ELEMENTS FOR THE BIENNIAL REVIEW AND ASSESSMENT OF THE WORLD TIMBER SITUATION 2025-2026

D R A F T

Figures not to be released until reviewed by Members. Due to document reproduction constraints, only one copy per delegation if this report is being distributed. Please ensure that the appropriate personnel on your delegation or in your country obtain access to it in order to facilitate data checking.

Due to late and incomplete/incorrect inputs from members, many of the data included here are provisional and subject to revision in an on-going process of review prior to final publication. **Lack of data also means that textual/analytical sections of this Review need to be updated/completed when data and/or clarifications are received.** Members should ensure that the figures contained herein are checked by appropriate personnel and any revisions submitted to the Secretariat by ***31 January 2027.***

The final version of the 2025-2026 Biennial Review will be published in **August 2027** and until that time none of the material contained in this document should be re-published or otherwise disseminated due to its provisional nature.

This draft document is for consideration of the International Tropical Timber Council at its 62nd Session. The figures and analyses presented here are subject to revision by Council and should not be quoted or otherwise disseminated prior to the release of the final version of this document in **August 2027**.

The designations employed and the presentation of material in this document do not imply the expression of any opinion whatsoever on the part of the International Tropical Timber Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

TABLE OF CONTENTS

(pagination to be finalized in the final version)

1. Summary 1
2. Production and Trade of Timber, 2022-2026 20
3. Direction of Trade, 2025 104
4. Price Indices 108
5. Trade in Secondary Processed Wood Products, 2019-2026 112

Forecasts for the data marked CI or CRI for the year 2026 are based on annualized COMTRADE data for the first six months of 2026. The Joint Forest Sector Questionnaires collected in 2025 and 2026 are the main sources of the appendices. Other sources are indicated by the superscripts after the figures.

SUPERSCRIPTS

	Data from the Joint Questionnaire sent by member countries to ITTO every year.
*	Other unofficial data including country statistical reports, trade journals, ITTO project reports, USDA Foreign Agricultural Service reports.
C	COMTRADE database (https://comtrade.un.org/).
CB	COMTRADE mirror statistics from COMTRADE database (https://comtrade.un.org/).
E	UNECE Superscript. Data from the UNECE online database (https://unece.org/forests/data-forest-products-production-and-trade).
F	FAOSTAT superscript. Data from the FAO online statistical database (https://www.fao.org/faostat/en/#data/FO).
G	Global Trade Atlas (https://www.gtis.com/gta/).
I	ITTO estimate.
R	Figure rounded down to zero in the ITTO Biennial Review and Assessment of the World Timber Situation.
TCF	UNECE Committee on Forests and the Forest Industry (COFFI) Market Forecasts held every year in Geneva.
W	Adjustment from weight (usually metric tons) to volume assuming the following factors (unless different conversion factors are reported): coniferous logs – 1.43m^3/ton; non-coniferous tropical logs – 1.37m^3/ton; non-coniferous non-tropical logs – 1.25m^3/ton; coniferous sawnwood –1.82m^3/ton; non-coniferous sawnwood – 1.43m^3/ton; veneer – 1.33m^3/ton; plywood – 1.54m^3/ton.
X	Repeated data.

[This section is dependent on data provided by members on their production and trade of tropical timber. It will be updated and finalized when additional data and clarifications are received from members.]

SUMMARY

This draft Review provides data on production and trade of tropical forest products and the status of tropical forests in ITTO member countries, as well as an overview of production and trade statistics of all timber products in these countries. Data are presented up to and including 2026, based on estimates made in the third quarter of that year. These estimates will be updated when data for 2026 is provided by member countries. The base year for analysis is 2025 as this is the latest year for which reliable data for most countries were available at the time of preparation. Statistics comparing tropical to all primary wood product production and trade, by volume and value, for 2025 and 2026, are given in Tables 1.1 and 1.2 for the 76 ITTO members (including the EU-27 and the United States) and for the world. Secondary processed wood products (SPWPs) are not differentiated in trade statistics by species or source of raw materials. Tables 1.3 and 1.4 provide SPWP trade by value for 2025 and 2026 for all SPWP trade which includes both tropical and non-tropical wood products for many countries.

1 Global economic trends 2025-2026

The global tropical wood products sector has faced significant shocks to the global economy in recent years, from the COVID-19 pandemic and the subsequent disruptions to global supply chains; wars in Ukraine and the Middle East, which have led to sharp increases in the prices of energy and other commodities; and significant changes in trade policy in major consumer countries. Intense regulatory scrutiny, surging trade protectionism and weak housing demand in major consumer markets has created significant challenges for tropical timber exporters. Persistent trade policy uncertainty, geopolitical tensions, and weather-related shocks due to climate change have also presented significant risks, impacting consumer demand, production and trade in tropical wood products.

The global economy had improved in 2025, with real GDP growing by about 3.2% according to IMF estimates. maintaining steady expansion after the post-pandemic shocks. However, the recovery had been uneven, and structural shifts in global trade had accelerated, with Southeast Asia strengthening its role in global manufacturing networks, supported by rising exports to the United States and increasing investment flows linked to supply chain diversification away from China.

The global economic outlook is expected to weaken in 2026, in response to the conflict in the Middle East which has triggered a major global energy shock, with disruptions in the Strait of Hormuz leading to sharp increases in energy prices and supply chain pressures, renewed inflation driven by surging energy prices, and financial market uncertainty. Rising production and trading costs, coupled with weak construction demand in key markets such as the United States and EU27, has created significant challenges for the tropical timber sector in 2026. IMF's World Economic Outlook estimates in October 2026[1] project global growth to slow to 3.1% in 2026 and rebound to 3.4% in 2027. However, the outlook is highly uneven with growth increasingly concentrated on countries which have less exposure to the war-induced supply shock and which have AI-related demand strength. The Chinese economy has experienced an uneven recovery, with external demand offsetting ongoing weakness in domestic consumption and the property sector, with import demand impacted by weaker construction-related demand and increased competition from domestic production. Growth is expected to slow to 4.5% in 2026, down from 5.0% in 2025.

Global headline inflation is projected to rise notably to 4.7% in 2026, pushing up wood product production costs and impacting consumer confidence and demand in consumer markets, before easing to 4.1% in 2027.

---

[1] IMF 2026. *World Economic Outlook. Resilience under strain, Urgent choices*. October 2026. Available at: https://www.imf.org/en/publications/weo/issues/2026/10/13/world-economic-outlook-october-2026

IMF notes that energy-importing economies outside the technology value chain and those directly impacted by hostilities face the most difficult outlook, with emerging and developing market economies being more vulnerable to high costs for oil and gas. World trade volume growth is projected to slow in 2026 and stabilise in 2027, reflecting the impact of tariffs, adjustments in production chains, and continued strength in technology-related trade. The expansion of country and product-specific U.S. tariffs on timber and wood products, and trade remedy investigations, has created uncertainty for export-oriented wood product producers, impacting the relative competitiveness of tropical exporters and the need to diversify markets and supply chains.

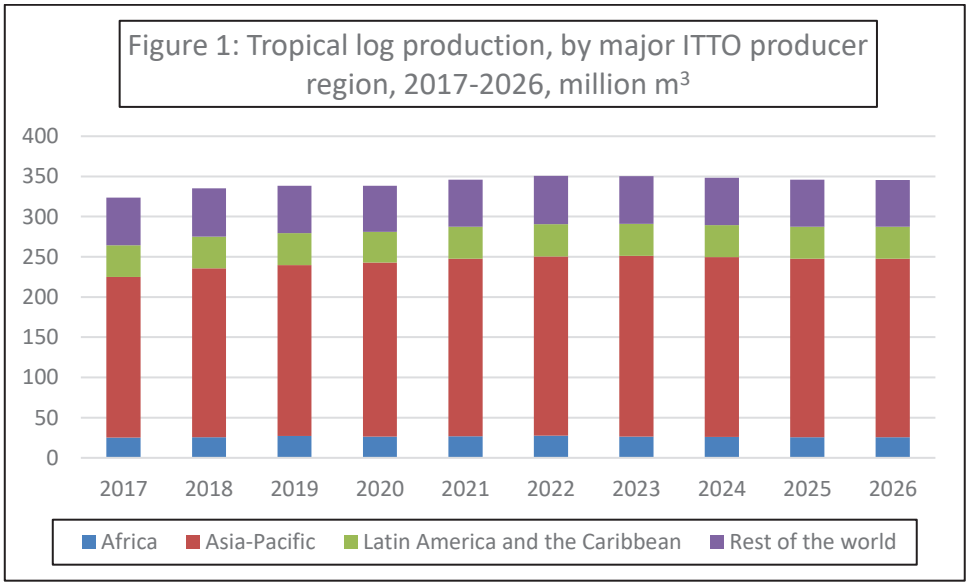
Taiwan P.O.C. has been included in ITTO aggregates.

2 Primary Wood Products Production

2.1 Tropical roundwood production[2]

Production of tropical industrial roundwood (logs) in ITTO producer member countries declined slightly year-on-year to 287.5 million m^3 in 2025 and is estimated to remain at about the same level in 2026. In descending order, Indonesia, India, Viet Nam, Brazil, Thailand, and Malaysia accounted for about 83% of log production in ITTO producer countries in 2025 and about 77% of production was in the Asia-Pacific region (Figure 1). Indonesia is ITTO's largest producer by volume of tropical roundwood, which totalled 91.5 million m^3 in 2025. Although not reported in the Joint Forest Sector Questionnaire (JFSQ), anecdotal information suggests that the proportion of harvest from industrial plantations (particularly eucalypts, acacias, teak and rubberwood) in many ITTO Asia-Pacific producer countries has continued to grow in recent years, while the availability of logs from natural stands has fallen. World production of tropical logs (ITTO members and non-members) in 2025 totalled 346.0 million m^3.

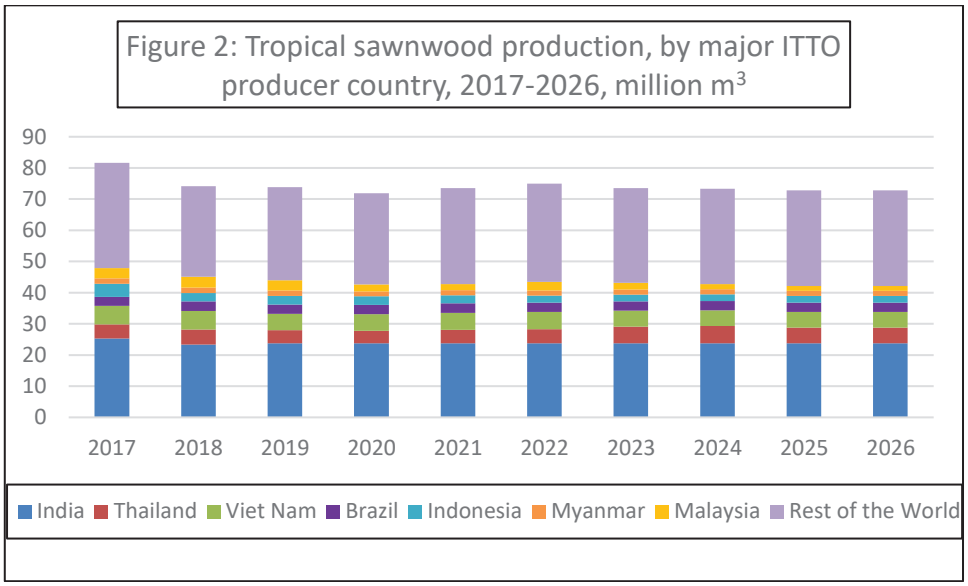


The proportion of tropical roundwood to total roundwood production by volume in ITTO member countries was 19% in both 2025 and 2026. ITTO member countries accounted for 87% of world production of tropical logs in both years. Significant non-ITTO producer countries in 2025, in descending order, include Nigeria, Uganda, Paraguay, Ethiopia, Tanzania (United Rep. of), Zambia, Lao PDR, the Solomon Islands, Bolivia and Malawi. In the African region, a significant proportion of production (56%) is by non-ITTO member countries, whereas Asia-Pacific production is predominantly by ITTO members (98%). Regional disparities in the rate of domestic conversion of primary products has continued, with Asia-Pacific, Latin America and Africa's conversion of domestically produced logs to at least primary products averaging about 99%, 95% and 93% respectively in 2025.

[2] Data estimates in this report are based on data provided by ITTO member countries in addition to data and anecdotal information from other sources. Data on production of tropical logs and other primary wood products is considered tentative because of limited reporting by most of the major ITTO producer countries which limits the quality of production data available.

2.2 Tropical sawnwood production

Tropical sawnwood production by ITTO members has declined year-on-year since 2022, when production reached a high of 69.2 million m^3, to 67.5 million m^3 in 2025. Production is expected to remain at a similar level in 2026 (Figure 2). ITTO members accounted for about 93% of world tropical sawnwood production in 2025. World production of tropical sawnwood (ITTO members and non-members) comprised about 16% of total sawnwood production (tropical and non-tropical) in 2025 and 2026.



Regionally, Asia-Pacific, Africa and Latin America/Caribbean accounted for approximately 77.5%, 11.8%, and 10.7% respectively of total tropical sawnwood production in ITTO producer countries in 2025. In the ITTO African region, Dem. Rep. of Congo, Cameroon, Gabon, Mozambique, Ghana and Côte d'Ivoire, each produced more than 450 000 m^3 of tropical sawnwood. Nigeria was the only major producer in the non-ITTO African region. Brazil's production totalled 3.0 million m^3 and accounted for 53% of production by Latin American producer countries in 2025, while Peru, Mexico, Ecuador, Venezuela, and Costa Rica were also important producers in the region. All other major ITTO producers (India, Viet Nam, Thailand, Indonesia, Myanmar, and Malaysia) were in the Asia-Pacific region (Figure 2). Viet Nam's tropical sawnwood production has mainly been sourced from imported tropical logs from border countries and the African region, with the bulk of Viet Nam's domestic log supply sourced from lower grade plantations. ITTO consumer countries produced 15.1 million m^3 of tropical sawnwood in 2025, with China accounting for over 99% of the volume.

2.3 Tropical veneer production

Production of tropical veneer in ITTO producer countries totalled 6.40 million m^3 in 2025, down slightly on the previous year, with most production occurring in the Asia-Pacific (76 %) and African (18 %) regions. Viet Nam (2.0 million m^3) and Indonesia (1.3 million m^3) were the largest country producers, while Gabon, Côte d'Ivoire, Malaysia, Thailand, Myanmar, Brazil, India, the Philippines and India each produced significant quantities, in excess of 270 000 m^3.

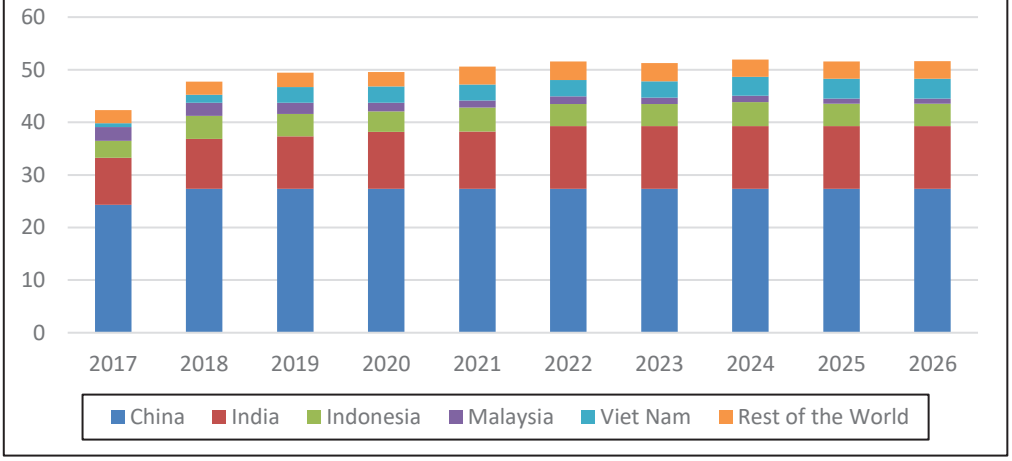
2.4 Tropical plywood production

Tropical plywood production in ITTO producer countries contracted slightly from 23.2 million m^3 in 2024 to 23.1 million m^3 in 2025 and is estimated to remain at about that level in 2026. World production of tropical plywood (comprising ITTO producers and consumers, and non-ITTO countries) totalled 51.6 million m^3 in 2025 (Figure 3). About 38% of ITTO producers' plywood production by volume was exported in 2025. Apart from India, which consumes the bulk of its domestic tropical plywood production, a significant proportion of production (81%) was exported from the other producers in the ITTO Asia-Pacific producer region, notably Indonesia Malaysia, and Viet Nam. Tropical plywood production is more sensitive than other tropical primary products to market conditions in major importing countries. Substitution trends continue to impact

production levels, with tropical plywood continuing to lose market share to temperate and softwood plywood and other lower cost alternative products. Declining availability and rising prices of peeler logs of tropical species from natural forests have con. nued to drive the extensive use of fast-grown planta. on species such as pine, poplar, eucalypts, rubberwood and acacia as core raw materials in tropical plywood manufacture. The plywood industries in all major producing countries have been affected by rising costs for adhesives, logs, and fuel. In the year to date, (2026), Malaysian and Indonesian producers have reported delays in mee. ng their contracted volumes in response to log shortages and rising production costs[3].

ITTO consumer countries' tropical plywood production totalled 27.8 million m^3 in 2025, a similar level to the previous year. China accounted for the bulk of consumers' production (over 98%), and is the world's largest country producer of tropical plywood, most (98%) of which is consumed domestically. China, India, Indonesia, Malaysia and Viet Nam dominate tropical plywood production among ITTO countries (Figure 3), although Malaysia's production has continuously dropped in recent years, declining 31% by volume year-on-year from 2024 to 2025. Relocation of plywood production facilities in China to other producer countries such as Viet Nam had also occurred to reduce production costs and avoid prohibitive tariffs imposed by the United States on some Chinese plywood imports. However, the impacts of changing US tariff structures and the uncertain trade policy environment has created concerns for Viet Nam's plywood and secondary wood processing manufacturers although the impacts are not yet evident in production data for 2026.

Figure 3: Tropical plywood production, by major country, 2017-2026, million m^3

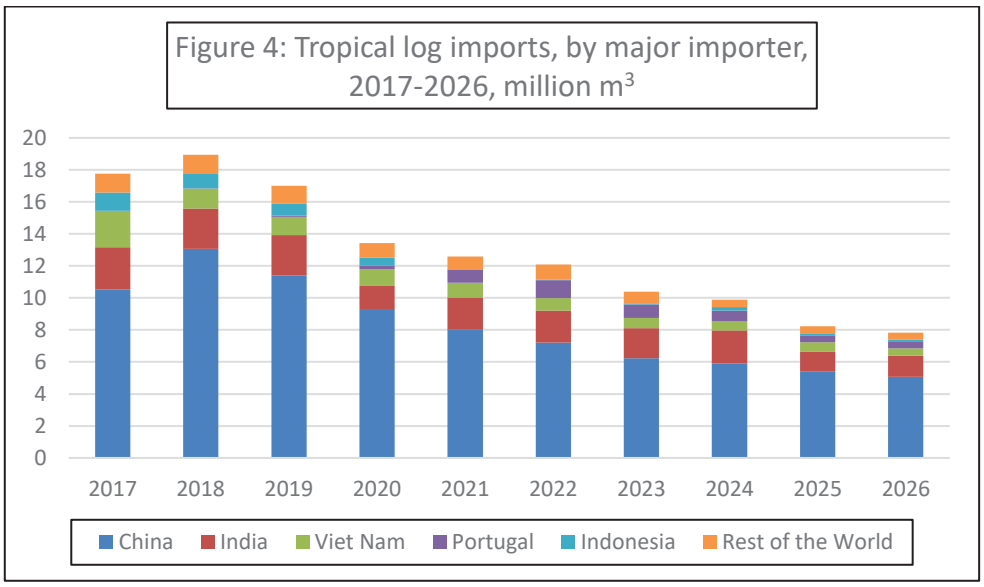


3 Primary Wood Products Imports

3.1 Tropical roundwood imports

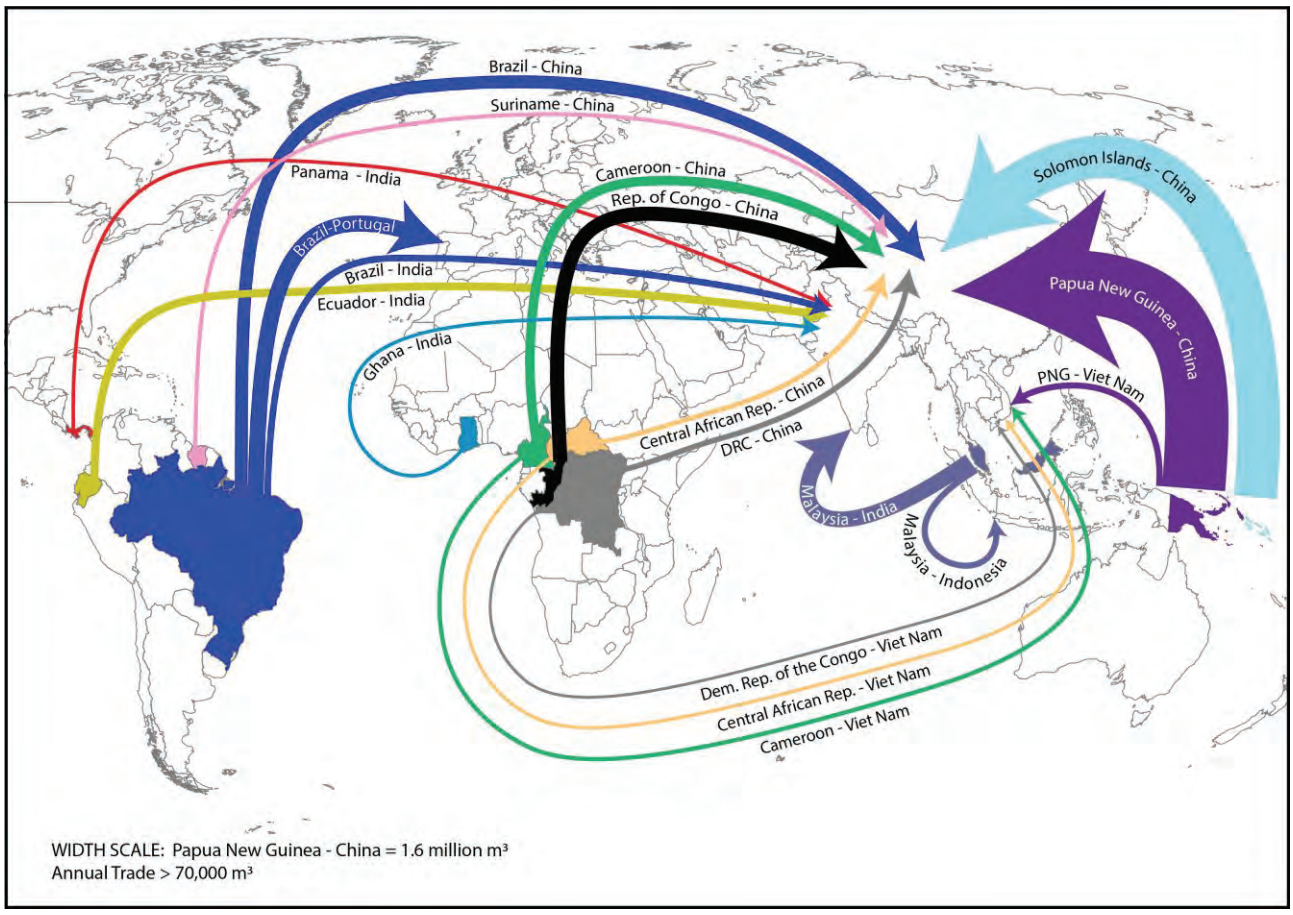
Tropical log imports by ITTO members have continued to decline year-on-year since in 2018, when demand in China had surged and ITTO imports had reached 19.0 million m^3 (Figure 4). In 2025, imports totalled 8.1 million m^3, 17% less by volume than the previous year, and were valued at USD 1 885 million. Imports are expected to continue to decline in 2026, to 7.7 million m^3, the lowest volume in ITTO's 36-year statistical records, and valued at USD 2 630 million.

[3] ITTO TTM Report: 30:17, 1-15 September 2026



The global tropical log trade continues to focus on Asian markets, with China, India and Viet Nam together accounting for 90% of tropical roundwood imports in 2025. The major directions of the global tropical log trade in 2025 were: from Papua New Guinea (PNG), the Solomon Islands (not an ITTO member), Brazil and West African countries to China; from Brazil to Portugal; from Malaysia, Ecuador, Brazil, and Ghana to India; and from Cameroon, CAR and DRC to Viet Nam. (Figure 5).

Figure 5: Major trade flows: Tropical industrial roundwood 2025 (million m³)



China's tropical log imports have declined significantly year-on-year since 2018, the peak year. However, it continues to be the most important market in the tropical log trade. In 2025 it accounted for 65% of world

tropical log imports by volume, although import volumes had contracted by over 59% compared with 2018, to 5.4 million m^3. In 2026, tropical log imports are expected to continue to decline, by 6% year-on-year, to 5.1 million m^3.

China's important construction sector continues to be impacted by a property sector crisis which began in 2021, triggered by a liquidity crunch that severely impacted major property developers. The crisis has continued, with investment in residential property and construction continuing to contract from 2021 to 2026. Real estate development for January to July 2026 indicated a year-on-year decline of over 19% in real estate investment[4]. The sector's previous growth had been driven by speculative investment and excessive borrowing, which had prompted government interventions to stabilise the market.

Despite recent government measures to stimulate domestic demand, which had been identified as the principal driver of growth in 2026, the property sector has been challenged by an ageing population and declining consumer confidence, with the crisis having widespread economic effects, dampening consumer spending and affecting financial markets. Import demand has also been impacted by increased competition from domestically produced timber, although mainly in lower grade applications[5]. China's construction and real estate sector contributes about 25% of GDP and is an important determinant of China's domestic wood products demand. Growth in exports of China's secondary processed wood products has also stagnated since 2021, impacted by declining consumer demand in major import markets, and rising manufacturing and transport costs which have impacted the competitiveness of Chinese exporters.

In 2025, PNG and the Solomon Islands were China's major tropical log suppliers, together accounting for 50% of China's imports by volume, but there were also significant supplies from Republic of Congo, Brazil, Cameroon, DRC, CAR, and Suriname. (see Appendix 2 Table 2-1). Imports from all the major tropical suppliers declined significantly in 2025. China's imports from PNG declined 23% year-on-year to 1.6 million m^3 in 2025, while imports from the Solomon Islands totalled 1.1 million m^3, down 33%. Over the same period, imports declined from the Republic of the Congo (down 14%), Brazil (down 16%), Cameroon (down 33%), and Suriname (down 32%). China's tropical log imports in 2025 comprised a small proportion (17%) of China's total log import volume (coniferous and non-coniferous).

While India's imports of logs of tropical origin have been significant in previous years, they comprised 21% of total log imports in 2025, about half the proportion in 2021. India's tropical log imports have fluctuated over the last five years, dropping to 1.24 million m^3 in 2025 which was nearly 40% less than the previous year. The decline in imports reflects demand levels and supply restrictions to India's plywood industry which is a significant end user of tropical logs. The major suppliers in 2025 were Malaysia (31%), followed by Ecuador (15%), Brazil (13%), Ghana (8%) and Panama (7%). Preliminary estimates show India's tropical log imports increasing slightly to 1.33 million m^3 in 2026.

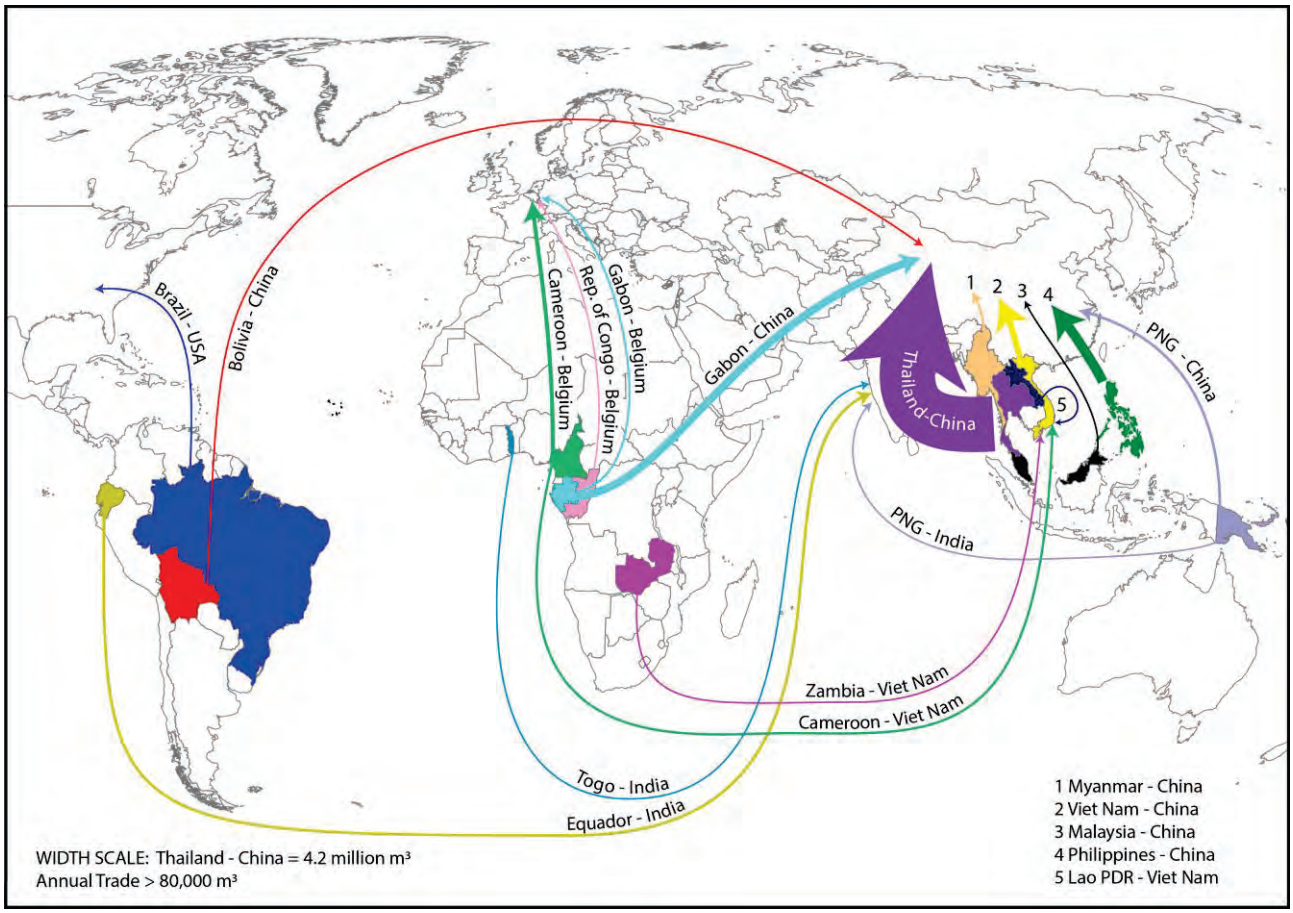
Viet Nam's tropical log imports have trended downwards since 2016, the peak year, reaching 0.60 million m^3 in 2025, slightly more than the previous year but 39% less than the level in 2022. The major tropical log suppliers to Viet Nam in 2025 were PNG (19%), Cameroon (18%), CAR (15%), DRC (12%), Rep. of the Congo (9%), Nigeria (7%) and Suriname (5%). Viet Nam has been undertaking measures to control the legality of its tropical wood imports which will continue to impact the volume and source of future imports of tropical logs.

3.2 Tropical sawnwood imports

The bulk of the global tropical sawnwood trade (87% of ITTO imports and 65% of ITTO exports) lies within the Asia-Pacific region, with ITTO imports totalling 10.4 million m^3, valued at USD 3 923 million in 2025. Although imports had declined slightly (6% by volume) year-on-year in 2025, imports have remained relatively stable over the last decade compared with other tropical primary wood products. The tropical sawnwood trade was only a small proportion by volume (about 10%) of the total sawnwood trade (tropical and non-tropical). Figure 6 shows the major trade flows of tropical sawnwood in 2025.

[4] ITTO TTM Report 30:16, 61-31 August 2026
[5] Global Consulting Alliance 2026. *Forest Sector Outlook*. Quarterly Edition 2026-Q2.

Figure 6: Major Trade Flows: Tropical Sawnwood 2025 (million m³)



China continues to be the dominant market destination in 2025, absorbing 6.9 million m³ valued at USD 2 050 million, a year-on-year decline of 8% in volume and 4% in value. In 2025, tropical sawnwood imports accounted for 22% of total sawnwood imports (tropical and non-tropical). In 2024, China's tropical sawnwood imports had risen 4% in volume, as demand for high-quality tropical sawn hardwoods had risen. Chinese companies had reportedly increased their inventories and reserves of tropical sawnwood in response to anticipated demand and possible price fluctuations[6]. In 2025, however, the ongoing contraction in the real estate market slowed construction and manufacturing activity leading to a decline in demand for sawnwood. Due to the high domestic sawnwood inventory, traders and processing enterprises generally adopted a "sales-driven purchasing" strategy, reducing their willingness to replenish sawnwood stocks which further suppressed sawnwood demand[7].

In 2025, over 65% of China's tropical sawnwood imports by volume originated from Thailand. The Philippines and Gabon supplied 11% and 8% respectively, with Viet Nam, PNG, Myanmar and Malaysia providing most of the remainder. Imports in 2025 from Gabon had declined significantly (down 53% year-on-year in volume), and from Thailand (down 14%), while imports from the Philippines had increased by 18%. China's imports from Thailand are predominantly of lower value rubberwood, although the rubberwood wood processing industry has improved in terms of technology, product quality and supply stability and China's demand for high-quality sawn rubberwood is high. Imported sawn rubberwood is widely used in the manufacture of furniture, wooden doors, bathroom cabinets, wooden floors and other woodwork. Africa's supplies are mainly of high value specialty timbers for the high-end market. A recent report concludes that China's market

[6] ITTO TTM Report 29:4 16-28 February 2025

[7] ITTO TTM Report 30:3 1-15 February 2026

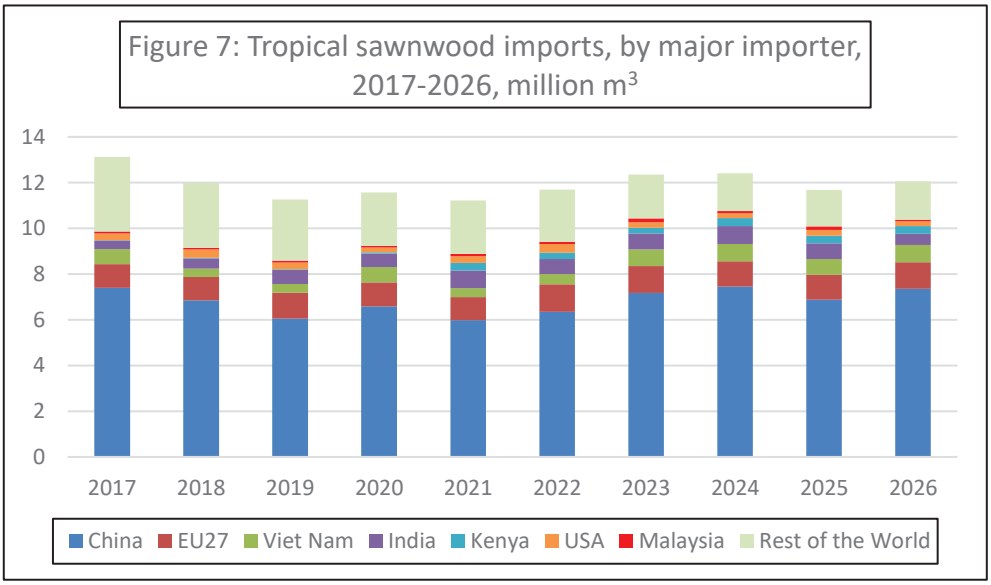
is more concerned about commercial reliability rather than the environmental credentials of African imports[8].

Preliminary data for 2026 indicates that China's tropical sawnwood imports are expected to rebound to 7.36 million m^3 valued at USD 2 429 million, up 7% in volume and 18% in value compared with the same period in 2025. China's imports in the first half of 2026 compared with the same period in 2025 show significant gains in imports from Viet Nam (up 188%), Myanmar (up 176%), and PNG (up 50%) while imports from Thailand dropped 5%. The increase in imports has been in response to weak demand and increasing barriers to trade for tropical suppliers in traditional markets (EU27 and United States), and the change in products exported from the African region from logs to sawnwood.

The other major tropical sawnwood importers in 2025 were EU27, Viet Nam, India, Kenya, and the United States (see Figure 7). Most of the other major importers reported year-on-year declines in imports by volume, with EU27 imports down 2%, Viet Nam down 7%, and India down 14%. Bucking this trend were the United States (up 11%) and Malaysia (up 70%). US demand remained strong for tropical hardwoods in high-end applications such as decking, flooring and furniture, and Malaysian domestic supplies of sawnwood have declined.

Viet Nam's major suppliers in 2025 were Cameroon (26%), Lao PDR (18%), Zambia (18%), Thailand (8%) and Brazil (6%). According to preliminary data, Viet Nam's imports in 2026 are expected to rebound by 11% to 0.77 million m^3. Although EU27 imports of tropical sawnwood were down marginally in 2025, they are expected to increase in 2026 by 6% to 1.15 million m^3 (see Figure 7).

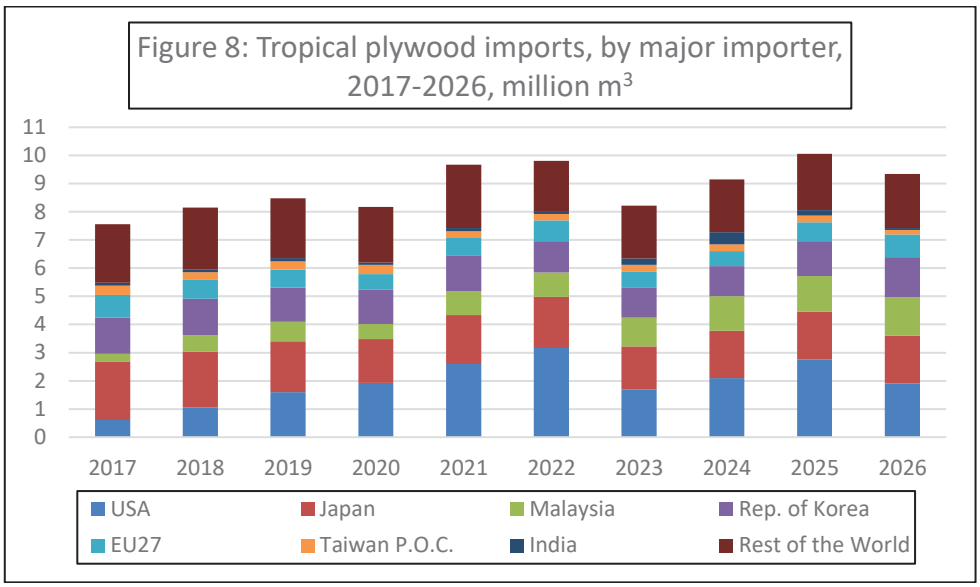
Figure 7: Tropical sawnwood imports, by major importer, 2017-2026, million m^3



3.3 Tropical plywood imports

The global trade in tropical plywood continued to recover from a low in 2023, increasing year-on-year by volume in 2024 and 2025, by 14% and 11% respectively, reaching 9.1 million m^3 in 2025. Import trends reflect the significant growth in US imports in response to strong economic growth and housing starts during that period (Figure 8). World imports are expected to contract in 2026, declining to 7.8 million m^3, down 5% year-on-year, and valued at USD 2 001 million, up 3% year-on-year.

[8] ATIBT 2026, *Two perspectives on China's market for African tropical timber*. Available at: https://www.atibt.org/en/news/13952/two-perspectives-on-china-s-market-for-african-tropical-timber



The United States has been the major importer of tropical plywood since 2020 and accounted for 27% of world imports by volume in 2025. In that year, imports had increased 32% year-on-year to reach 2.8 million m^3, with tropical plywood imports comprising the bulk (77%) of total U.S. plywood imports (tropical and non-tropical). The major suppliers to the United States in 2025 were Indonesia (36%), Viet Nam (36%), Cambodia (6%), Malaysia (6%) and Ecuador (5%).

China had previously been a major supplier to the United States, but trade had been impacted by the imposition of anti-dumping and countervailing duties resulting in the relocation of some Chinese companies to Viet Nam and other producer countries. The significant increase in U.S. imports of hardwood plywood from Viet Nam led to U.S. industry concerns of unfair trade that threatened the economic viability of the U.S. hardwood plywood industry. In July 2026, the U.S. Department of Commerce issued affirmative final determinations in an anti-dumping and countervailing duty investigation into hardwood plywood and decorative plywood from China, Indonesia and Viet Nam, setting prohibitive duties on hardwood and decorative plywood from the three countries. The rates vary, from China (high), Vietnam (medium) and Indonesia (low)[9]. The variable rates are challenging the relative competitiveness of tropical plywood exporters to the United States, particularly from China and Viet Nam, and are expected to result in diversification of markets for exporters. US imports of tropical plywood are expected to contract to 1.9 million m^3 in 2026, with imports from Indonesia and Viet Nam declining significantly in the first half of 2026, by 52% and 62% respectively compared with the same period in 2025, while imports from Malaysia and Cambodia were up 140% and 102%, respectively.

Japan's tropical plywood imports in 2025 totalled 1.7 million m^3, about the same level as the previous year, accounting for about 17% of world imports. Imports remain low by historical standards and had reached their lowest recorded volume in 2023 at 1.5 million m^3. The major suppliers by volume in 2025 were Indonesia (44%), Malaysia (34%), and Viet Nam (21%). Japan's imports in the first half of 2026 had reportedly been affected by supplier price increases driven by rising costs for adhesives, logs, and fuel. Production delays have also been reported in Malaysia and Indonesia due to material shortages, although some Indonesian exporters have reportedly diverted exports from U.S. markets to Japan due to the imposition of U.S. tariffs[10]. Japan's tropical plywood demand, which had already stagnated before the COVID pandemic, has continued to be impacted by considerable substitution by domestically produced softwood plywood in response to the relatively high prices and reduced availability of Southsea plywood, and the risk of exchange rate fluctuations which affects imported plywood. The recent sharp appreciation of the yen (September 2026) is reported to have made procurement decisions difficult.

While Malaysia is an important plywood exporter it is also a significant importer. Imports totalled 1.3 million m^3 in 2025, with 97% by volume sourced from Indonesia and Viet Nam. The other significant importers of tropical plywood

[9] https://www.federalregister.gov/documents/2026/07/21/2026-14611/hardwood-and-decorative-plywood-from-the-peoples-republic-of-china-final-affirmative-countervailing

[10] ITTO TTM Report: 30:17, 1-15 September 2026.

in 2023, in descending order by volume, were Rep. of Korea, Taiwan P.O.C., India, the Philippines, Canada, United Kingdom, Germany and Mexico.

EU27 imports of tropical plywood increased in 2025 to 0.66 million m^3, up 24% year-on-year, and are estimated to reach 0.81 million m^3 in 2026. Provisional anti dumping duties were imposed by the EU on Chinese hardwood plywood in June 2025 and were increased in December 2025. The duties have reportedly increased the competitiveness of plywood from Viet Nam and other tropical suppliers to EU markets. EU27 imports from China may also be impacted by an investigation initiated in July 2026 by the European Commission into the hardwood plywood that originated from China. The investigation concerns whether certain panels with thin coniferous or bamboo outer plies and hardwood cores circumvent the duties on Chinese hardwood plywood.

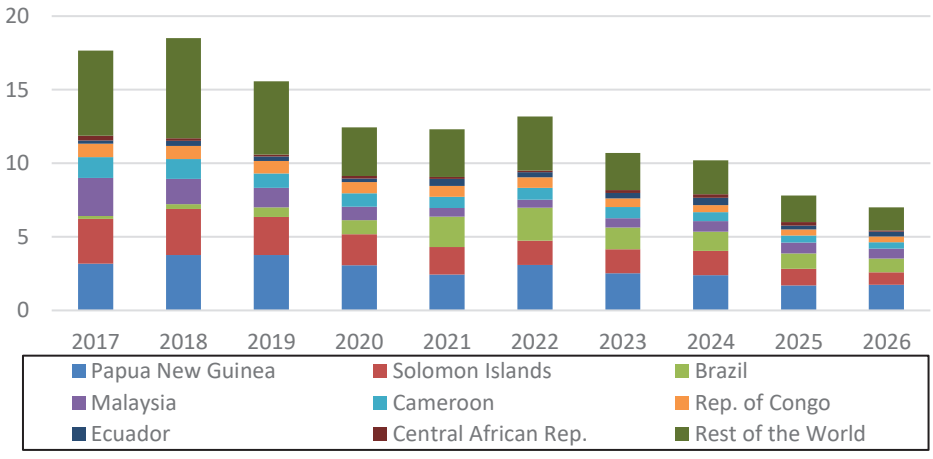
The potential impact of the EU Deforestation Regulation on EU27 imports of tropical plywood and other wood products, which will begin enforcement on 30 December 2026, is uncertain. Some key exporters to the EU expect potential advantages for their well-established timber-tracking systems and others report that compliance costs, together with weak European demand, are encouraging producers to develop alternative destinations. A new EU restriction on formaldehyde emissions from wood-based articles including plywood took effect on 6 August 2026. The requirement may favour suppliers able to document low-emission panels.[11]

3 Primary Wood Products Exports

3.1 Tropical roundwood exports

In 2025, ITTO producer members exported 6.2 million m^3 of tropical logs valued at USD 1 473 million, down 22% by volume and 22% by value compared with the previous year. Producer member exports are expected to contract further in 2026 to 5.7 million m^3, with PNG, Ecuador, and Brazil accounting for most of the decline. World exports amounted to 7.8 million m^3 in 2025, declining 23% by volume year-on-year. The Solomon Islands, the major non-ITTO exporter, accounted for most of the decline (Figure 9).

Figure 9: Tropical log exports, by major exporter, 2017-2026, million m^3



PNG, which has been the largest ITTO exporter since 2011, shipped 1.7 million m^3 in 2025, 29 % less than the previous year, with the bulk of the volume (94%) destined for China and the remainder to Asian destinations (Viet Nam, India and Japan). Tropical log exports from Brazil[12] had escalated from a relatively negligible base in 2018 (at 0.383 million m^3) to 2.22 million m^3 in 2022, dropping year-on-year to reach 1.05 million m^3 in 2025. Exports are expected to continue to contract in 2026 to 0.9 million m^3. Brazil's exports in 2025 were predominantly to Portugal (38%), China (32%) and India (15%) with exports to Portugal and China being predominantly plantation eucalypt species and exports to India mainly plantation teak. In the ITTO

[11] ITTO TTM Report 30:18, 16-30 September 2026

[12] Note: ITTO trade statistics for Brazil include plantation and non-plantation hardwood species.

Latin America/Caribbean region, other major exporters in 2025 were Ecuador (the second largest exporter from the region at 0.25 million m^3) as well as Panama (0.22 million m^3) and Suriname (0.20 million m^3), with India and China the predominant destinations for these exporters.

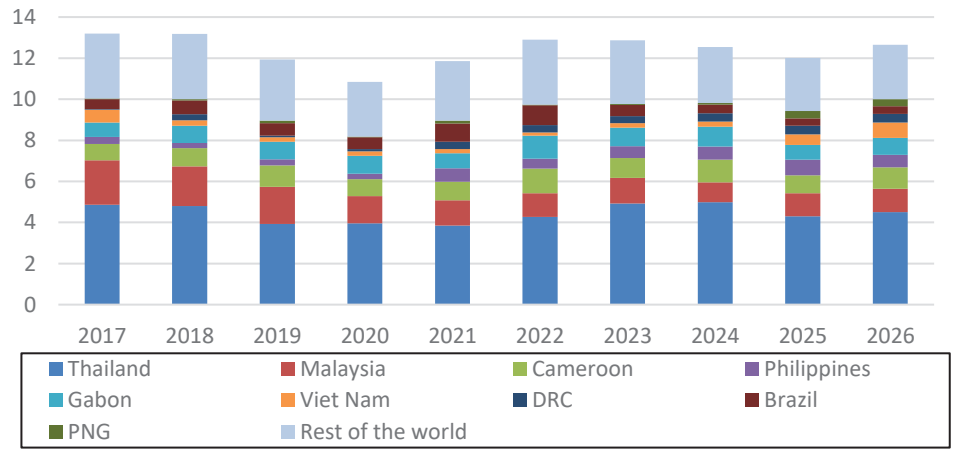
Tropical log exports from the ITTO Africa region have also declined steadily year-on-year, reflecting tightening log export restrictions in exporter countries and increasing regulatory pressures in import countries. Exports contracted 13% by volume in 2025 to 1.7 million m^3 and are expected to decline further in 2026 to 1.3 million m^3. Cameroon, Rep. of Congo. CAR, DRC, Ghana, and Mozambique, were the major ITTO exporters from the African region in 2025, with China, Viet Nam and India the major export destinations. A regional log export ban covering 6 of the CEMAC member countries – Cameroon, CAR, Chad, Rep. of Congo, Equatorial Guinea and Gabon – was postponed to 1 January 2028, and included a gradual phase-out which began in January 2025.

It is notable that non-ITTO member countries are also important tropical log exporters, with the Solomon Islands being the second largest world exporter of tropical logs in 2025. Exports from the Solomon Islands have plummeted in recent years, dropping to 1.1 million m^3 in 2025, down 31% on the previous year and expected to decline to 0.8 million m^3 in 2026, down 25% on the previous year.

3.2 Tropical sawnwood exports

Tropical sawnwood exports by producer members in 2025 amounted to 10.9 million m^3, valued at USD 3 845 million, down slightly (by 5% and 3% respectively) compared with the previous year. In contrast to other tropical primary wood products, exports are expected to rebound in 2026, reaching 11.5 million m^3, up 5% compared with the previous year (Figure 10). About 68% of exports (7.5 million m^3) were from ITTO producer members in the Asia-Pacific region, with total exports by ITTO producers reflecting trends in Thailand's exports, which comprised 39% of ITTO producer countries' exports in 2025.

Figure 10: Tropical sawnwood exports, by major supplier, 2012-2026, million m^3



Most of Thailand's tropical sawnwood exports are plantation rubberwood and export trends reflect developments in China's secondary processed wood products industries, which absorb over 98% of Thailand's exports. Following a post-COVID recovery from 2021 to 2024, exports in 2025 declined 14% year-on-year to 4.3 million m^3, amid ongoing weakness in domestic consumption and the property sector in China. In 2026, Thailand's tropical sawnwood exports are expected to increase slightly, by 5%, to 4.5 million m^3.

Malaysia's tropical sawnwood exports in 2025 totalled 1.1 million m^3, up 16% on the previous year but significantly less than pre-COVID levels. In contrast to Thailand which is dependent on a single market, Malaysia exports to a diverse range of markets, with the major destinations in 2025 being China (21%), the Philippines (6%), India (5%), Thailand (5%), Singapore (5%), United Arab Emirates (5%) and Yemen (4%). There were also a significant number of other important markets.

There continue to be significant discrepancies between the trade reported by major importers and exporters of tropical sawnwood, for countries that have reported data for 2025. Exports of tropical sawnwood in 2025 reported by Thailand and the Philippines, for example, differ significantly to that reported by major importing countries (See Table 2-2).

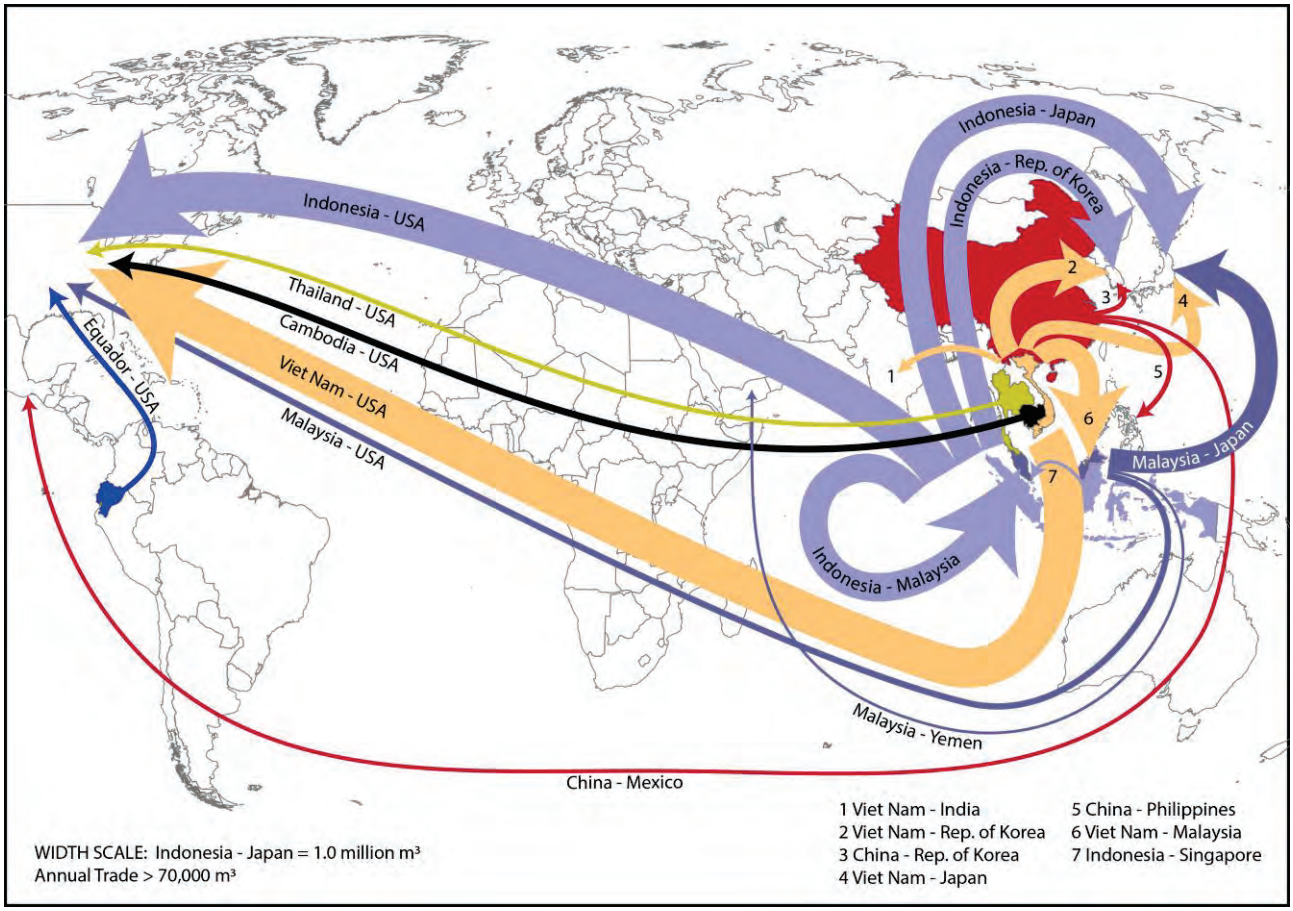
Tropical sawnwood exports in 2025 from the ITTO African region declined 18% year-on-year to 2.7 million m^3. The major exporters in 2025 were Cameroon and Gabon, together accounting for 59% of ITTO Africa's exports. DRC, the Rep. of Congo, Ghana and Togo also exported significant quantities (over 100 000 m^3). Cameroon's exports were predominantly to Belgium, Viet Nam, China, and other EU destinations while Gabon supplied mainly the China market. The region's exports are expected to increase 10% in volume to 3.0 million m^3 in 2026, in response to log export restrictions to assist domestic wood processing in many exporter countries in the region. In response to concerns about the longer-term impact of European compliance pressures, African producers were reportedly assessing alternative markets such as Pakistan, Bangladesh and South American markets[13].

Tropical sawnwood exports from Latin America/Caribbean declined year-on-year from 2021 to 2024, when exports reached a low of 0.75 million m^3, increasing marginally (by 2%) in 2025 to reach 0.77 million m^3. Exports are expected to remain at a similar level (0.78 million m^3) in 2026. Brazil accounted for 48% of the region's exports, Ecuador 29%, Peru 8% and Suriname 7%.

3.3 Tropical plywood exports

Figure 11 shows the major trade flows of tropical plywood in 2025.

Figure 11: Major Trade Flows: Tropical plywood, 2025 (million m^3)

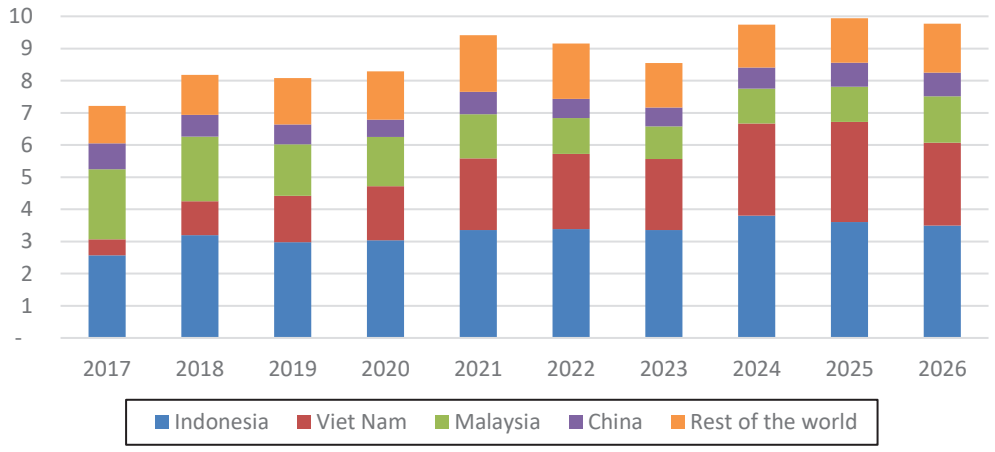


[13] ITTO TTM Report: 30:16, 16–31 August 2026

Tropical plywood exports from ITTO producer countries increased year-on-year from 2023 to 2025. Exports reached 8.7 million m^3 by volume and USD 4 014 million by value in 2025, up 2% and 6% respectively on the previous year. The Asia-Pacific region accounted for 94% of the tropical plywood export trade in 2025. Indonesia was ITTO's largest exporter in 2025, accounting for 41% of total ITTO producer country exports (Figure 12). The other major exporters in 2025 were Viet Nam (36%), and Malaysia (13%), with Cambodia, Brazil and Gabon accounting for most of the remainder.

Indonesia's exports were mainly to the United States (20%), Japan (17%), Rep. of Korea (10%), and Malaysia (9%). Over half (53%) of Malaysia's exports have been to Japan with significant volumes also shipped to the United States (14%), and the United Kingdom (5%). Malaysia's exports continue to be affected by chronic log supply shortages, mainly due to policies to achieve sustainable forest management, in addition to rising raw material and manufacturing costs and weak demand in Japan, the major export market.

Figure 12: Tropical plywood exports, by major supplier, 2017-2026, million m^3



China was the only significant ITTO consumer country exporter, accounting for 65% of ITTO consumer country exports (totalling 1.2 million m^3), with exports increasing 13% year-on-year to reach 0.75 million m^3 in 2025. China's main export markets in 2025 were the Philippines, Rep. of Korea, Taiwan P.O.C., Mexico, Malaysia and Japan. China's exports are subject to anti-dumping duties in several countries, including the United States, EU member states , the Rep. of Korea and Canada. The EU Deforestation Regulation is also expected to create challenges for Chinese (and other tropical) manufacturers and exporters of tropical plywood to EU destinations.

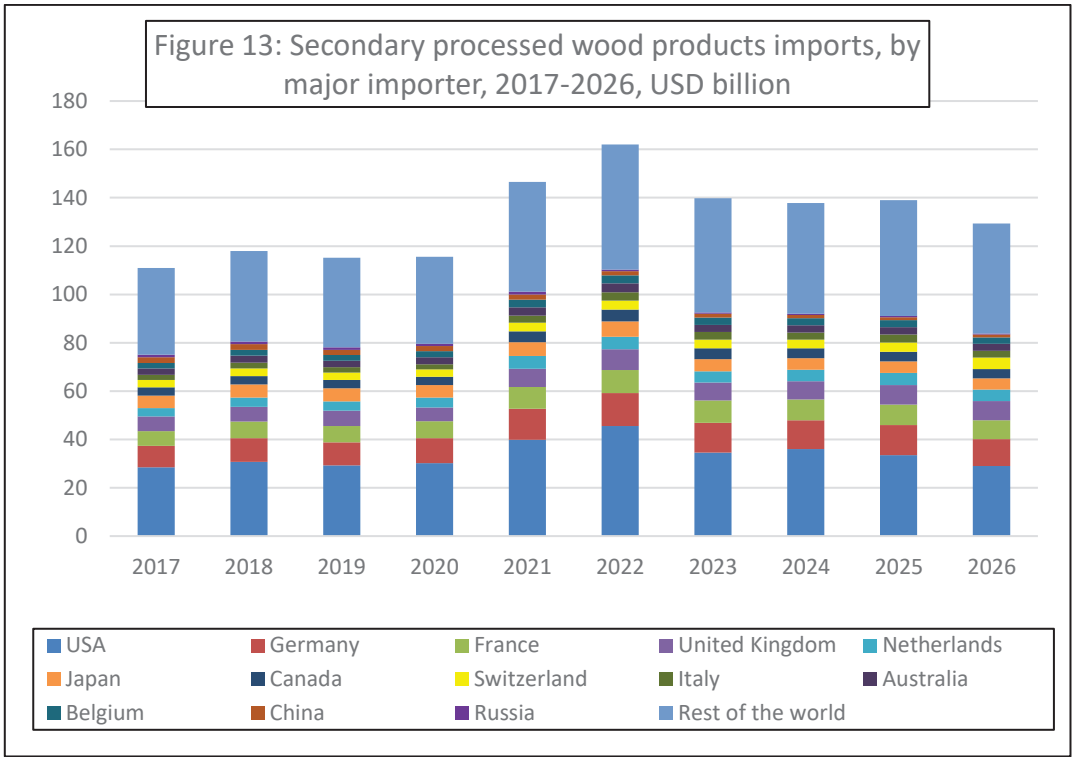
Viet Nam's tropical plywood exports have continued to grow over the last decade, with the exception of 2023 when growth had moderated. During that period, Viet Nam had benefitted from U.S. trade measures imposed on some plywood imports from China and government measures to support the industry. In 2025, exports totalled 3.1 million m^3, up 9% on the previous year and were predominantly to the United States (32%), Rep. of Korea (17%), Malaysia (16%), Japan (11%) and India (5%).

4 Secondary Processed Wood Products Trade

4.1 Secondary processed wood products imports

Secondary processed wood products (SPWPs) are composed of roundwood (logs) that have already undergone a primary conversion to sawnwood, veneer, plywood, and other intermediate products. Although tropical and non-tropical SPWPs are not differentiated in trade statistics, it is assumed that most of the trade in SPWPs from tropical countries is of tropical origin, based on limited imports of non-tropical wood by tropical countries. Reports on China's furniture manufacturing sector also indicate that a significant proportion of China's wooden furniture production is composed of tropical wood products.

The value of ITTO imports of SPWPs - nearly two-thirds of which was wooden furniture – totalled about USD 124.6 billion in 2025 and comprised the bulk (90%) of world imports. The value of ITTO imports had soared between 2020 and 2022, reaching a high of USD 146.9 billion in 2022 in response to pent-up demand in major consumer markets, before declining by 14% in 2023 and stabilising in 2024 and 2025. Imports are expected to contract to USD 116.0 billion in 2026 (Figure 13). The bulk of the trade in SPWPs continues to be between ITTO consumer countries, which accounted for about 94% of ITTO imports and 78% of ITTO imports by value in 2025.

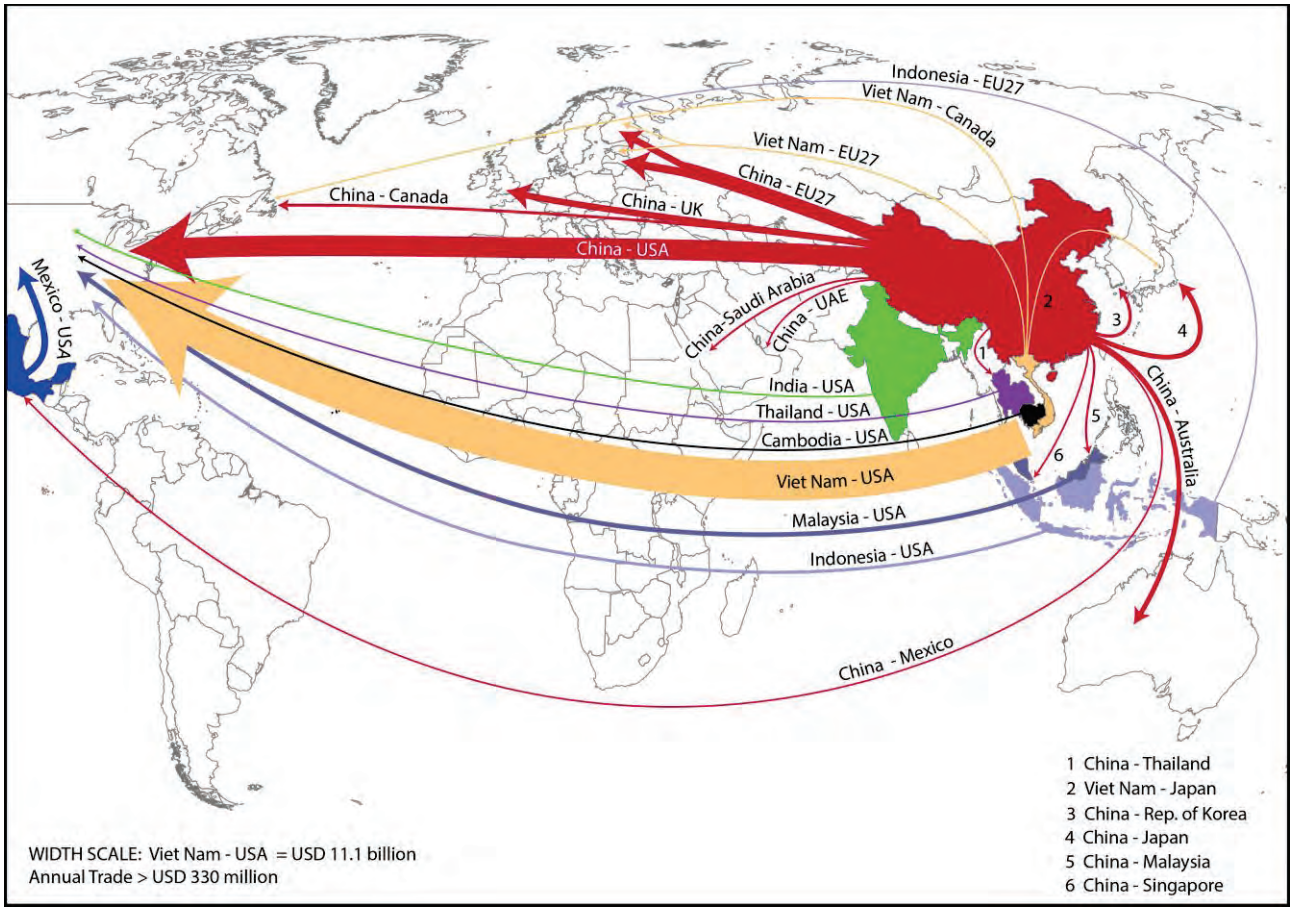


Wooden furniture and parts constituted 65% of global SPWP trade, followed by 'other SPWPs' (15%), builders' woodwork and joinery (13%), mouldings (3%), and cane and bamboo furniture and parts (3%). Figure 14 shows the major trade flows in wooden furniture and parts from China and ITTO producer countries in 2025. World imports of wooden furniture and parts peaked in 2022 at USD 102.9 billion and have fluctuated between 2022 and 2025, when imports were valued at USD 90.6 billion.

During the period 2020 to 2022, U.S. markets had driven the overall growth in the value of world imports of SPWPs, particularly of wooden furniture and parts. Although the U.S economy had strengthened in 2023, wooden furniture imports contracted by 26% to USD 24.1 billion, reflecting weaknesses in the U.S. housing sector. Imports increased 7% by value in 2024 before dropping 7% in 2025 to USD 24.1 billion. In 2026, U.S. wooden furniture imports are expected to decline further (by 17%) to USD 19.9 billion, in response to uncertain and escalating tariffs on some wooden furniture products and amid high inflation and high interest rates which have resulted in declining consumer confidence. According to the Joint Center for Housing Studies of Harvard University[14], there continue to be numerous barriers to U.S. housing construction with housing markets impacted by persistent affordability challenges and rising economic uncertainty. U.S. imports of wooden furniture comprised over 30% of ITTO imports and 27% of world imports by value in 2025.

[14] Joint Center for Housing Studies of Harvard University 2026. *The state of the Nation's Housing 2025.* Available at: https://www.jchs.harvard.edu/sites/default/files/reports/files/Harvard_JCHS_The_State_of_the_Nations_Housing_2025.pdf

Figure 14: Major Trade Flows: Wooden Furniture from China and ITTO Producer Countries, 2025, (USD billion)



A significant proportion of U.S. imports of wooden furniture was from ITTO producer countries – Viet Nam, Mexico, Malaysia, Indonesia, India, Thailand, Brazil, and Cambodia among others - in addition to China, which was overtaken as the largest supplier by Viet Nam in 2019. In the 1st half of 2026, imports from Viet Nam and China comprised 47% and 8% respectively of US imports of wooden furniture by value, but they had declined 19% and 43% respectively compared to the same period in 2025.

The value of EU27's SPWP imports in 2025 was up 6% on the previous year, valued at USD 33.4 billion, showing some signs of recovery amid a subdued economy. Imports in 2026 are expected to decline 9% to USD 48.5 billion as construction activity has weakened and continuing economic uncertainty has weighed on EU demand for furniture and high value secondary processed wood products such as joinery products, mouldings and decking. The implementation of the EU Deforestation Regulation beginning in December 2026 will also influence the market for tropical SPWP imports, favouring suppliers who are able to provide reliable traceability and documentation, reinforcing the position of established supply chains.

Wooden furniture and parts comprised about 63% of the EU27's imports in 2025, followed by other SPWPs (18%), builder's woodwork and joinery (14%), mouldings (3%) and cane and bamboo furniture and parts (2%). Although a significant proportion of the EU27's imports of wooden furniture are from intra-regional suppliers, imports from extra-regional suppliers are mainly from China and ITTO producer countries – Viet Nam, Indonesia, India, Malaysia, and Brazil. Imports from China increased 4% in 2025 to USD 3.9 billion and are estimated to further increase by 12% in 2026 to USD 4.3 billion. Imports from Viet Nam (the major tropical supplier) were up 17% in 2025 to USD 4.1 billion, before declining 20% in 2026 to an estimated USD 3.3 billion.

ITTO producers continued to import comparatively small volumes of SPWP products, which were valued at USD 7.4 billion in 2025, but were only 6% of total ITTO imports. The major ITTO producer country importers of SPWPs in 2025 were Mexico, Malaysia, Viet Nam, Thailand, the Philippines, and India.

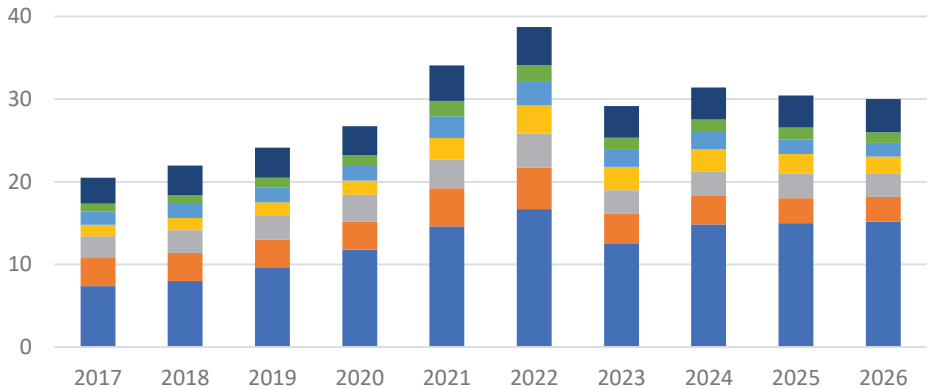
4.2 Secondary processed wood products exports

ITTO consumers exported USD 105.4 billion of SPWPs in 2025, accounting for more than 78% of ITTO member country exports which were valued at USD 135.4 billion. In 2025, China provided about 25% of ITTO SPWP exports and the country's shipments were valued at USD 33.6 billion. Wooden furniture comprised the bulk (67%) of China's SPWP exports. China's exports of wooden furniture had contracted in value by 8% in 2025 to USD 22.6 billion, mainly in response to a 20% decline in exports to the United States, and expected to decline slightly in 2026 to USD 22.4 billion. Exports to the United States, the major country market, have been impacted by a stacked system of U.S. import tariffs and antidumping and countervailing duties on some items of wooden furniture.

In contrast to Viet Nam, which exports predominantly to the United States, China's export markets are more diversified, with China shipping to over 200 destination countries. In the 1st half of 2026, China's major markets were the United States and the United Kingdom which absorbed 26% and 8% respectively of China's export value, followed by Australia (7%), Japan (5%), Germany (4%), the Rep. of Korea (4%) and Canada (4%).

Following a 6-year period of significant growth in the value of SPWP exports by ITTO producer countries, exports plunged in 2023 to USD 28.7 billion, down 25% year-on-year. The pace of growth slowed due to uncertainties caused by the war in Ukraine, supply chain and logistical constraints, strong inflationary pressures impacting manufacturing costs and consumer demand, and devaluation of major currencies in relation to the US dollar. Exports recovered slightly in 2024 before declining 3% to USD 30.0 billion in 2025 (Figure 15). Asia-Pacific was the dominant ITTO exporting region in 2025, accounting for 84% of producer exports, followed by Latin America/Caribbean (15%). In contrast, Africa's SPWP exports have continued to remain at a relatively low level.

Figure 15: Secondary processed wood products exports, by major ITTO producer, 2017-2026, USD billion



Most of the increase in value of SPWP exports from ITTO producer countries during the period 2017 to 2022 can be attributed to the rapid growth in Viet Nam's exports of wooden furniture to the United States, which had reached USD 11.9 billion in 2022 and was the highest value country-to-country trade flow in the world furniture trade. In 2023, however, Viet Nam's wooden furniture exports had contracted year-on-year to USD 11.2 billion (down 26%), before rebounding in 2024 (up 19%), and stabilising in 2025 at USD 13.5 billion, with 82% destined to U.S. markets. In 2026, significant increases in U.S. tariffs on wooden furniture imports from Viet Nam is putting pressure on selling prices and profit margins, challenging the competitiveness of Vietnam's exports in U.S. markets. Viet Nam's exports to the U.S. are expected to drop 15% in 2026 to USD 9.4 billion, with Vietnamese furniture manufacturers reportedly seeking the expansion of alternative

export destinations such as EU27 countries, the Middle East, Australia, Canada, and South America, while upgrading legal timber traceability and compliance systems[15].

After Viet Nam, ITTO producer countries including Malaysia, Mexico, Indonesia, Brazil, India, the Philippines, and Thailand were all significant exporters of SPWPs, with exports predominantly to U.S. and EU27 destinations. Exports of builders' woodwork and joinery by ITTO producer countries totalled USD 3.0 billion in 2025, declining marginally (by 3%) compared with the previous year and expected to remain at that level in 2026. In contrast to exports from other major ITTO producers, which are mainly of wooden furniture and parts, SPWP shipments from the Philippines are predominantly builders' woodwork and joinery destined for Japan. They totalled USD 0.9 billion in 2025 and comprised 31% of ITTO producers' exports of builders' woodwork and joinery. ITTO producers continued to play a more significant role in global mouldings exports compared with exports of other SPWP items, accounting for 31% of world exports in 2025 and amounting to USD 1.6 billion. Brazil exported 21% of ITTO producer country exports of mouldings, followed by Indonesia (30%), Malaysia (13%) and Viet Nam (9%).

Figures in **bold** denote imports recorded by importing country. Figures in *italics* denote exports recorded by exporting country.

Notes about importers

* Taiwan P.O.C. and the Rep. of Korea did not report any data in COMTRADE for the year 2025.

** The Netherlands reported 50,133 m^3 of tropical industrial roundwood imports to COMTRADE for the year 2025.

Notes about exporters

+ Papua New Guinea, Cameroon, Rep. of Congo, Ecuador, Central Afr. Rep., Panama, Suriname, Ghana, Mozambique, Dem. Rep. of Congo did not report any data in COMTRADE for the year 2025.

Figures in **bold** denote imports recorded by importing country. Figures in *italics* denote exports recorded by exporting country.

Notes about importers

* Belgium reported 1,660,453 m^3 of tropical sawnwood imports to COMTRADE for the year 2025.

** Taiwan P.O.C. did not report any data in COMTRADE for the year 2025.

Notes about exporters

+ Thailand reported 111,303,500 m^3 of tropical sawnwood exports to COMTRADE for the year 2025.

++ Cameroon, Gabon, Viet Nam, Dem. Rep. of Congo, Papua New Guina, Rep. of Congo and Ecuador did not report any data in COMTRADE for the year 2025.

+++ Philippines reported 198,365,000 m^3 of tropical sawnwood exports to COMTRADE for the year 2025.

++++ Indonesia reported 44,060 m^3 of tropical sawnwood exports to COMTRADE for the year 2025.

Notes about importers

* Taiwan P.O.C. did not report any data in COMTRADE for the year 2017.

** Philippines reported 36,483,430 m^3 of tropical plywood imports to COMTRADE for the year 2017.

Notes about exporters

+ Indonesia reported 2,781,945 m^3 of tropical plywood exports to COMTRADE for the year 2025.

++ Viet Nam, Cambodia, Ecuador and Gabon did not report any data in COMTRADE for the year 2025.

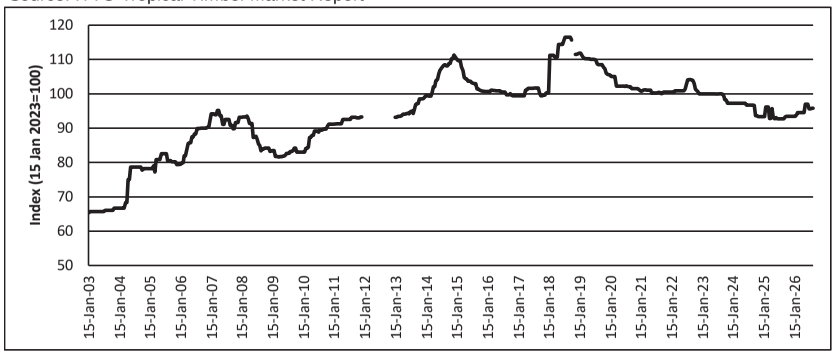
+++ France reported 41,760 m^3 of tropical plywood exports to COMTRADE for the year 2025.

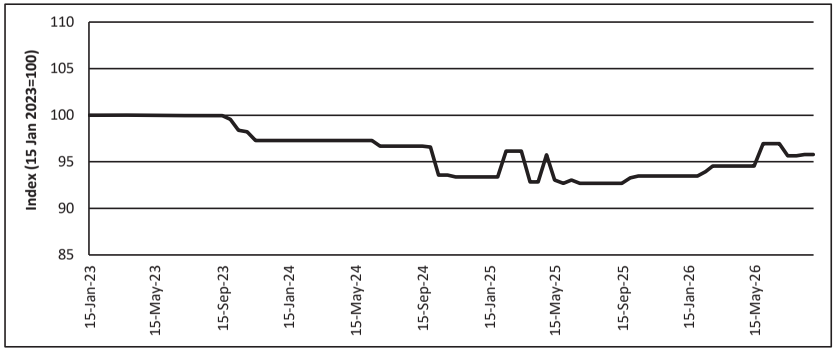
++++ Thailand reported 156,232 m^3 of tropical plywood exports to COMTRADE for the year 2025.

4-1. Tropical Industrial Roundwood Price Indices

4–1–a. West Africa industrial roundwood average export price index*

The index is based on two-weekly nominal euro prices/m^3 of acajou, ayous, azobe, belli, bibolo, dibétou, ekki, iroko, kaha, n'gollon, obeche, okan, okoume, maobi, movingui, niove, padouk, sapele, sipo, tali, utile and wawa logs (loyale Merchant/B/BC/C grades).
Source: ITTO Tropical Timber Market Report

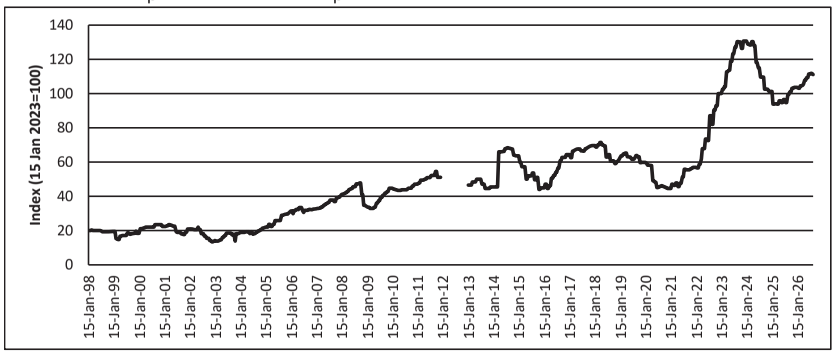


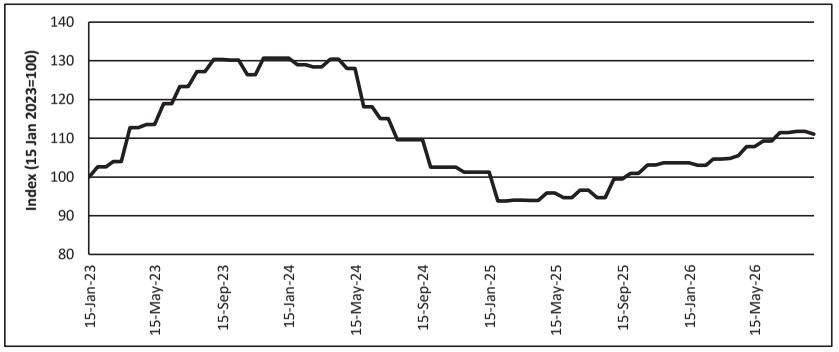


* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4–1–b. Brazil domestic logs price index*

The index is based on two-weekly nominal dollar prices/m^3 of ipê, jatoba, massaranduba, miiracatiara, angelim vermelho, mixed redwood and white woods logs.
Source: ITTO Tropical Timber Market Report.



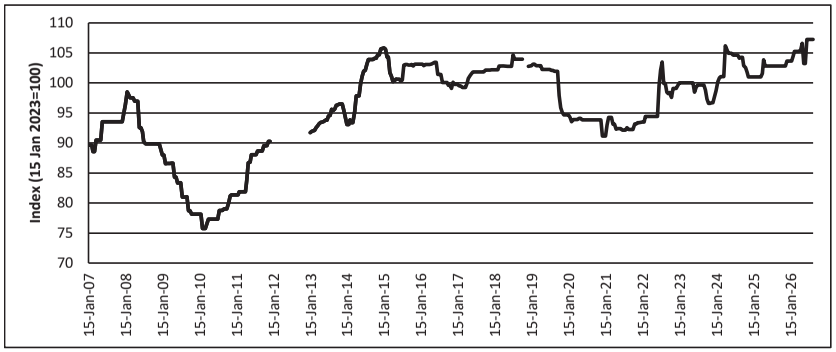


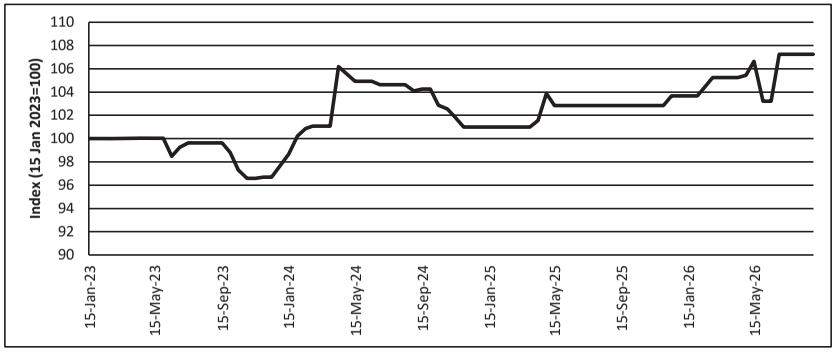
* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-2. Tropical Sawnwood Price Indices

4–2–a. West Africa sawnwood average export price index*

The index is based on two-weekly nominal euro prices/m^3 of ayous, bilinga, iroko, moabi, movingui, okoumé, padouk, khaya, sapele and sipo sawnwoods (first and second grades).
Source: the ITTO Tropical Timber Market Report.

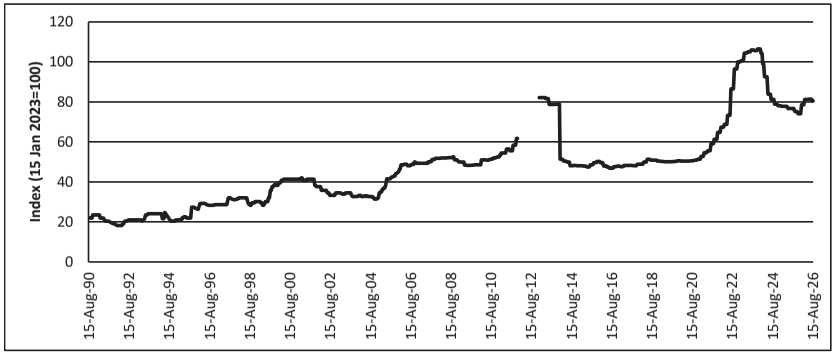


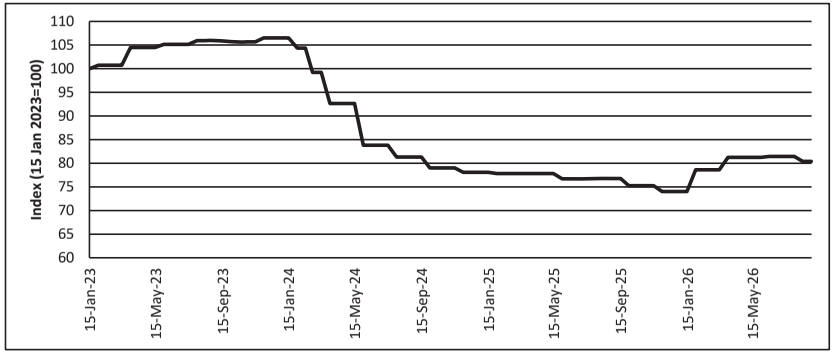


* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4–2–b. Brazil sawnwood export price index*

The index is based on two-weekly nominal dollar prices/m^3 of jatoba sawnwood.
Source: ITTO Tropical Timber Market Report.



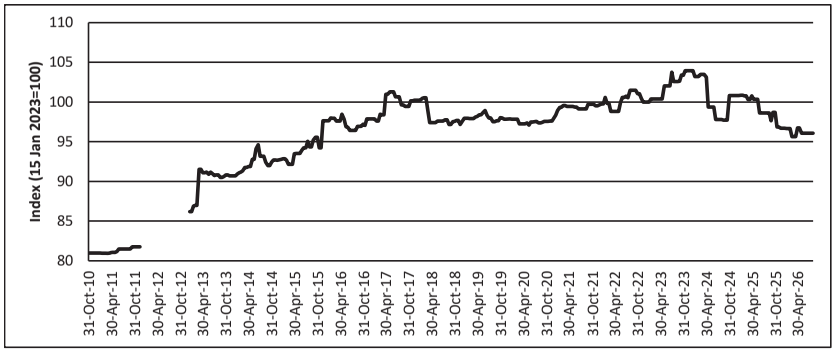


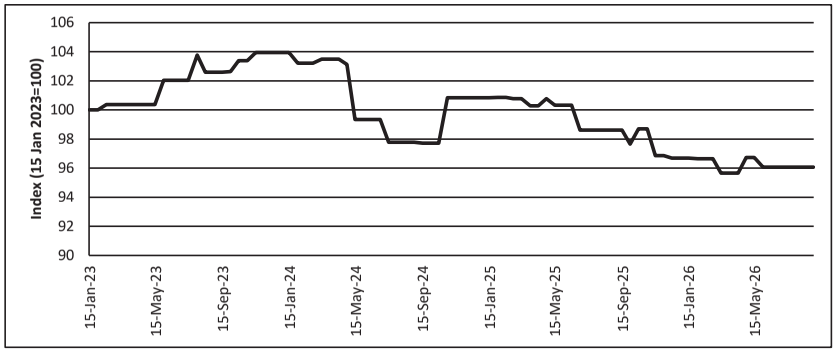
*Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-3. Tropical Plywood Price Indices

4–3–a. Ghana plywood average export price index*

The index is based on two-weekly nominal euro prices/m^3 of plywood made of ceiba (BB/CC grades 4/6/9/12/15/18mm), ofram (BB/CC grades 4/6/9/12/15/18mm) and asanfina (BB/CC grades 4/6/9/12/15/18mm).
Source: ITTO Tropical Timber Market Report.

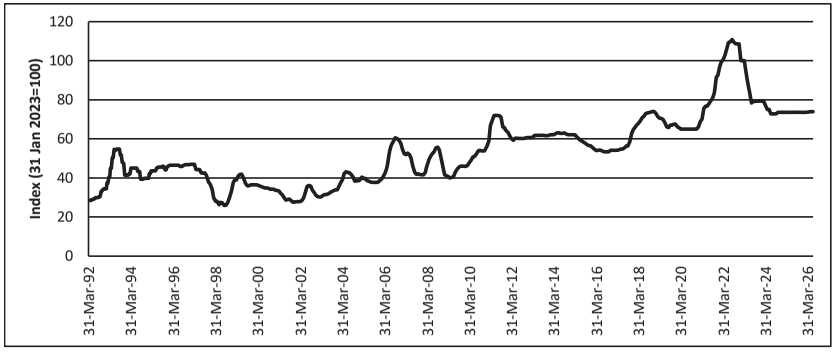


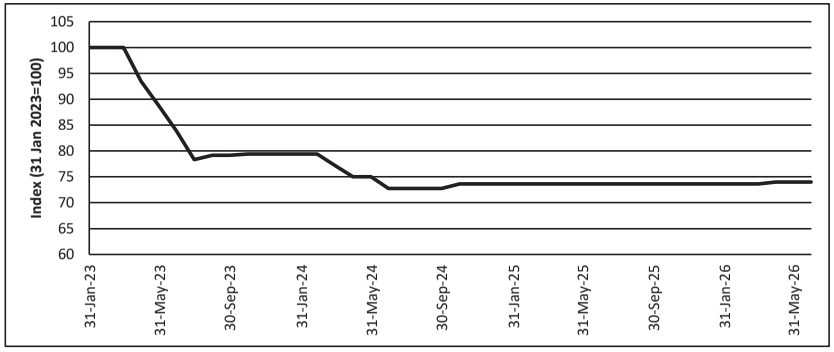


* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4–3–b. Japan Indonesian plywood average import price index

This index is based on two-weekly nominal dollar prices/m^3 of Indonesian panels for concrete formwork (12 mm 3'X6' JAS C&F), Indonesian floor bases (3'x6' JAS C&F) and Indonesian thin panels (3'x6' JAS C&F).
Source: Japan Lumber Reports.

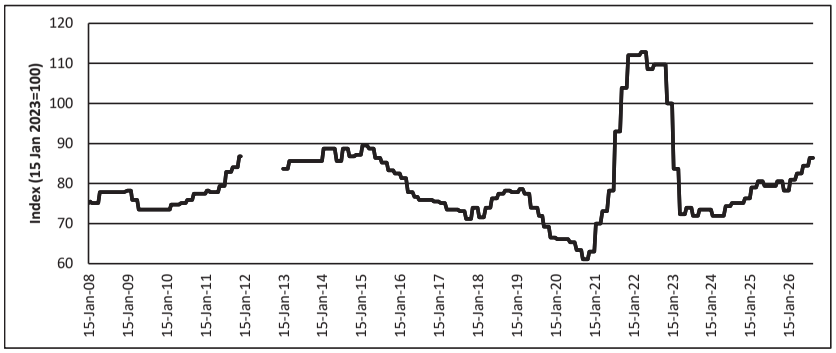


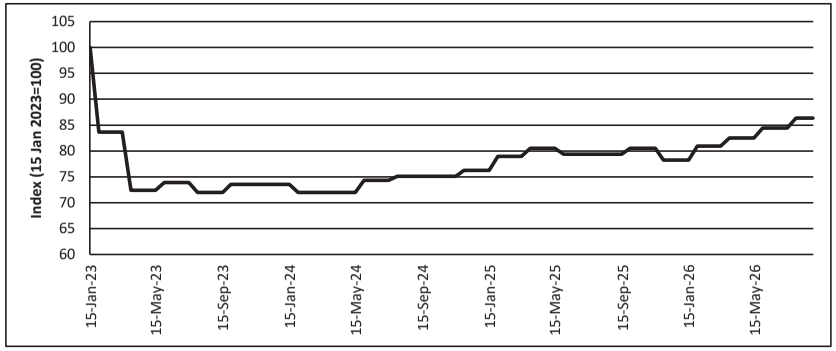


4-4. Softwood Sawnwood and Plywood Price Indices

4–4–a. Brazil pine sawnwood export price index*

The index is based on two-weekly nominal dollar prices/m^3 of pine (kiln dried) sawnwood.
Source: ITTO Tropical Timber Market Report.

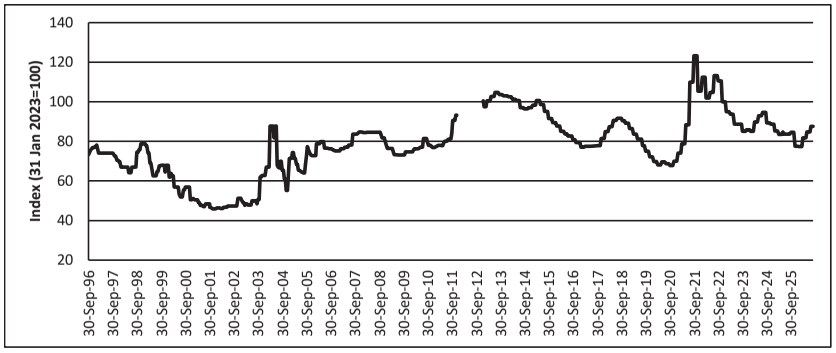


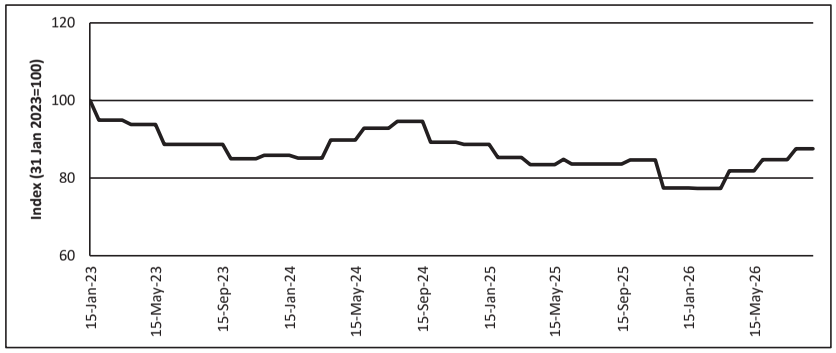


* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4–4–b. Brazil pine plywood export price index*

The index is based on two-weekly nominal dollar prices/m^3 of 9mm, 12mm, 15mm and 18mm pine plywoods (C/CC grades, water and boil proof) exported to the EU market.
Source: ITTO Tropical Timber Market Report.





* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.
