Green Tropical Timber Supply Chains

-Legality, Sustainability, Profitability -

Executive Director
Gerhard Dieterle

World IUFRO Congress , Session C3d

**Global supply chains as a driver for sustainable forest
management in the tropics**

Curitiba, Brazil, October 1, 2019

**SUSTAINABLE
DEVELOPMENT GOALS**
17 GOALS TO TRANSFORM OUR WORLD

— GLOBAL —
FOREST
— GOALS —

INTERNATIONAL TROPICAL TIMBER ORGANIZATION (ITTO)

The International Tropical Timber Organization (ITTO)

ITTO is an intergovernmental organization promoting the sustainable management and conservation of tropical forests and the expansion and diversification of international trade in tropical timber from sustainably managed and legally harvested forests.

ITTO:

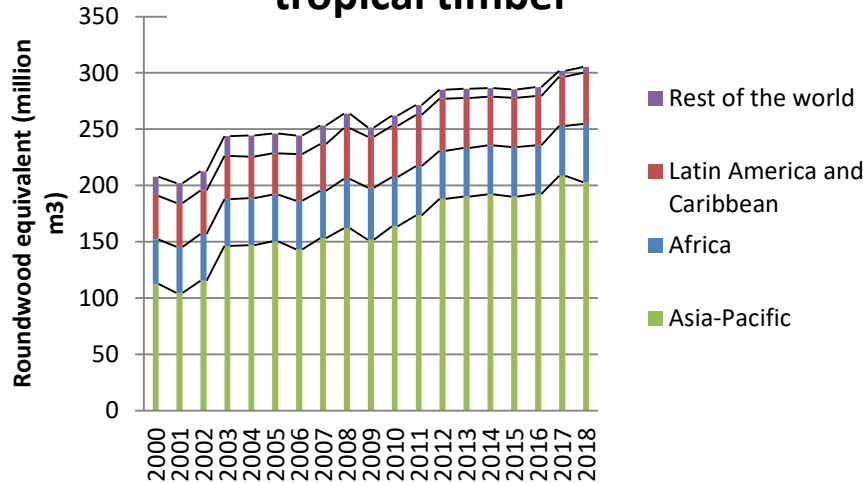

- Develops internationally agreed policy guidelines and norms to encourage sustainable forest management (SFM) and sustainable tropical timber industries and trade.
- Assists tropical member countries to adapt such guidelines and norms to local circumstances and to implement them in the field through projects and other activities.
- Collects, analyzes and disseminates data on the production and trade of tropical timber.
- Promotes sustainable tropical timber supply chains.
- Helps develop capacity in tropical forestry.

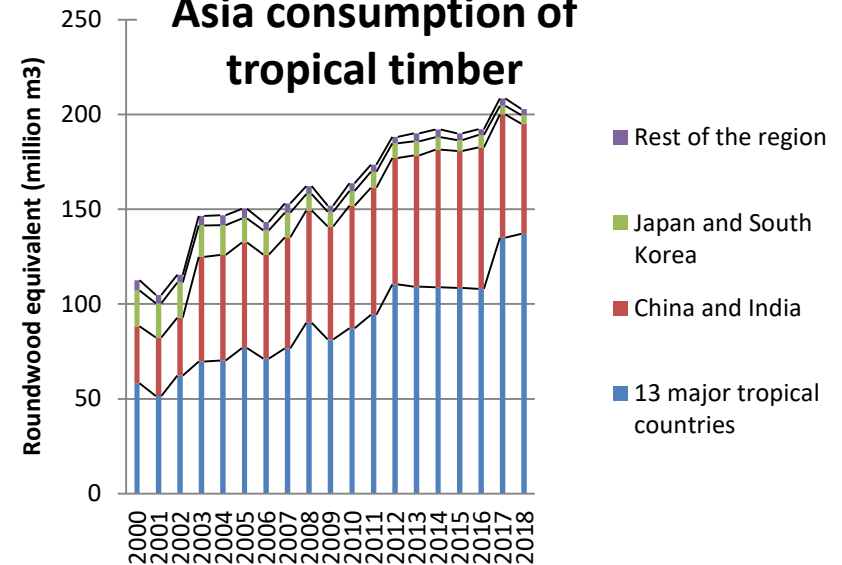

Consumption of world industrial tropical timber

World consumption of tropical timber

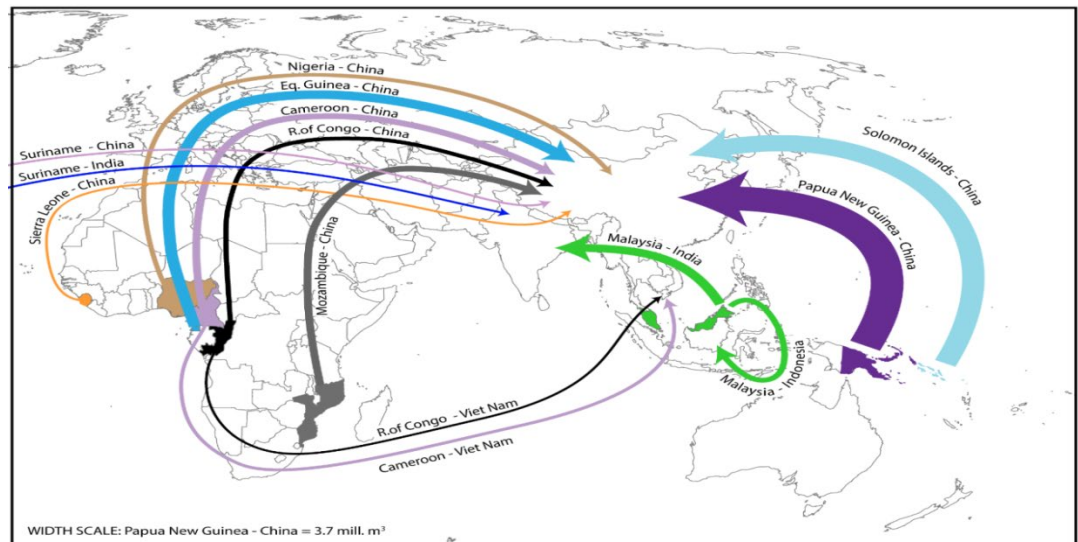

Asia consumption of tropical timber

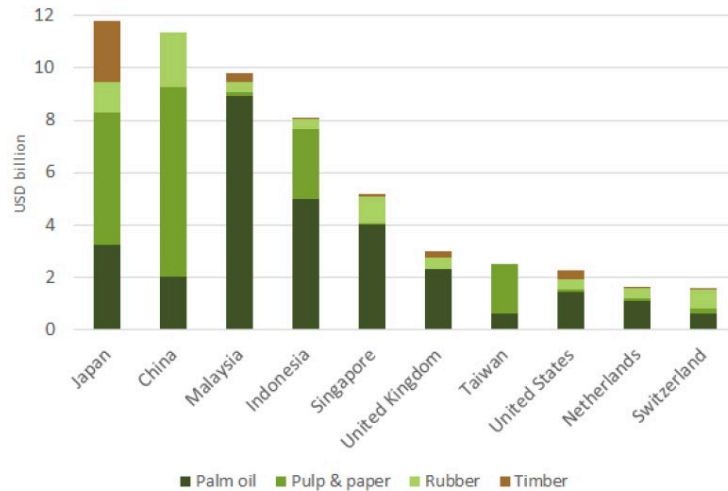

Major Trade Flow of Tropical Industrial Roundwood

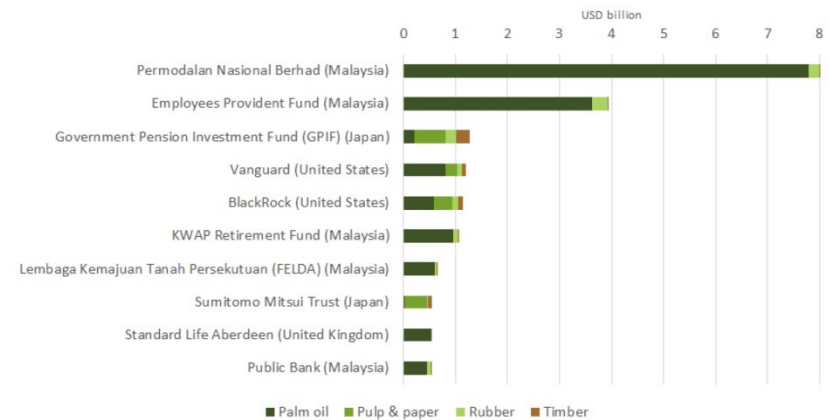

Import volume of all ITTO member countries totaled 17.7 million m³ in 2018

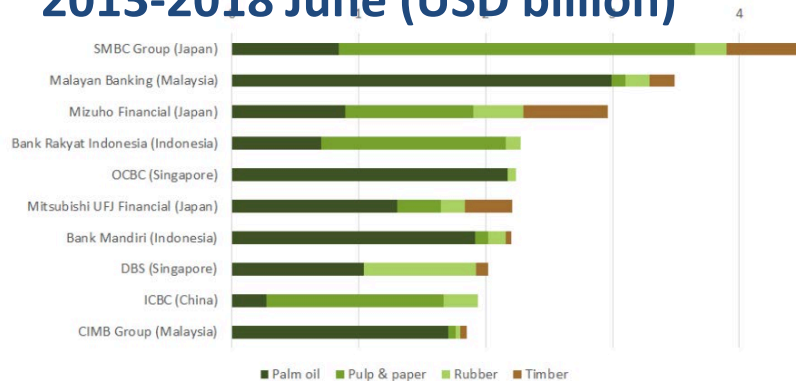

Loans & underwriting by investor country and sector, 2013-2018 (June) USD billion

Japan among Top 10 Bondholders & Shareholders, July 2018 (US\$ Billion)

Top 10 Creditors & Underwriters, 2013-2018 June (USD billion)

Source: Rainforest Action Network, TUK Indonesia & Profundo via the Forest & Finance organization

Tropical forest degradation: geography of carbon density change

- Tropical forests are a **net release of carbon** of $425.2 \pm 92.0 \text{ Tg C yr}^{-1}$ (losses of $861.7 \pm 80.2 \text{ Tg C yr}^{-1}$ and gains of $436.5 \pm 31.0 \text{ Tg C yr}^{-1}$ from forest growth)
- Losses result from (i) deforestation and (ii) reductions in carbon density within standing forests (**degradation**) accounting for **68.9%** of overall losses

A. Baccini et al. Science 2017;science.aam5962

Africa: hungry for food, fuel, fiber and wood

Global population by region

2017

Global population
7.55 billion

2100 (projected)

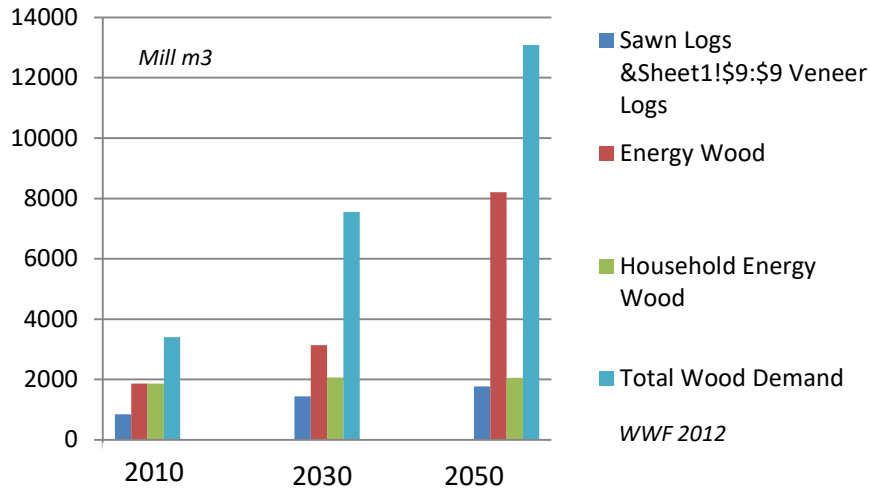

Global population
11.18 billion

Increasing global wood demand

Increasing global demand for wood

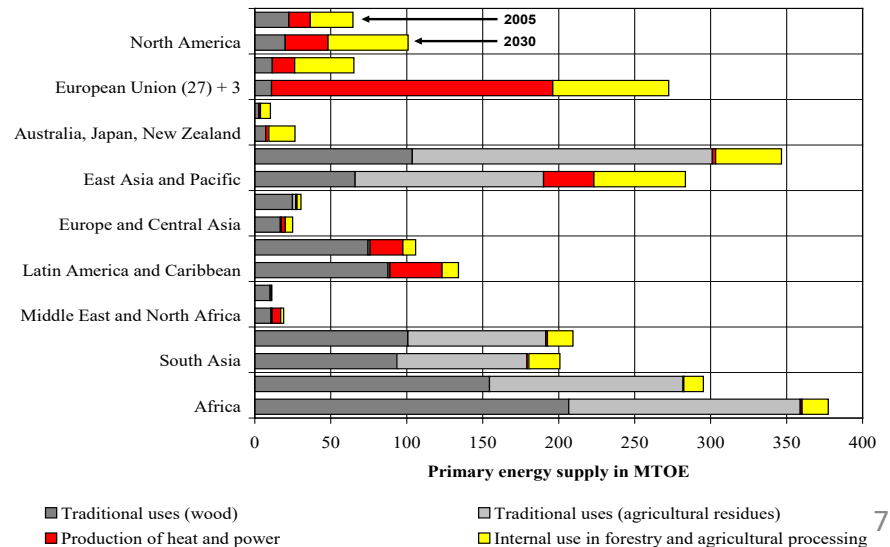

Increasing Gap for Industrial Roundwood

Demand in woodfuel and charcoal continues to increase

- 2.8 billion people will depend on traditional fuels in 2030
- Massive increase in demand for energy wood in industrialized countries

Projected HWP supply gap in 2040 under current conditions

Note: HWP = harvested wood products; m = meter.

Employment benefits of the Green Growth Scenario

Note: FTEs = full-time equivalent workers.

Mitigation potential of Green Growth/Bio-economy Scenario

Note: HWP = harvested wood products; t CO₂ e = tons of carbon dioxide equivalent.

The forgotten component in REDD+:

Substitution

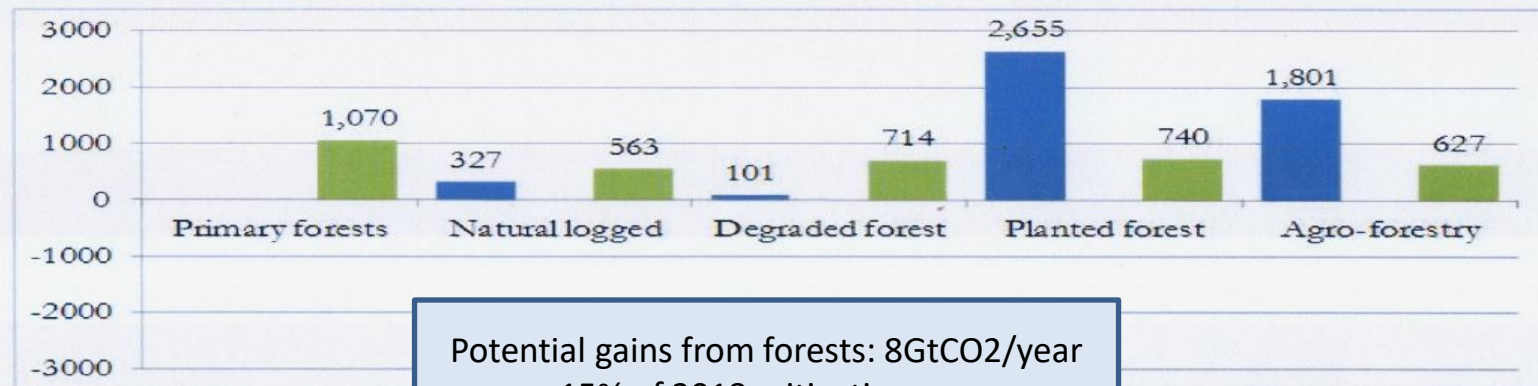

*Fossil Fuel Substitution, Deforestation and Degradation, and Forest Carbon Storage in 2010 and 2050
(million tons carbon per year)*

2010

2050

Potential gains from forests: 8GtCO₂/year
15% of 2018 mitigation gap

Multiple wins from sustainable forest supply chains

- Economic growth
- Poverty reduction
- “Wood security”
- Additional climate mitigation benefits: Emission reduction + Co2 removals+ substitution + storage:
 - Potential is up to 8GtCO₂/year, however accounting of substitution benefits unclear
- Increased environmental/biodiversity benefits
- Global water regime: *Rivers in the Sky*

Ingredients for Legal and Sustainable Supply Chains and good Forest Governance

Incentives and Finance

Access to Information & Data

Rule of Law/ Rights/Justice

Human Capacity

Financial Incentives

(e.g. soft loans and grants, taxes, access to finance)

Administrative Incentives

(e.g. extended permitting, favourable thresholds for obligations)

Reputational Incentives

(e.g. voluntary certification, voluntary disclosure, natural capital accounting)

- Remote sensing
- Mapping
- Planning tools
- Information management systems
- Timber tracking
- DNA finger printing
- International Data networks
- Verification/ Certification systems
- Market data

- Law enforcement (FLEG)
- Eliminating corruption & informality
- Access to resources
- Land rights
- Gender equity
- International rules (CITES)
- Fair “rules of the game”

- Education
- Training
- Knowledge
- Infrastructure
- Income
- Health
- Security

Key International Instruments and Processes

- **Sustainable Development Goals (SDGs)**
- **Paris Agreement – Nationally Determined Contributions (NDCs)**
- **European Timber Regulation (EUTR)**
- **EU Forest Law Enforcement and Trade Initiative and Voluntary Partnership Agreements (FLEGT/VPAs)**
- **US Lacey Act**
- **Japan Clean Wood Act**
- **Australia ...**
- **Korea...**
- **China Global green Supply Chain Platform**
- **Forest Stewardship Council (FSC)**
- **Program for the Endorsement of Forest Certification (PEFC)**
- **National Certification Schemes**
- **.....**

Legal and Sustainable Supply Chains – a complex task

International and National Legality and Sustainability Frameworks

SDGs, UNSPF, National Policies, Intl. Agreements, Proofs of Legality (Certification Schemes, Timber Tracking Systems,,)

Role of ITTO & Partners

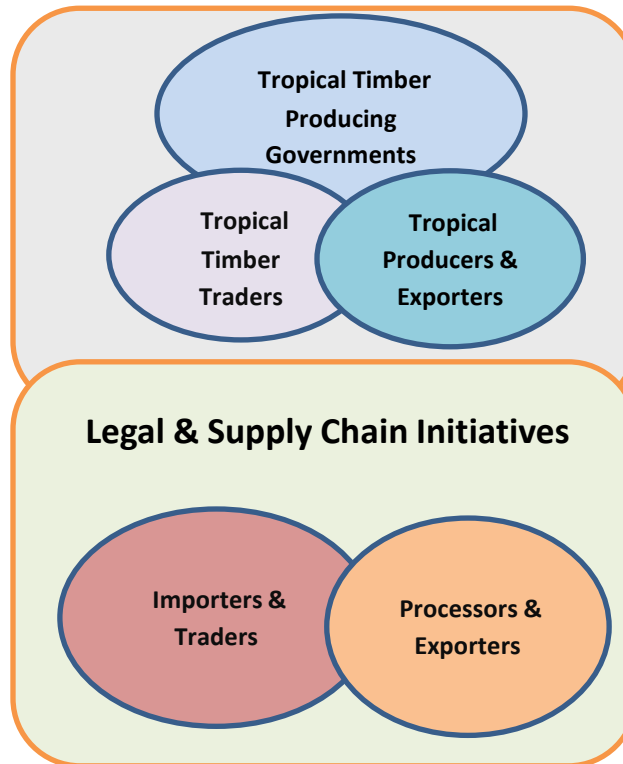

Policy & Regulatory & Institutional Frameworks, Capacity Building , Analysis,

Market Information, Guidelines, Capacity , Building & Training Field Projects, Access to Markets

Data Base, Intl. Connectivity, Expert Advice, Market Monitoring, Capacity Building & Training

Market Information, Intl. Outreach Capacity Building, Networks

Analysis, Information, Monitoring ...

Demand for legal and sustainable products

**National, Regional and International Markets;
Consumers ; Advocacy Groups**

Consumers ; Advocacy Groups

International Forum: **Together** Towards Global Green Supply Chains

22–25 October 2019, Shanghai & Huzhou, China

The forum will convene about 300 companies:

- highlighting the **importance of legal and sustainable wood products supply chains**
- **seeking commitment** from industries and governments
- promoting the **establishment of a joint platform**
 - to facilitate business information
 - exchange and collaboration between wood product producers, buyers, processing industries and wood product market representatives nationally and internationally.
