

# THE INTERNATIONAL TROPICAL TIMBER ORGANIZATION

## DEBATES/WORKING GROUP

Jean-Christophe Claudon

## **PROBLEMS/STRENGTHS/WEAKNESSES**

- **Are you satisfied with the completeness and quality of data you entered in the JFSQ this year?**
- **What are the major issues for collecting the data?**
- **Describe the main weaknesses and limitations of the existing national system for collecting, analyzing and disseminating data on forest products.**
- **What are the strengths of the data collection system in your country?**

## RECOMMENDATIONS/SOLUTIONS

- Have you made any recent innovations which have improved the quality and quantity of available data?
- Do you have any specific recommendations for improving data on removals, production or trade?

# PUBLICATIONS

- Describe how (website, publication etc) data on forest products are used and distributed to other organizations, the public, the press, etc. How frequently are they distributed?
- Please list any known users of forest product statistics in your country?

## WHAT CAN WE DO TO ASSIST YOU?

- What technical topics would you like to have included in capacity building workshops?
- How can FAO/ITTO/UNECE/EUROSTAT help you improve the quality of forest products data in your country? Please provide possible examples.

Thank you for  
your attention
