence. The acting officer will then have the same delegations as the Executive Director as those prescribed in this manual. This interpretation is applicable to other positions that have delegations attached to them.

1.6 SEGREGATION OF DUTIES

ITTO should attempt to establish and maintain an effective internal control framework at all times in which officers will not be granted both the approval authority and the payment authority. Furthermore, it is essential that the staff members who are involved in procurement activity do not have the approval and payment authority.

1.7 RESPONSIBILITY

The Executive Director shall ensure that there is a written instrument of financial delegations in place, which is kept up-to-date at all times.

Furthermore, it is the responsibility of all the senior staff at ITTO who have delegated authority to ensure that personnel under their control comply with the approved financial delegations.

1. PURPOSE AND USE OF THE PROCEDURES

1. Recognizing that the International Tropical Timber Organization (ITTO) needs to procure goods and services to support its activities at its Headquarters (HQ) and Regional Offices, this Manual provides guidance on procurement policies, procedures and practices to all staff members involved in the procurement and acquisition processes and activities in all such offices and locations.
2. This Manual is a compendium of regulations approved by the Council and the related rules and guidelines published for use by management and staff in performing the procurement function.
3. This Manual provides the legal framework to undertake procurement activities in full compliance with other relevant rules, policies, decisions and practice of the Organization.
4. Staff should rely on the Manual to guide their actions and to carry out their official duties.
5. Equally, these procedures in this Manual are designed to ensure that those seeking to do business with ITTO can be confident that their proposals are considered and assessed in a fair, objective and transparent manner.

2. ORGANIZATIONAL RESPONSIBILITIES

1. Procurement is the responsibility of the Division of Operations which employs staff who are responsible for the procurement function; this unit is headed by the Assistant Director of Operations.

All procurement is carried out under the provisions of International Tropical Timber Agreement 2006 and the ITTO Financial Rules and Rules Relating to Projects (Financial Rules).

The Financial Rules as approved by the Council regulate the Organization's procurement activities and the procurement of goods and/or services by the ITTO shall be undertaken at all times in compliance with these rules, regulations and policies.

2. This Procurement Manual reflects the principle of segregation of responsibilities between requisitioning and procurement entities by specifying their separate and distinct functions within the overall procurement process. At the same time, cooperation between the requisitioning and procurement functions is essential to ensure that, the basic principles expressed under Financial Rules are achieved namely:
 - a. ITTO obtains high quality goods, services and works that meet the applicable specifications;
 - b. Achieves competitive prices and within the time frame required;
 - c. That the procurement process is both equitable and transparent.

3. BEST VALUE FOR MONEY PRINCIPLE

1. The Best Value for Money Principle is an underlying principle which permeates the Financial Rules approved by Council and shall be given due consideration when exercising the procurement functions of ITTO.
2. When procuring goods or services or works all staff involved in procurement activities must ensure that the optimal outcome has been achieved by considering all factors, such as relevant costs and benefits, risks and resources, etc., over the entirety of the product or service life-cycle.
3. Best Value for Money is defined as the "Optimization of whole-of -life costs and quality needed to meet the user's requirements, while taking into consideration potential risk factors and resources available". Its goal is to achieve maximum benefit for the Organization in order to execute the programmes, activities and projects approved by the Council.

4. Accordingly, price alone is not necessarily determinative of Best Value for Money. Procurement under the Best Value for Money principle shall be conducted taking the following factors:
 - a. Cost-related factors: The entirety of the cost components that comprise the Total Cost of Ownership (TCO) of the acquired goods, services or works, whether direct or indirect, fixed or variable (e.g., price, ancillary support, such as maintenance, upgrade and storage, supplies and additional operating costs, disposal costs, volume discounts, internal processing costs to support the transaction, etc.;
 - b. Non-cost-related factors: Factors or attributes that are related to the Organization's needs and requirements (e.g., technical merits of the offered goods, services or works, compliance with Specifications, quality, timelines of delivery, competence, reliability and financial capacity of the Vendor, and compliance with contractual terms and conditions). Such factors should be included in the Specifications, TORs.
 - c. Market environment: Overall market maturity and availability of sources (e.g., Supplier availability, product availability, market maturity, Supplier sustainability). Such factors can be assessed using Market Research and commercial supply agencies.
 - d. Competitive, fair, ethical and transparent sourcing that is conducted consistently and in accordance with best practices and ITTO procurement standards, and within applicable laws.
 - e. Risk factors: Any risk that may jeopardize the successful outcome of a procurement and diminish the value that could have been obtained (e.g., financial viability and capacity of the Vendor, legal exposure and liability, geo-political circumstances, price stability, and dependency). All factors that are relevant to the particular procurement need to be considered, and the relative importance of each factor determined on a case by case basis.
5. As far as possible, all costs and benefits should be identified, compared and weighted against end-user need, evaluation criteria and risk factors. While Best Value for Money should be assessed as objectively as possible, professional judgement will be required, as complex needs rarely have one clearly correct solution.
6. The Best Value for Money principle is applicable throughout the acquisition process. The main stages within the process where it is applicable are:
 - a. Planning, funding and definition of requirements;
 - b. Identification of Vendors;
 - c. Development of Source Selection Plan, including Evaluation Criteria and Weighting

Adopted by the International Tropical Timber Council through Decision 3(LIV)

3	High-level decisions to setup AML/CFT system and strategic objectives	57

1 INTRODUCTION

The maintenance of sustainable forest management is based on a good regulatory framework. Today the global efforts to prevent money laundering and to counter terrorism financing are essential to protect the sustainable management and the integrity of financial system.

International Tropical Timber Organization (ITTO) is committed to the highest standards of anti-money laundering and counter terrorism financing (AML/CFT). ITTO requires its management and staff, and the executive agencies to adhere to these standards to protect ITTO and its reputation from being misused for money laundering and/or terrorism financing or other illegal purposes.

ITTO incorporates in its activity the international standards that are established by the Financial Action Task Force (FATF), which is recognized as the international standard setter for AML/CFT efforts. The objectives of the FATF are to set global standards and promote effective implementation of legal, regulatory and operational measures for preventing money laundering and terrorism financing, and other related threats to the integrity of the international financial system.

ITTO examines its strategies, goals and objectives on an ongoing basis and maintains an effective program for the forest management, which reflects the best AML/CFT practices. ITTO recognizes that increasing the transparency of its projects can also help to reduce illegal timber activities.

2 HIGH-LEVEL AML/CFT DECLARATION AND LINKAGES WITH OTHER DOCUMENTS

AML/CFT standards, developed by FATF, are integrated into the whole financial system as well as into the private sector activities. In June 2015 FATF stressed and raised the understanding of the importance and purpose of FATF standards being integrated with private sector including emerging economies and low income countries.

ITTO AML/CFT program undertakes to supplement a good forest governance clearly understanding the money laundering and terrorism financing risks, and adapting its system to the nature of these risks.

ITTO incorporates AML/CFT policy and program in operational activities bringing risks assessment and mitigation measures in compliance with the FATF Recommendations. AML/CFT is being understood as the prevention of money laundering and terrorism financing or other relevant crimes.

The AML/CFT Program assists ITTO professional staff, the executive agencies and partners to prevent money laundering and terrorism financing and to propose ways to mitigate the risks.

The procedures of adequate AML/CFT control in the operational activity of ITTO are being understood as the set of established appropriate AML/CFT basic concepts and procedures, and due diligence measures according to the FATF standards.

An integration of new AML/CFT measures with the existing ITTO due diligence controls incorporates such actions as adequate and strict identification and verification requirements ("Know Your Customer", KYC), record keeping of on-going transactions and relations, screening and monitoring procedures, risk assessment and risk-based approach, simplified and enhanced due diligence measures, and regular review of all existing business relationships.

ITTO designs the procedure for applying actions in case of suspicious activity detection. ITTO undertakes to conduct training of its staff for AML/CFT and to incorporate an audit of AML/CFT function into ITTO audit procedures.

The ITTO AML/CFT program should be implemented globally and throughout all business operations. The ITTO AML/CFT program protects the integrity and stability of ITTO by establishing the preventive component as the first barrier against the commission of acts of money laundering and the financing of terrorism.

3 HIGH-LEVEL DECISIONS TO SETUP AML/CFT SYSTEM AND STRATEGIC OBJECTIVES

With the purpose of making a significant contribution to the global efforts towards preventing money laundering and terrorism financing and of minimizing the reputation risks of unwilling association with money laundering and terrorist financing, the International Tropical Timber Council (ITTC) approves the ITTO AML/CFT Policy.

The requirements of FATF should be integrated into the ITTO AML/CFT day-to-day activities.

By adopting a risk-based approach, ITTO ensures that measures to prevent or mitigate money laundering and terrorist financing are commensurate with the risks identified. Based on risk assessment, ITTO will allocate its own resources in the most effective way to prevent money laundering and terrorism financing.

According to its AML/CFT Program, ITTO incorporates the mechanism to identify, assess, monitor, manage and mitigate money laundering and terrorist financing risks. ITTO takes enhanced measures to manage and mitigate the higher risks and in case of lower risks, simplified measures may be permitted.

The Program reflects the nature of ITTO business, its relations with executive agencies and other partners, existing AML/CFT capacities and requirements for the AML/CFT system. The AML/CFT Program shall be approved by the Executive Director of ITTO and reviewed annually. The AML/CFT report will be an integral part of ITTO annual report. The ITTO staff is required to act in compliance with the AML/CFT Program.
