FIFTY-SIXTH SESSION
9–13 November 2020
Yokohama, Japan

**ELEMENTS FOR THE BIENNIAL REVIEW AND ASSESSMENT
OF THE WORLD TIMBER SITUATION
2019-2020**

D R A F T

Figures not to be released until reviewed by Members. Due to document reproduction constraints, only one copy per delegation if this report is being distributed. Please ensure that the appropriate personnel on your delegation or in your country obtain access to it in order to facilitate data checking.

Due to late and incomplete/incorrect inputs from members, many of the data included here are provisional and subject to revision in an on-going process of review prior to final publication. Lack of data also means that textual/analytical sections of this Review need to be updated/completed when data and/or clarifications are received. Members should ensure that the figures contained herein are checked by appropriate personnel and any revisions submitted to the Secretariat by 31 January 2021. The final version of the 2019-2020 Biennial Review will be published in June 2021 and until that time none of the material contained in this document should be re-published or otherwise disseminated due to its provisional nature.

This draft document is for consideration of the International Tropical Timber Council at its Fifty-Sixth Session. The figures and analyses presented here are subject to revision by Council and should not be quoted or otherwise disseminated prior to the release of the final version of this document in June 2021.

The designations employed and the presentation of material in this document do not imply the expression of any opinion whatsoever on the part of the International Tropical Timber Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Document ITTC(LVI)/10. International Tropical Timber Organization.
Yokohama, Japan. Prepared by the Division of Trade and Industry, ITTO.

TABLE OF CONTENTS

(pagination to be finalized in the final version)

1. Summary	1
2. Table 1: Production and Trade of Timber, 2016-2020.....	14
3. Table 2: Direction of Trade, 2019.....	94
4. Table 3: Price Indices.....	98
5. Table 4: Trade in Secondary Processed Wood Products, 2013-2020	104

Forecasts for the data marked CI or CRI for the year 2020 are based on annualized COMTRADE data for the first six months of 2020. The Joint Forest Sector Questionnaires collected in 2019 and 2020 are the main sources of the appendices. Other sources are indicated by the superscripts after the figures.

ITTO SUPERSCRIPTS

C	COMTRADE database.
CB	COMTRADE mirror statistics from COMTRADE database.
R	Figure rounded down to zero.
X	Repeated data.
I	ITTO estimate.
X	Repeated data.
*	Other unofficial data including country statistical reports, trade journals, ITTO project reports, USDA Foreign Agricultural Service reports.
W	Adjustment from weight (usually metric tons) to volume assuming the following factors (unless different conversion factors are reported): coniferous logs – 1.43m ³ /ton; non-coniferous tropical logs – 1.37m ³ /ton; non-coniferous non-tropical logs – 1.25m ³ /ton; coniferous sawnwood – 1.82m ³ /ton; non-coniferous sawnwood – 1.43m ³ /ton; veneer – 1.33m ³ /ton; plywood – 1.54m ³ /ton.
--	Data not available or impossible to calculate (i.e. divide by zero).

FAO SUPERSCRIPTS

F	FAOSTAT superscript. FAO official data.
F1	FAOSTAT superscript. Aggregate, may include official, semi-official or estimated data.
F2	FAOSTAT superscript. FAO estimate.
F3	FAOSTAT superscript. FAO unofficial figure.

UNECE SUPERSCRIPTS

E1	UNECE Superscript. Validated (supplied by official national correspondent and approved by secretariat analyst).
E2	UNECE Superscript. Official (from country, supplied by official national correspondent. Can be modified due to obvious errors [wrong units]).
E3	UNECE Superscript. Estimated-analyst (an educated estimate made by secretariat based upon knowledge and nonofficial sources).
E4	UNECE Superscript. Calculated, exclusively generated by Microsoft Access program for aggregates (both regional and product) and special calculations (e.g. consumption).
E5	UNECE Superscript. Repeated.
E6	UNECE Superscript. Not Published but counted in totals.
E7	UNECE Superscript. Provisional (a very rough estimate by the UNECE secretariat).
E8	UNECE Superscript. Estimated-technical (an estimate based on technical validation rules to make the data fit).
E9	UNECE Superscript. National estimate (unofficial data provided by official source).
TCF	UNECE Timber Committee Forecasts.
ITCF	ITTO Secretariat estimates based on TCF.

[This section is dependent on data provided by members on their production and trade of tropical timber. It will be updated and finalized when sufficient data and clarifications are received from members.]

SUMMARY

This Review provides data on production and trade of tropical forest products and the status of tropical forests in ITTO member countries, as well as an overview of production and trade statistics of all timber products in these countries. Data are presented up to and including 2020, based on estimates made in the third quarter of that year. However, these estimates should be viewed with caution due to the poor or missing data provided by many countries, and the uncertainty about the medium and long-term impacts of the COVID-19 pandemic on global production, markets, and trade. The base year for analysis is 2019 as this is the latest year for which reliable data for most countries were available at the time of preparation. Statistics comparing tropical to all primary wood product production and trade, by volume and value, for 2019 and 2020, are given in Tables 1.1 and 1.2 for the 74 ITTO members (including the EU-28) and for the world. Secondary processed wood products (SPWPs) are not differentiated in trade statistics by species or source of raw materials. Tables 1.3 and 1.4 provide SPWP trade by value for 2019 and 2020 for all SPWP trade which includes both tropical and non-tropical wood raw materials for many countries.

Primary Wood Products Production

In the first half of 2020, the COVID-19 pandemic triggered a severe economic recession which brought about a collapse in global trade volumes and values in the first two quarters of 2020 due to the spread of the virus, the resulting lockdowns, production stoppages, and disruptions in global value chains (IHS Markit 2020). To date, the impacts of the pandemic on wood products production, consumption and trade have been varied, depending on the severity of the pandemic in individual countries and the steps taken by individual countries in controlling and mitigating the virus. Demand levels in major tropical wood product markets have been unpredictable during 2020, and have been dependent on underlying economic conditions before the onset of the pandemic, and the success of individual countries' policy responses to the virus. Primary wood products production and trade estimates for 2020 are therefore considered tentative given the continued uncertainty about the duration, severity and distribution of the virus and the lag in data reporting. Although the IMF is predicting a less pessimistic outlook for the global economy than was first predicted, the outlook for 2021 remains highly uncertain (IMF 2020).

Production of tropical industrial roundwood (logs) in ITTO producer member countries totalled 266.2 million m³ in 2019, with Indonesia, India, Viet Nam, Brazil, and Malaysia accounting for about 75 per cent of total production. Production in 2020 is estimated to decline to 259.3 million m³, in response to restrictions imposed in most producer countries in response to the pandemic. In the first half of 2020, these restrictions had reduced harvesting operations and freight capacity although by mid-2020, labour and logistical restrictions had eased in many producer countries. In the African region, the pandemic had not significantly affected supply logistics although shipping costs remained relatively high. However, the lack of reporting on production of tropical logs and other primary wood products by most of the major ITTO producer countries continues to limit the quality of production data available. The bulk (76 per cent) of production continues to be in the Asia-Pacific region (Figure 1). Log production in Indonesia, the largest ITTO producer country, totalled 73.8 million m³ in 2019, although fully accurate trends are difficult to discern given the lack of availability of reliable data. The proportion of harvest from industrial plantations in many ITTO Asia-Pacific producer countries has continued to grow in recent years, while the availability of logs from natural stands has fallen.

ITTO producer exports (\$)	15 184.0	1 880.4	868.5	517.3	1 401.8

Note: "World" estimates include data for both ITTO member and non-member countries. Taiwan P.O.C. has been included in ITTO aggregates.

The proportion of tropical roundwood to total roundwood production in ITTO member countries was 18.2 per cent in 2019 and 2020, with ITTO member countries accounting for 85 per cent of world production of tropical logs. Significant non-ITTO producer countries include Nigeria, Uganda, Paraguay, Ethiopia, and the Solomon Islands. In the African region, a significant proportion of production (over 59 percent) is by non-ITTO member countries, whereas Asia-Pacific production is predominantly by ITTO members (98 per cent). Regional disparities in the rate of domestic conversion of primary products has continued, with Asia-Pacific and Latin America’s conversion of domestically produced logs to at least primary products averaging about 97 per cent and 94 per cent respectively in 2019 and 2020. By contrast, in the ITTO African region, 85 per cent of all logs produced were converted domestically into further processed products and the region continues to be more dependent on log exports than the other ITTO producer regions.

Tropical sawnwood production by ITTO members remained relatively stable in 2019 at 38.8 million m³ but is expected to decline in 2020 to 37.1 million m³ (Figure 2). In the first half of 2020, industry lockdowns in response to the virus had temporarily disrupted supply chains and impacted production operations in many producer countries (ITTO 2020a).

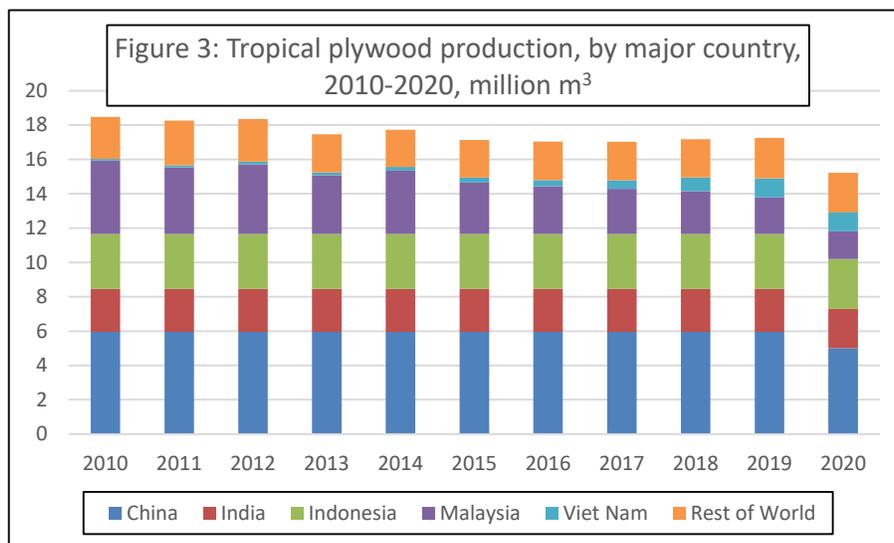

Regionally, Asia-Pacific, Latin America/Caribbean and Africa accounted for approximately 66, 13 and 14 per cent respectively of total ITTO tropical sawnwood production. In the African region, Cameroon, Gabon, Mozambique, Côte d’Ivoire, and Ghana each produced more than 500 000 m³ of tropical sawnwood in 2019, although a lack of reliable data on production in many of the African countries limits the analysis of discernible trends. Brazil accounted for about 46 per cent of production by Latin American producer

countries in 2019, while Ecuador, Peru, and Costa Rica were also important producers in the region. All other major ITTO producers were located in the Asia-Pacific region – Viet Nam, India, Thailand, Indonesia, and Malaysia (Figure 2). In 2020, Thailand’s rubberwood sector has reportedly been severely affected by declining demand in China and by logistical supply issues from China’s imposed measures to control COVID-19. In May 2020, 60 per cent of Thailand’s sawmills had reportedly ceased production and 40 per cent were operating at a minimum level (ITTO 2020b).

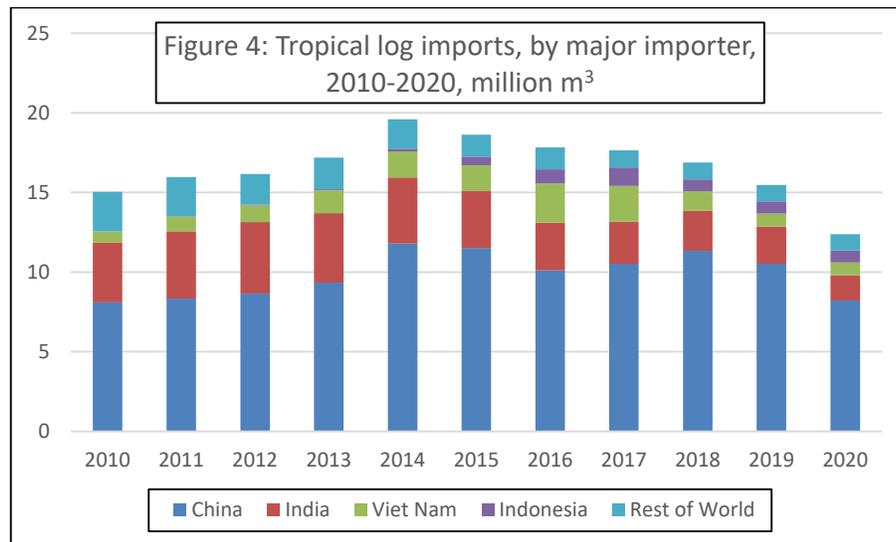

Production of tropical veneer in ITTO producer countries totalled 4.573 million m³ in 2019, with most production occurring in the Asia-Pacific (67 per cent) and African (23 per cent) regions. Viet Nam, Indonesia, Malaysia, and Gabon were the largest country producers in 2019, while Brazil, India, Ghana, and Côte d’Ivoire also produced significant quantities.

Tropical plywood production in ITTO producer countries increased slightly in 2019 to 10.7 million m³ and is estimated to drop to 9.6 billion m³ in 2020 (Figure 3). A significant proportion (about 56 per cent) of producer country production is exported and production is therefore more sensitive to market conditions in major importing countries (particularly Japan) than other tropical primary products. Substitution trends have affected production levels, with tropical plywood continuing to lose market share to temperate and softwood plywood and other lower cost alternative products. ITTO consumer countries’ tropical plywood production totalled 6.5 million m in 2019, a similar level to the previous year. China accounted for the bulk of production (91 per cent), based on imported tropical logs. China, Malaysia, Indonesia, India, and Viet Nam dominate tropical plywood production among ITTO countries (Figure 3), although both Indonesia’s and Malaysia’s production have continuously dropped in recent years, mainly due to reduction in logging quotas, crackdowns on illegal log flows that have restricted log availability for plywood production, and declining availability of logs of peeler quality. In 2019, China’s production levels were affected by new state environmental protection policies which forced mills to interrupt production to upgrade or replace emission and waste treatment technology. Relocation of plywood production facilities to other producer countries such as Viet Nam had also occurred to reduce production costs and avoid prohibitive tariffs imposed by the USA on some Chinese plywood imports.

Primary Wood Products Imports

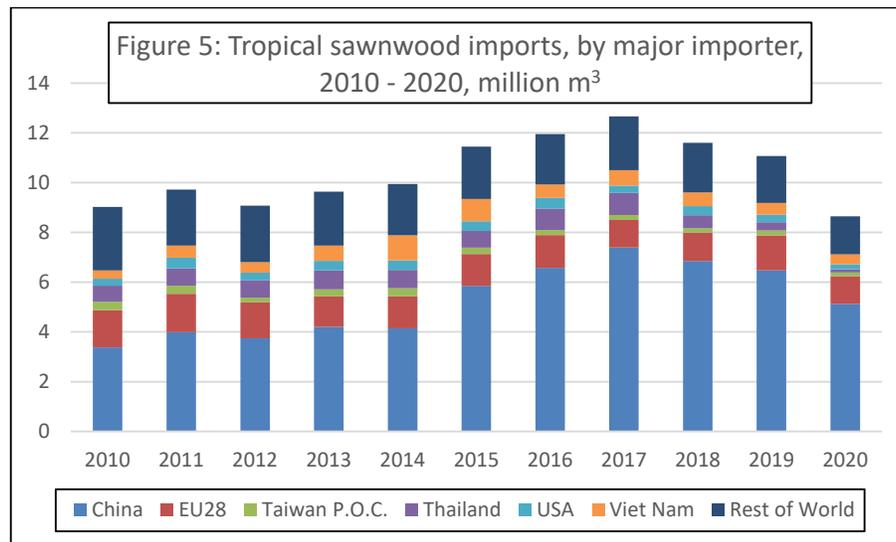

Tropical log imports by ITTO members have declined year-on-year since 2014, when demand in China was at a peak, dropping to 15.3 million m³ in 2019 and expected to decline significantly (by 20 per cent) in 2020 to 12.3 million m³ (Figure 4). The global tropical log trade continues to focus on two major markets – China and India – which together accounted for 84 per cent of tropical roundwood imports in 2019. The major directions of the global tropical log trade in 2019 were from Papua New Guinea and the Solomon Islands (not an ITTO member) to China, from Malaysia to India and Indonesia, and from Cameroon to Viet Nam. Most of the remaining exports were from the African region to China and Vietnam.

China continues to be the most important market in the tropical log trade, accounting for nearly 69 per cent of ITTO tropical log imports in 2019 but imports are expected to contract by nearly 20 per cent in 2020 in response to restricted supply of raw materials, increased freight rates, a reduction in processing activities in the first quarter of 2020, and an ongoing reduction in demand for processed wood products in export markets. However, with COVID-19 effectively controlled in the first quarter, the economy has been recovering more strongly than other consumer countries. Measures to rebuild the economy have led to a rebound in construction activity and a resumption in manufacturing activities although the market situation for China's processed wood products exports remains volatile and uncertain. In 2019, Papua New Guinea and the Solomon Islands were China's major tropical log suppliers, together accounting for 57 per cent of China's imports, but there were also significant supplies from Mozambique, Equatorial Guinea (not an ITTO member), Republic of Congo, Cameroon, and Brazil. In recent years, China has become less reliant on Southeast Asian log supplies as their availability has declined, diversifying its tropical supply sources to the African region, even though a number of exporters have full or partial logging and log export bans in place.

India's tropical log imports have been trending downwards since 2012 and are predominantly of tropical origin (55 per cent). Imports are expected to contract by nearly one-third year-on-year in 2020 in response to a significant contraction in India's economy. The construction sector has been severely affected by the pandemic, resulting in significant shutdowns in wood processing facilities. India's imports from Malaysia, the major supplier, have continued to drop sharply and amounted to 0.6 million m³ in 2019. India's tropical log supply sources reflect a strong preference for teak from natural stands, although import demand for durable hardwood substitutes and plantation teak have grown. Imports from Myanmar, previously a major tropical log supplier, had plunged to minimal levels following the imposition of a log export ban in April 2014. Other important suppliers to India in 2019 were Ghana, Suriname, Ecuador, and the Solomon Islands.

The bulk of the global tropical sawnwood trade (83 per cent of imports and 65 per cent of exports) lies within the Asia-Pacific region. China, Viet Nam, India, and Thailand are the major country importers, with EU28 countries, USA and Taiwan P.O.C. also important markets (Figure 5). Thailand and Malaysia are the major exporters. African suppliers – particularly Gabon and Cameroon - are also important in the trade. Total ITTO imports of tropical sawnwood have been contracting year-on-year since reaching a peak in 2017, and totalled 10.2 million m³ in 2019. The tropical sawnwood trade was only a small proportion by volume (about 7 per cent) of the total sawnwood trade (tropical and non-tropical). China's import growth has driven the global growth in tropical sawnwood imports in recent years, and it remains the largest country importer by a large margin, absorbing over 63 per cent of ITTO tropical sawnwood imports in 2019.

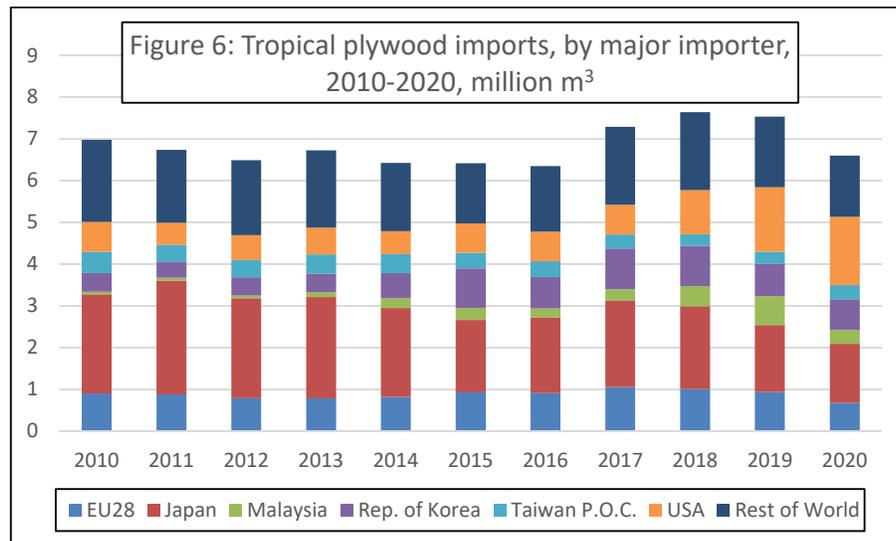

Although China's imports of coniferous and temperate hardwood sawnwood increased in 2019, overall tropical sawnwood imports declined and totalled 6.5 million m³. Over 60 per cent of China's import volume in 2019 was sourced from Thailand and was predominantly rubberwood. Gabon, the Philippines, Indonesia, Malaysia, Indonesia, and Cameroon were also important suppliers although there were significant discrepancies in the trade volumes reported by Thailand and Indonesia compared with those reported by China. While China's imports from Thailand are predominantly of lower value rubberwood, Africa's supplies are mainly of high value specialty timbers for the high-end market. In 2020, China's imports are expected to contract by 21 per cent to 5.1 million m³, with supply dampened by COVID-19 related supply issues in China and supplying countries, and with export-oriented furniture enterprises being dependent on demand recovery in major export markets, particularly the United States.

The global trade in tropical plywood has continued to fluctuate, with world imports dropping to an historic low of 6.3 million m³ in 2016, but increasing year-on-year to 2018 before declining in 2019 to 7.5 million m³ (Figure 6). The trade continues to be dominated by a few major players. Japan accounted for 31 per cent of ITTO imports in 2019. Although Japan has dominated global imports until 2019, the USA is expected to become the largest importer in 2020. Japan's imports of tropical plywood declined significantly (by 19%) in 2019 to 1.6 million m³ due to weaknesses in the Japanese economy which were evident before the onset of the COVID-19 epidemic. In the fourth quarter of 2019, Japan's GDP dropped by an annualized 7.4 per cent, driven by a collapse in private consumption, the result of an increase in consumption tax and the impact of natural disasters in October 2019. While Japan's tropical plywood demand had stagnated, supplies from Indonesia and Malaysia, the major sources of tropical plywood supply, had declined and the share of domestically produced plywood continued to increase, reaching 55 per cent of Japan's plywood demand in 2019.

Japan's tropical plywood imports have also been affected by considerable market substitution by domestically produced softwood plywood and other panel products. There has been considerable re-investment in Japanese plywood processing in recent years, using domestic species. The demand shift to domestic plywood has been in response to the relatively high prices and reduced availability of Southsea plywood, the risk of exchange rate fluctuations which affects imported plywood but not Japanese plywood manufactured from domestic materials, government incentives for the use of domestic raw material, and consumers' concerns about the environmental consequences of using tropical hardwoods. In 2020, construction activity slowed significantly in the second quarter but picked up in the third quarter, although imports are expected to continue to decline to an historic low at 1.4 million m³. Future market uncertainty has also resulted in buyers being reluctant to risk commitments to high-priced tropical hardwood plywood so that current trends are expected to continue.

Growth in US imports of tropical plywood has accelerated since 2017. The USA accounted for 24 per cent of ITTO tropical plywood imports in 2019, with the major suppliers being Viet Nam (36 per cent),

Indonesia (26 per cent), and Malaysia (9 per cent). Most of the remainder was supplied by Cambodia, Brazil and Ecuador. China has previously been a major supplier of tropical plywood to the USA but the ongoing US-China trade dispute had resulted in anti-dumping and countervailing duties being imposed on certain hardwood plywood imports from China from April 2017, which were subsequently increased in 2018 and 2019. The relocation of some Chinese exporters to Viet Nam and other producer countries, and the subsequent surge in US imports of tropical plywood from Viet Nam, has resulted in the U.S. Department of Commerce initiating an inquiry into whether imports of hardwood plywood completed in Vietnam, using components from China, are circumventing the existing antidumping and countervailing duty orders on hardwood plywood from China (US Department of Commerce 2020). In contrast to other major importing countries, US tropical plywood imports continued to rise in 2020, driven by a surge in housing starts and renovations following the first wave of COVID-19. Imports are expected to reach 1.6 million m³, although the outlook for 2021 remains uncertain.

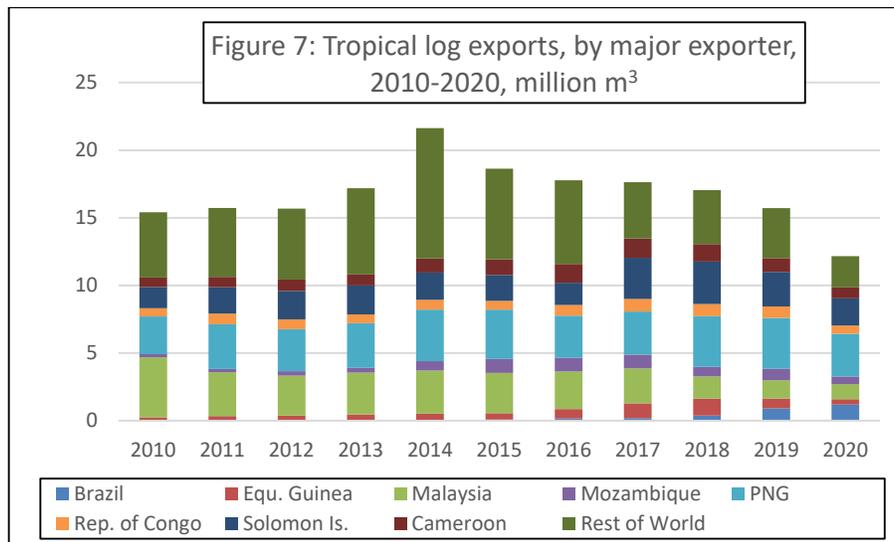

Primary Wood Products Exports

In 2019, ITTO producer members exported 11.3 million m³ of tropical logs which was about the same level as the previous year. World exports amounted to 15.7 million m³, dropping 8 per cent year-on-year, with the Solomon Islands and Equatorial Guinea, the major non-ITTO exporters, accounting for most of the decline (Figure 7). Their exports had dropped by 42 percent and 19 percent respectively over the period. Papua New Guinea, which has been the largest ITTO exporter since 2011, shipped 3.8 million m³ in 2019, the same level as the previous year, with the bulk of the volume (over 99 per cent) destined for China. The government of PNG imposed log export duties in February 2020 and intends to reduce log export volumes by half by 2025, with log exports to cease by 2030 (The National 2020). If implemented, PNG's log exports can be expected to progressively decline over the next decade.

Malaysia's exports have been trending downwards over the last 10 years, reflecting restrictions in availability of tropical roundwood, a log export ban in the State of Sabah, log export restrictions in Sarawak, and crackdowns on illegal logging and corrupt trade practices. Exports have progressively declined year-on-year since 2014, dropping in 2019 to 1.4 million m³, the lowest recorded volume in ITTO's statistical records. In 2020, exports are expected to decline further to 1.1 million m³ due to COVID-19 related working restrictions and reduced demand in India, the major market. Malaysia's major log customers are all in Asia, with India and Indonesia absorbing 43 per cent and 44 per cent respectively of Malaysia's reported log export volume in 2019. Taiwan P.O.C, Japan, Viet Nam and China accounted for most of the remainder.

Tropical log exports from the ITTO Africa region have been declining year-on-year from a peak in 2016 when demand had surged in China. Exports from the region amounted to 3.8 million m³ in 2019 and are expected to decline in 2020 by nearly one-third to 2.6 million m³. Cameroon, Republic of Congo, Mozambique and Ghana were the major ITTO exporters in 2019, with China, Viet Nam and India the major

export destinations. It is notable that non-ITTO member countries are also important tropical log exporters, with the Solomon Islands being the third largest world exporter of tropical logs, and Equatorial Guinea also exporting significant volumes (Figure 7). In 2020, African member countries have reported temporary production and trade stoppages in response to measures imposed to contain COVID-19, and reduced consumption in export markets. In the Republic of Congo, for example, although government support measures have been put in place for the forestry sector, the industry is expecting medium and long-term repercussions from measures taken to contain the virus (ATIBT 2020). Longer term exports from the region could also be impacted by a ban on log exports, if implemented, by member countries of the Congo Basin. The ban is due to be implemented from January 2022, although Gabon and Equatorial Guinea had already implemented bans in 2010 and 2019 respectively (TodayNewsAfrica 2020).

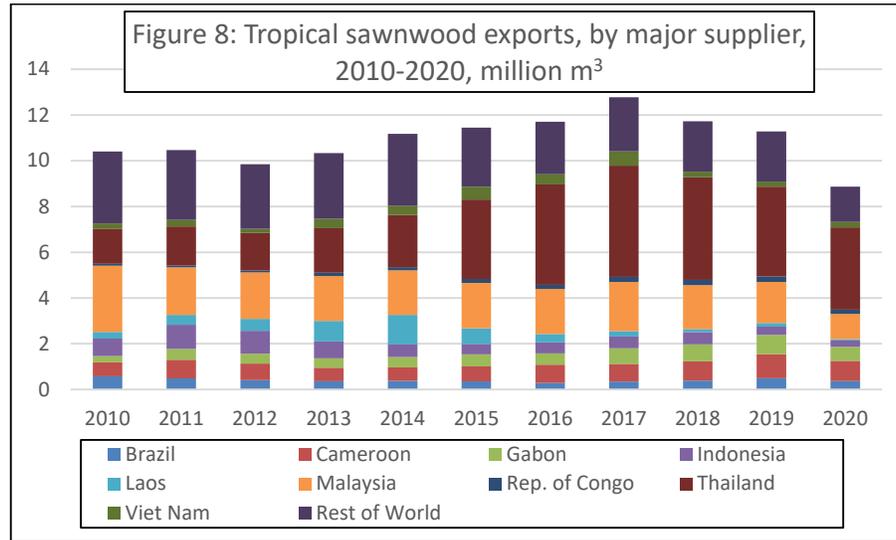

While tropical log exports from the Africa and Asia-Pacific regions have been trending downwards over the last 4 years, exports from the Latin American-Caribbean region have surged to 2.2 million m³ in 2019 and 2020, nearly twice the level in 2016. Most of the increase has been from Brazil, with exports totalling 0.9 million m³ in 2019 and 1.2 million m³ in 2020. Prior to 2018, Brazil's exports of tropical logs were negligible.

Tropical sawnwood exports by producer members in 2019 amounted to 10.8 million m³, down 4 per cent on the previous year (Figure 8). Over 65 per cent of exports (7.0 million m³) were from ITTO producer members in the Asia-Pacific region, with Thailand and Malaysia the major supplier countries. Thailand remains the top-ranking exporter of tropical sawnwood in 2020, most of which is plantation rubberwood. Exports continued to decline in 2019, dropping to 3.9 million m³ which was 13 per cent less than the previous year. The trend reflects demand in China's secondary processed wood products industries, which absorb over 99 per cent of Thailand's exports. In 2020, Thailand's rubberwood sector has been severely affected by declining demand in China and by logistical supply issues from China's imposed measures to control COVID-19. In May 2020, 60 per cent of Thailand's sawmills had reportedly ceased production and 40 per cent were operating at a minimum level (ITTO 2020d). Malaysia's exports in 2019 were mainly to China (16 per cent), Thailand (15 per cent) and the Philippines (9 per cent) although there were a significant number of other important markets. There continue to be significant discrepancies between the trade reported by major importers and exporters of tropical sawnwood in the Asia-Pacific region.

Tropical sawnwood exports from the African region have been increasing year-on-year since 2016 and reached 3.8 million m³ in 2019. The major exporters were Cameroon and Gabon, which together accounted for nearly three-quarters of ITTO Africa's exports. In 2020, African sawnwood exporters have also been affected by logistical issues in China, reporting severe restrictions in unloading imported sawnwood at some China ports, due to the strict measures to control COVID-19 (ITTO 2020b). Cameroon's exports have fluctuated because of supply-side problems, notably shipment delays caused by bureaucratic procedures, poor port infrastructure at Douala, the country's only major port and heavy rains in early 2020 (ITTO 2020c). The region's exports are expected to decline 24 per cent in volume to 2.0 million m³ in 2020. Tropical

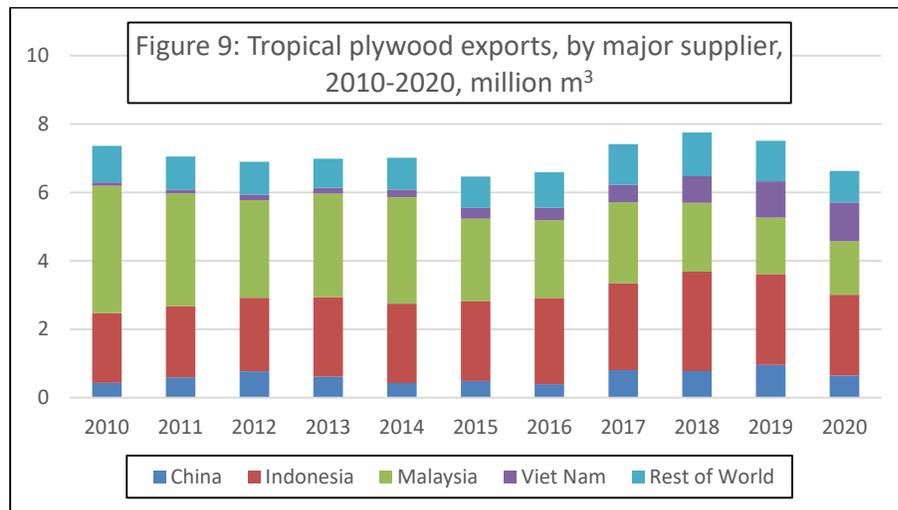

sawnwood exports from Latin America-Caribbean have fluctuated over the last 5 years and increased 18 per cent in 2019 to 787 000 m³. Brazil accounted for 63 per cent of the region's exports, Ecuador 14 per cent, and Peru 11 per cent.

Tropical plywood exports from ITTO producer countries declined in 2019 to 6.0 million m³ and are expected to decline slightly in 2020 to 5.6 million m³ (Figure 9). As in previous years, Indonesia and Malaysia were the dominant tropical plywood exporters in 2019, although Malaysia's exports continue to be affected by chronic log supply shortages, mainly due to policies to achieve sustainable forest management, in addition to logistical supply problems restricting peeler log supply to domestic plywood mills. In 2019, Southeast Asian plywood prices increased in response to rising raw material and manufacturing costs. Producers have been substituting species from natural stands with plantation-grown species such as eucalypts and acacias. Indonesia, Malaysia, Viet Nam and China accounted for 86 per cent of ITTO tropical plywood exports in 2019.

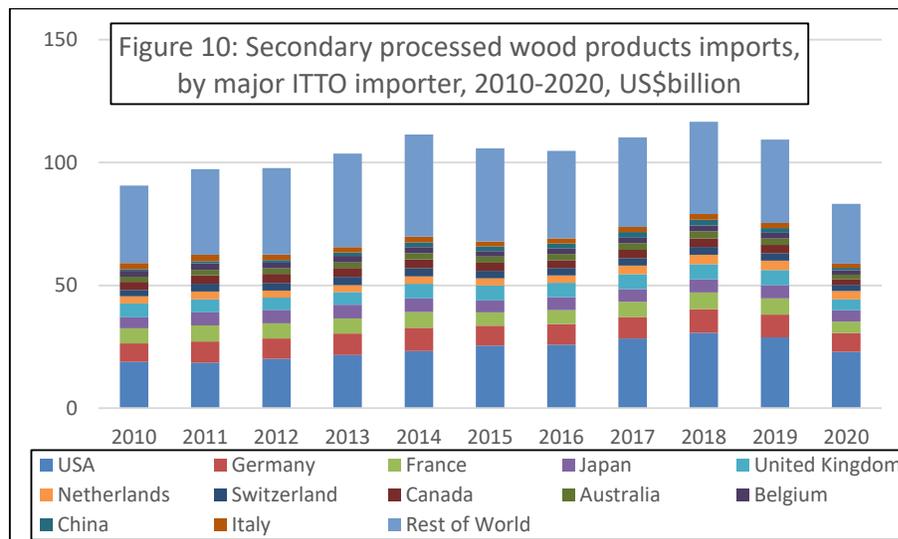

Indonesia's exports were predominantly to Asian destinations, notably Japan (31 per cent), Republic of Korea (17 per cent), Malaysia (7 per cent), and Taiwan P.O.C. (5 per cent), in addition to the USA (15 per cent) and a number of other market destinations, including Australia and EU markets. About half of Malaysia's exports have been to Japan with significant volumes also shipped to the Republic of Korea (10 per cent), USA (9 per cent), and Taiwan P.O.C. (6 per cent). In the first quarter of 2020, government responses to COVID-19 in Southeast Asian countries were impacting the tropical forestry and manufacturing sectors, including plywood. Production in Malaysia's forestry and timber sector had slowed drastically, although some states, such as Sarawak and Johor, had permitted scaled-down manufacturing operations (ITTO 2020a). In Indonesia, most wood industries were reportedly still operating but slowing production in response to a slowdown in export orders.

In contrast to the other major tropical plywood exporters, in 2019 Viet Nam's exports increased by 37 per cent on the previous year and are expected to increase to 1.1 million m³ in 2020. Viet Nam's exports were predominantly to the USA (53 per cent) and the Republic of Korea (29 per cent). The Republic of Korea is considering imposition of an anti-dumping duty on plywood imported from Viet Nam, claiming that prices are undercutting their industry, while the US Department of Commerce initiated a trade defence investigation for hardwood plywood originating from Viet Nam. The investigation of the origin of hardwood plywood products from Viet Nam is in response to observations that Viet Nam's exports to the USA had escalated in 2019, while China's exports had dropped significantly following the imposition of anti-dumping and anti-subsidy duties (Viet Nam News 2020).

Secondary Processed Wood Products Trade

The value of ITTO imports of secondary processed wood products (SPWPs) - nearly two-thirds of which comprises wooden furniture – totalled about US\$ 95.3 billion in 2019, which equates to about 5 per cent less than 2018. Imports had increased year-on-year from 2016 to 2018 (Figure 10). However, SPWP consumption and import trends have differed by country/region depending on a number of factors, including economic growth, housing demand, and shifts in relative manufacturing competitiveness. The bulk of the trade in SPWPs continues to be between ITTO consumer countries, which accounted for 78 per cent of ITTO exports and 96 per cent of ITTO imports by value in 2019. Wooden furniture and parts constituted about 63 per cent of global SPWP trade, followed by ‘other SPWPs’, builders’ woodwork and joinery, mouldings, and cane and bamboo furniture and parts. ITTO members accounted for the bulk of world trade in SPWPs in 2019, comprising 87 per cent of world imports and 91 per cent of world exports by value. ITTO member imports are expected to drop by over 21 per cent in 2020 to US\$74.9 billion, the lowest level since the global economic crisis.

Until 2018, US markets had driven overall growth in the value of ITTO imports of SPWPs, particularly of wooden furniture and parts. US imports of wooden furniture and parts grew year-on-year from 2011 to 2018, reaching \$22.0 billion in 2018, and comprising over 35 per cent of ITTO imports and 29 per cent of world imports. Growth in US demand was driven by growth in housing starts, lower unemployment and growing consumer confidence during that period. In 2019, imports dropped to US\$ 20.7 billion in response to persistent weakness in the US housing market, although housing starts picked up strongly in the second half of 2019. A significant proportion of US imports of wooden furniture was from ITTO producer countries –

Viet Nam, Malaysia, Mexico, Indonesia, India, and Brazil among others - in addition to China, the largest supplier. Imports from China and Viet Nam comprised 42 per cent and 36 percent respectively of US imports of wooden furniture by value in 2019, although imports from China dropped by 32 per cent in value in 2019 and were expected to plummet by a further 47 per cent in 2020.

Following the initial wave of the pandemic, US housing starts have recovered strongly in the third quarter of 2020 and they reached a seasonally adjusted annual rate of 1.415 million units by September 2020, 11.1 per cent more than the September 2019 rate (US Census Bureau 2020). In addition to new-building construction, home and office renovations and repairs are important demand drivers for builders' woodwork and joinery products. After almost a decade of sustained growth in spending on home-improvement projects, expenditure on home renovations and repairs in the USA slowed during the first shock from the pandemic but has bounced back with a surge in DIY and small project spending. The Leading Indicator of Remodeling Activity (LIRA) expects moderate growth in homeowner spending for improvements and renovations in 2021 (JCHS 2020).

The EU-28's SPWP imports increased year-on-year from 2015 to 2018 to reach US\$45.5 billion but dropped in 2019 to \$44.0 billion and are expected to decline in 2020 to \$34.8 billion. In euro values, however, the EU-28 imported the largest value of SPWPs since 2007, prior to the global economic crisis. EU-28 imports of wooden furniture comprised about 61 per cent of EU-28's SPWP imports in 2019. Imports of wooden furniture from outside the EU-28 only represent a small proportion (about 28 per cent) of EU furniture supply, although this is expected to increase to 31 per cent in 2020. A significant proportion of imports are from intra-regional suppliers, with Eastern European suppliers (Poland, Lithuania) playing an increasing role in European production and trade. Imports from extra-regional suppliers are mainly from China and ITTO producer countries – Viet Nam, Indonesia, Malaysia and India.

EU-28 countries' imports of wooden furniture from China, the largest extra-regional supplier, has generally trended downward since 2014 although imports picked up in 2019 as China's trade dispute with the USA escalated and China furniture exporters targeted alternative markets, including EU countries. Imports from the other major tropical suppliers had also been relatively static between 2015 and 2018 but rose sharply in 2019 in euro terms. Viet Nam, Indonesia and India have also been seeking to build on new investment in capacity and to diversify markets by targeting the EU. Tropical suppliers have also faced several challenges including the availability of a wide range of alternative materials, the lack of availability of FLEGT-licensed products from countries other than Indonesia, and consumer and specifier attitudes towards tropical timber. In 2020 to date, the COVID-19 pandemic has had a significant impact on both supply of SPWPs to EU-28 markets and consumer demand, although monthly data indicates that although imports from tropical suppliers had fallen sharply in January to May, imports were recovering slightly in June. The impacts have varied by supplier and importing country, with EU imports of Indian wood furniture suffering a severe decline in May to negligible levels (ITTO 2020e).

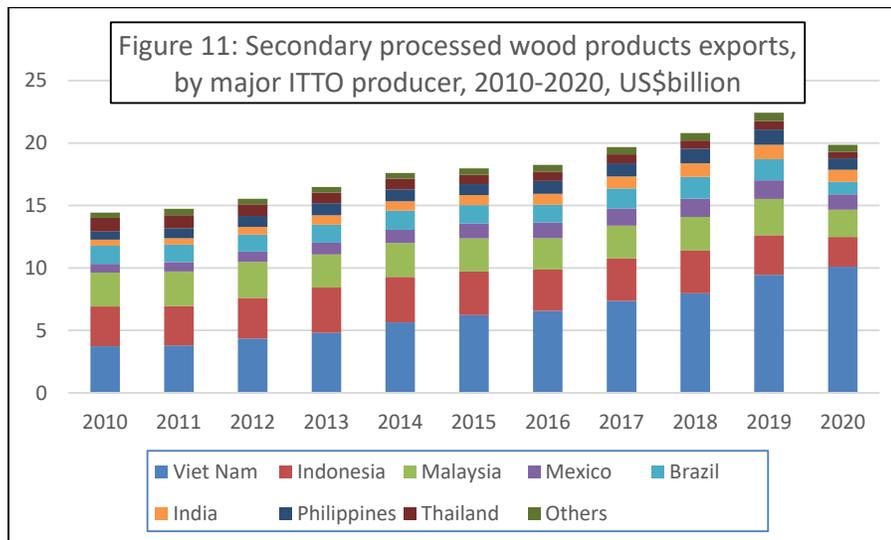

ITTO producers continued to import comparatively small volumes of SPWP products, which were valued at \$4.0 billion in 2019, but were only 4 per cent of total ITTO imports. The major ITTO producer country importers of SPWPs in 2019 were India, Malaysia, Mexico, and the Philippines. Although ITTO producer imports had grown from 2015 to 2018, imports declined 13 per cent in 2019 and are expected to decline by 31 per cent in 2020 to 2.8 million m³ with the most significant declines being recorded by India, Mexico and the Philippines.

ITTO consumers exported \$80.0 billion of SPWPs in 2019, accounting for 78 per cent of ITTO member country exports. China provided about 28 per cent of ITTO SPWP exports in 2019 and the country's shipments were valued at \$28.8 billion. Wooden furniture comprised the bulk (69 per cent) of China's SPWP exports. Growth in China's exports of wooden furniture slowed in 2015 and 2016 following a decade of rapid growth to 2014. Exports then picked up in 2017 and 2018 but dropped in 2019 (by 12 per cent) and are expected to decline in 2020 to \$14.9 billion. China's tropical wooden furniture exports have been mainly for low to middle-priced markets and have been strongly competitive in price sensitive markets.

In 2019, the USA, EU-28 and Japan were China's largest country markets accounting for 36 percent, 12 percent and 6 percent respectively of total export value. Although exports to other Asian destinations have been important, China's export destinations have been widespread, including Australia, Canada, and the Middle East. China's cost competitiveness in manufacture of wooden furniture has been diminishing as

manufacturing costs have increased. Domestic regulations on environmental protection and safety, introduced in 2018, have pushed up manufacturers' production costs, which have also been affected by rising labour, raw material, and logistics costs. China's exports to the USA were also affected in 2019 by retaliatory tariffs on Chinese furniture imports (among other products) by the USA, the major export market. The restrictions have resulted in diversification of markets and some Chinese manufacturers shifting their production to Viet Nam and other Asian producer countries.

ITTO producers exported \$22.4 billion of SPWPs in 2019 which were 22 per cent of ITTO SPWP exports (Figure 11). Asia-Pacific was the dominant ITTO exporting region, accounting for 84 per cent of producer exports, followed by Latin America (16 per cent). In contrast, Africa's SPWP exports have continued to remain at a relatively low level.

Although China's growth in wooden furniture exports has slowed, Viet Nam's exports have continued to grow rapidly, and were valued at US\$8.6 billion in 2019. Exports to the USA accounted for over 71 per cent of the total export value in 2019, followed by Japan (6 per cent) and EU-28 (6 per cent). Growth in exports to the US market has been assisted by the anti-dumping measures and retaliatory tariffs imposed on imports from China of some wooden furniture items, which had resulted in a relocation of many foreign-owned furniture enterprises to Viet Nam (and other Asian producer countries). Although the EU-Viet Nam Free Trade Agreement came into force on 1 August 2020, most wooden furniture items had already been exempt from import tax duties (Timber Industry News 2020). A voluntary partnership agreement with the EU (VPA) has also been ratified (in 2019) although further expansion of the EU market will depend on the development of the timber legality assurance system (VNTLAS) and the issuance of FLEGT-licensed timber products, which will be able to enter the EU market without undergoing the due diligence checks required by the EU Timber Regulation. With FLEGT licensing in place, the competitiveness of Vietnamese wood products will be further enhanced as EU economic operators importing from Vietnam will not have to worry about traceability and legality (EU FLEGT 2020).

After Viet Nam, ITTO producer countries including Malaysia, Indonesia, Mexico, Brazil, the Philippines, and Thailand were all significant exporters of SPWPs. In contrast to exports from other major ITTO producers, which are mainly of wooden furniture and parts, SPWP shipments from the Philippines are predominantly builders' woodwork and joinery destined for Japan. ITTO producers continued to play a more significant role in global mouldings exports compared with exports of other SPWP items, accounting for over 37 per cent of world exports in 2019, with Brazil, Indonesia, and Malaysia being the major ITTO producer country exporters.

Figures in **bold** denote imports recorded by importing country. Figures in *italics* denote exports recorded by exporting country.

Notes about exporters

+ Papua New Guinea, Cameroon, Mozambique, Ghana, Ecuador, Panama and Mali did not report any data in COMTRADE for the year 2019.

++ Brazil reported 1,076,828 m³ of tropical industrial roundwood exports to COMTRADE for the year 2019.

+++ Suriname reported 350,605 m³ of tropical industrial roundwood exports to COMTRADE for the year 2019.

Figures in **bold** denote imports recorded by importing country. Figures in *italics* denote exports recorded by exporting country.

Notes about importers

* Thailand reported 191,520 m³ of tropical sawwood imports to COMTRADE for the year 2019.

Notes about exporters

+ Cameroon, Gabon and Ghana did not report any data in COMTRADE for the year 2019.

++ Belgium reported 296,717 m³ of tropical sawwood exports to COMTRADE for the year 2019.

+++ Indonesia reported 98,668 m³ of tropical sawwood exports to COMTRADE for the year 2019.

++++ Viet Nam reported 85,199 m³ of tropical sawwood exports to COMTRADE for the year 2019.

Figures in **bold** denote imports recorded by importing country. Figures in *italics* denote exports recorded by exporting country.

Notes about importers

* The United Kingdom reported 447,369 m³ of tropical plywood imports to COMTRADE for the year 2019.

** The Philippines reported 333,500 m³ of tropical plywood imports to COMTRADE for the year 2019.

*** Belgium reported 287,812 m³ of tropical plywood imports to COMTRADE for the year 2019.

Notes about exporters

+ Cambodia and Ecuador did not report any data in COMTRADE for the year 2019.

++ Viet Nam reported 645,940 m³ of tropical plywood exports to COMTRADE for the year 2019.

+++ China reported 618,225 m³ of tropical plywood exports to COMTRADE for the year 2019.

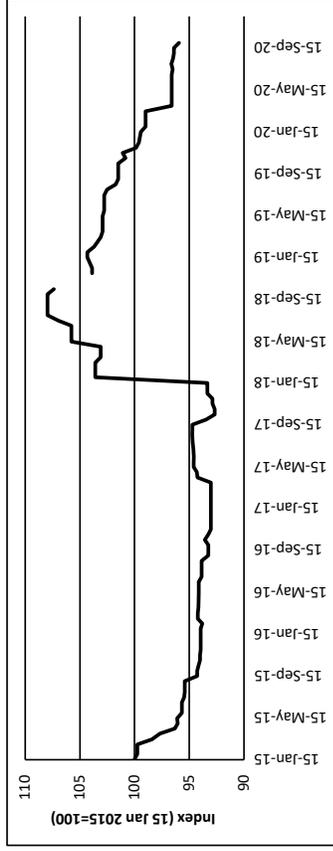

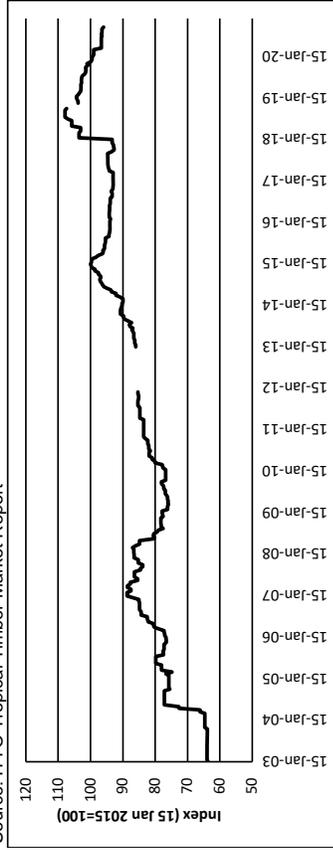

++++ France reported 618,225 m³ of tropical plywood exports to COMTRADE for the year 2019.

+++++ Thailand reported 26,283 m³ of tropical plywood exports to COMTRADE for the year 2019.

4-1. Tropical Industrial Roundwood Price Indices

4-1-a. West Africa industrial roundwood average export price index*

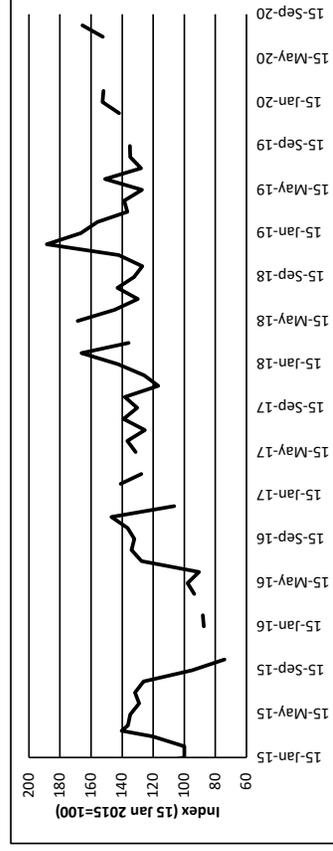

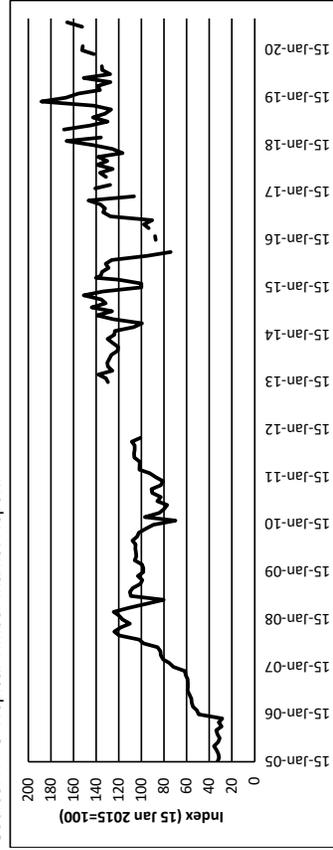

The index is based on two-weekly nominal euro prices/m³ of acajou, ayous, azobe, belli, bibolo, dibétou, ekki, iroko, kaha, n'gollon, obeche, okan, okoume, maobi, movingui, niowe, padouk, sapele, sipo, tall, utile and wawa logs (loyale Merchant/BC/C grades).
 Source: ITTO Tropical Timber Market Report

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-1-b. Myanmar teak industrial roundwood average export price index*

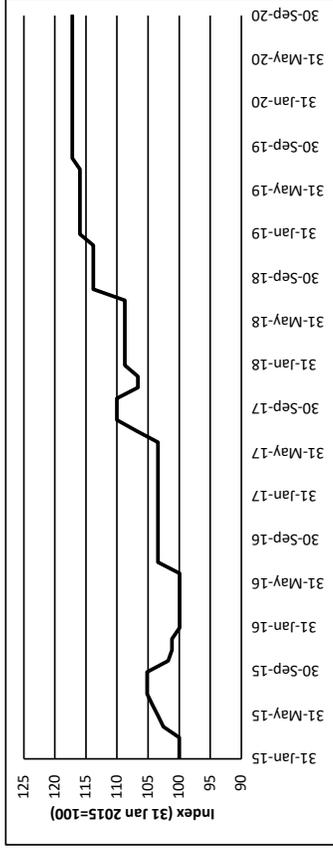

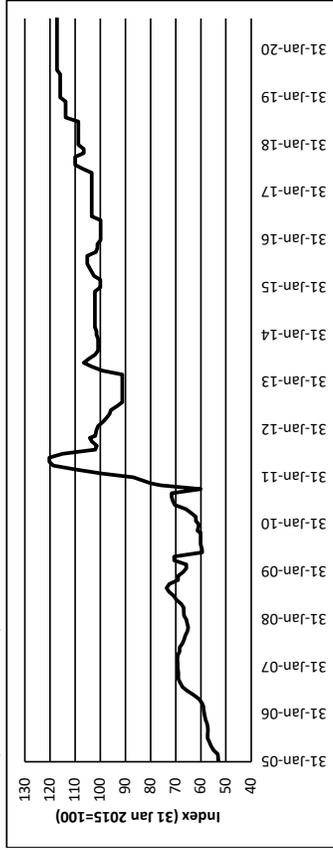

The index is based on two-weekly nominal dollar prices per hoppus ton of teak logs (SG-1, SG-2, SG-4, SG-5, SG-6 and SG-7 sawing grades).
 Source: ITTO Tropical Timber Market Report.

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

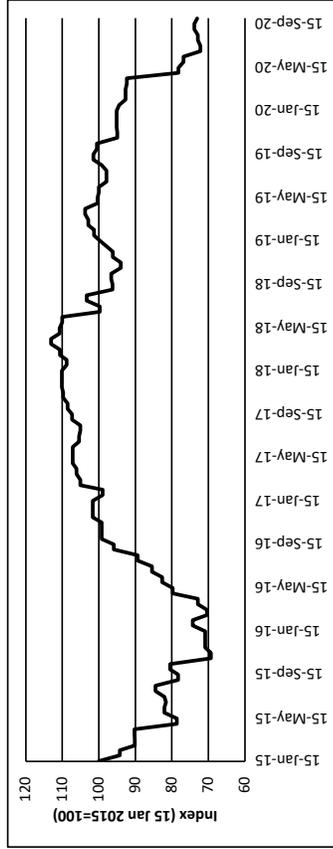

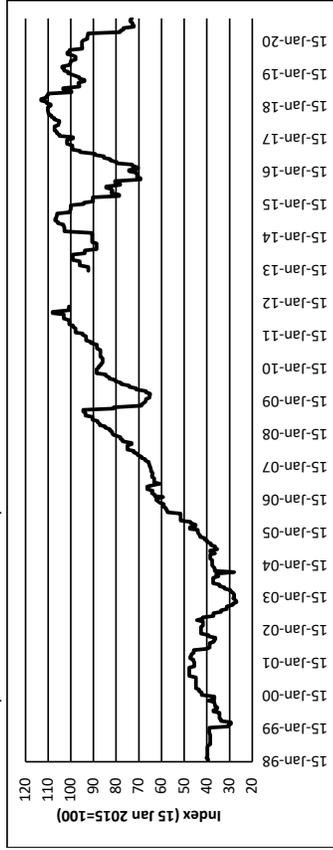

4-1-c. Japan meranti and keruing logs average import price index

The index is based on two-weekly nominal dollar FOB prices/m³ of meranti logs of small and medium diameter (SQ & up grades) and keruing logs (MQ & up grades).
Source: Japan Lumber Reports.

4-1-d. Brazil domestic logs price index*

The index is based on two-weekly nominal dollar prices/m³ of ipê, jatoba, massaranduba, mirracatiara, angelim vermelho, mixed redwood and white woods logs.
Source: ITTO Tropical Timber Market Report.

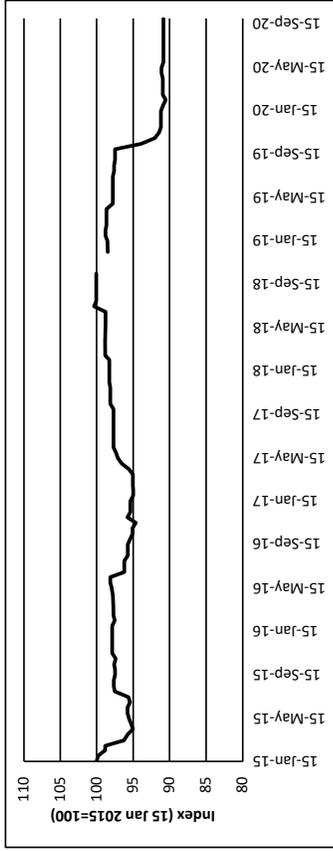

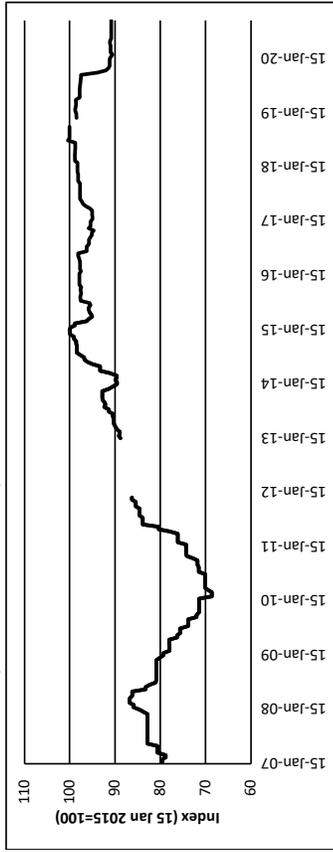

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-2. Tropical Sawwood Price Indices

4-2-a. West Africa sawwood average export price index*

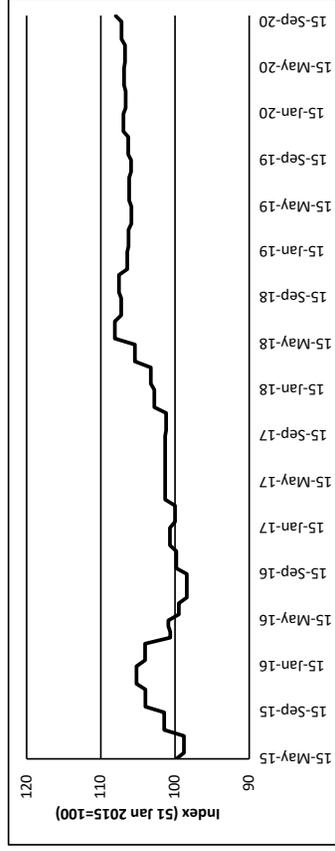

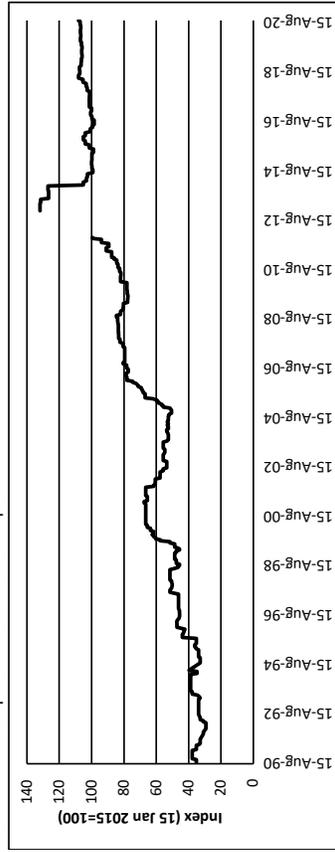

The index is based on two-weekly nominal euro prices/m³ of ayous, bilinga, iroko, moabi, movingui, okoumé, padouk, khaya, sapele and sipo sawwoods (first and second grades).
Source: the ITTO Tropical Timber Market Report.

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-2-b. Brazil sawwood export price index*

The index is based on two-weekly nominal dollar prices/m³ of jatoba sawwood.
Source: ITTO Tropical Timber Market Report.

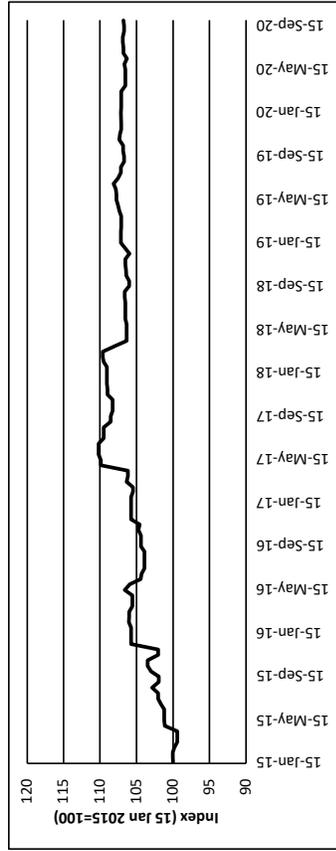

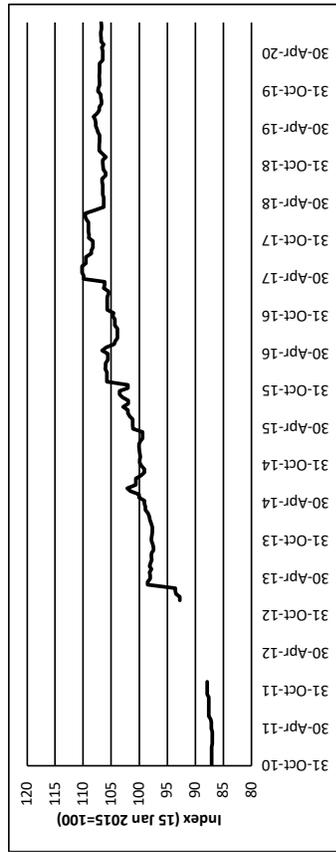

*Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-3. Tropical Plywood Price Indices

4-3-a. Ghana plywood average export price index*

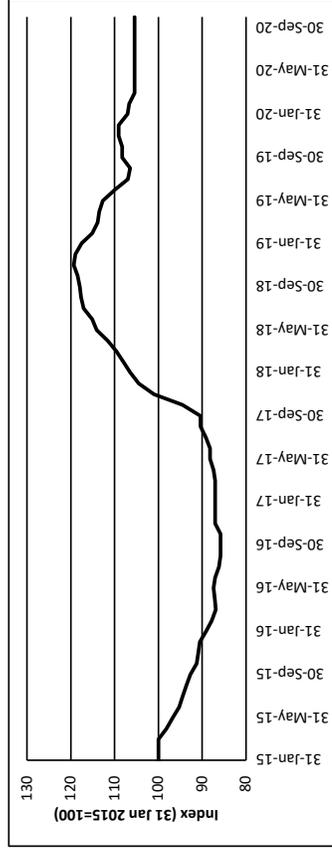

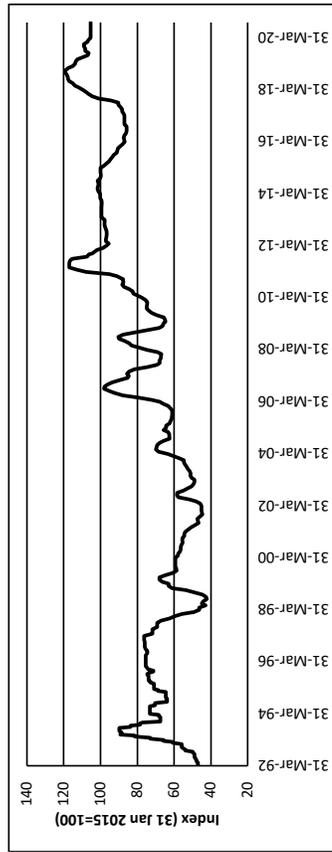

The index is based on two-weekly nominal euro prices/m³ of plywood made of ceiba (BB/CC grades 4/6/9/12/15/18mm), ofram (BB/CC grades 4/6/9/12/15/18mm) and asanina (BB/CC grades 4/6/9/12/15/18mm).
Source: ITTO Tropical Timber Market Report.

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-3-b. Japan Indonesian plywood average import price index

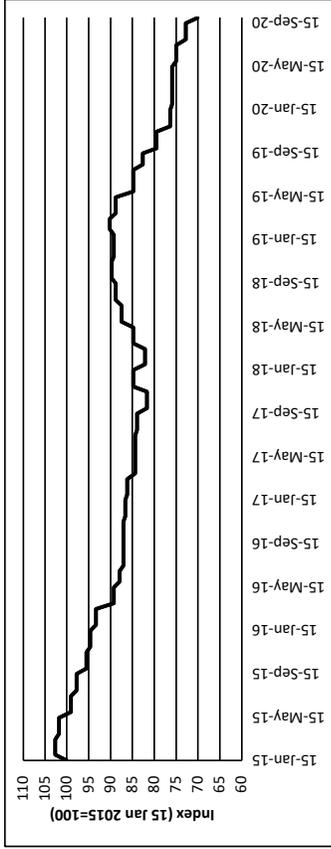

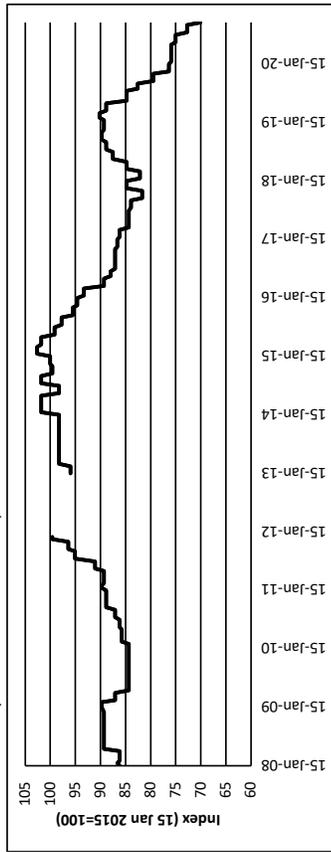

This index is based on two-weekly nominal dollar prices/m³ of Indonesian panels for concrete formwork (12 mm 3'X6' JAS C&F), Indonesian floor bases (3'X6' JAS C&F) and Indonesian thin panels (3'X6' JAS C&F).
Source: Japan Lumber Reports.

4-4. Softwood Sawwood and Plywood Price Indices

4-4-a. Brazil pine sawwood export price index*

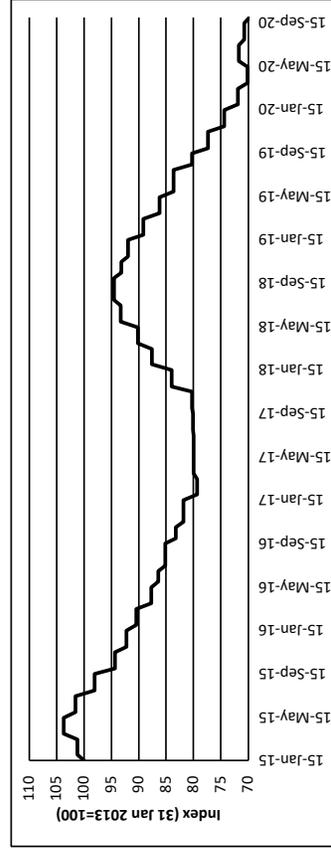

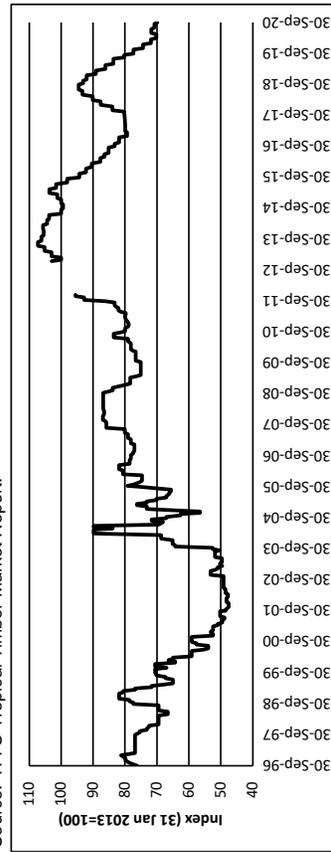

The index is based on two-weekly nominal dollar prices/m³ of pine (kiln dried) sawwood.
 Source: ITTO Tropical Timber Market Report.

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-4-b. Brazil pine plywood export price index*

The index is based on two-weekly nominal dollar prices/m³ of 9mm, 12mm, 15mm and 18mm pine plywoods (C/CC grades, water and boil proof) exported to the EU market.
 Source: ITTO Tropical Timber Market Report.

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.
