ELEMENTS FOR THE BIENNIAL REVIEW AND ASSESSMENT OF THE WORLD TIMBER SITUATION 2023-2024

D R A F T

Figures not to be released until reviewed by Members. Due to document reproduction constraints, only one copy per delegation if this report is being distributed. Please ensure that the appropriate personnel on your delegation or in your country obtain access to it in order to facilitate data checking.

Due to late and incomplete/incorrect inputs from members, many of the data included here are provisional and subject to revision in an on-going process of review prior to final publication. Lack of data also means that textual/analytical sections of this Review need to be updated/completed when data and/or clarifications are received. Members should ensure that the figures contained herein are checked by appropriate personnel and any revisions submitted to the Secretariat by 31 January 2025.

The final version of the 2023-2024 Biennial Review will be published in August 2025 and until that time none of the material contained in this document should be re-published or otherwise disseminated due to its provisional nature.

This draft document is for consideration of the International Tropical Timber Council at its 60th Session. The figures and analyses presented here are subject to revision by Council and should not be quoted or otherwise disseminated prior to the release of the final version of this document in **August 2025**.

The designations employed and the presentation of material in this document do not imply the expression of any opinion whatsoever on the part of the International Tropical Timber Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

5. Trade in Secondary Processed Wood Products, 2017-2024.....	110

Forecasts for the data marked CI or CRI for the year 2024 are based on annualized COMTRADE data for the first six months of 2024. The Joint Forest Sector Questionnaires collected in 2023 and 2024 are the main sources of the appendices. Other sources are indicated by the superscripts after the figures.

SUPERSCRIPTS

	Data from the Joint Questionnaire sent by member countries to ITTO every year.
*	Other unofficial data including country statistical reports, trade journals, ITTO project reports, USDA Foreign Agricultural Service reports.
C	COMTRADE database (https://comtrade.un.org/).
CB	COMTRADE mirror statistics from COMTRADE database (https://comtrade.un.org/).
E	UNECE Superscript. Data from the UNECE online database (https://unece.org/forests/data-forest-products-production-and-trade).
F	FAOSTAT superscript. Data from the FAO online statistical database (https://www.fao.org/faostat/en/#data/FO).
G	Global Trade Atlas (https://www.gtais.com/gta/).
I	ITTO estimate.
R	Figure rounded down to zero in the ITTO Biennial Review and Assessment of the World Timber Situation.
TCF	UNECE Committee on Forests and the Forest Industry (COFFI) Market Forecasts held every year in Geneva.
W	Adjustment from weight (usually metric tons) to volume assuming the following factors (unless different conversion factors are reported): coniferous logs – 1.43m ³ /ton; non-coniferous tropical logs – 1.37m ³ /ton; non-coniferous non-tropical logs – 1.25m ³ /ton; coniferous sawnwood – 1.82m ³ /ton; non-coniferous sawnwood – 1.43m ³ /ton; veneer – 1.33m ³ /ton; plywood – 1.54m ³ /ton.
X	Repeated data.

[This section is dependent on data provided by members on their production and trade of tropical timber. It will be updated and finalized when additional data and clarifications are received from members.]

SUMMARY

This draft Review provides data on production and trade of tropical forest products and the status of tropical forests in ITTO member countries, as well as an overview of production and trade statistics of all timber products in these countries. Data are presented up to and including 2024, based on estimates made in the third quarter of that year. These estimates will be updated when data for 2024 is provided by member countries. The base year for analysis is 2023 as this is the latest year for which reliable data for most countries were available at the time of preparation. Statistics comparing tropical to all primary wood product production and trade, by volume and value, for 2023 and 2024, are given in Tables 1.1 and 1.2 for the 76 ITTO members (including the EU-27) and for the world. Secondary processed wood products (SPWPs) are not differentiated in trade statistics by species or source of raw materials. Tables 1.3 and 1.4 provide SPWP trade by value for 2023 and 2024 for all SPWP trade which includes both tropical and non-tropical wood products for many countries.

1 Global economic trends 2023-2024

Global economic growth slowed in 2023 following a rebound in 2022 from the impacts of the COVID-19 pandemic which had resulted in production stoppages and disruptions in global supply chains over the previous two years. In 2023, growth had been impacted by the longer-term effects of the pandemic and the war in Ukraine, weak growth in productivity and geoeconomic fragmentation¹. Global economic recovery had also been affected by tighter financial conditions to lower inflation which had surged in response to pent-up consumer demand accumulated during the pandemic and post-pandemic supply shortages, the withdrawal of fiscal support to curb high government debt, and persisting weakness in China's property sector, a major wood products market. IMF's World Economic Outlook estimates for 2023 show considerable divergence in economic growth between regions¹. In the United States, economic growth had strengthened in 2023, owing to robust consumption, government spending, and significantly reduced imports of goods and services. In contrast, growth in the euro area slowed sharply, with exports declining in response to a loss of export competitiveness amid high energy prices². Disruptions to shipping in the Red Sea from late 2023 caused disruptions to supply chains and pushed up shipping costs, particularly from Asia to Europe. China's economic growth and recovery from the pandemic was slower than expected, with the property sector crisis and low consumer confidence constraining growth. These developments had significant implications for the global wood products sector, given China's importance in the trade.

In 2024, IMF's latest forecast is for global economic growth to remain stable but low by historical standards, with geopolitical tensions posing a risk to the resilience of global supply chains, funding costs, cross-border capital flows and market efficiency. Economic growth could also be impacted by financial market volatility, trade policy uncertainty, the persistence of inflation, and natural disasters due to climate change. A major risk for the tropical wood product sector would be a deeper contraction in China's property sector, which could weaken consumer sentiment and generate negative spillovers for the Asia-Pacific region and globally, given China's large footprint in global trade¹. Weaker domestic demand from Chinese households and firms may result in more production focused on exports rather than domestic markets, and declining Chinese export prices would put pressure on profit margins of China's competitors and potentially provoke retaliatory measures. In 2025 there will also be a heightened risk of trade protectionism in the United States which may

impact tropical wood product imports for all supplying countries. The medium to long-term outlook for the tropical wood products sector, therefore, remains uncertain.

2 Primary Wood Products Production

2.1 Tropical roundwood production

The lack of reporting on production of tropical logs and other primary wood products by most of the major ITTO producer countries continues to limit the quality of production data available. Data estimates in this report are based on data provided by member countries in addition to data and anecdotal information from other sources.

In the period 2020 to 2023, production of tropical industrial roundwood (logs) in ITTO producer member countries increased year-on-year from a low of 280.1 million m³ in 2020 when industry lockdowns in response to the pandemic had temporarily disrupted supply chains and impacted production operations in many producer countries. By 2023, production totalled 289.3 million m³, increasing slightly from the previous year but projected to remain at about the same level in 2024. In descending order, Indonesia, India, Viet Nam, Brazil, Thailand, and Malaysia accounted for about 83 per cent of total log production in 2023 and about 78 per cent of production was in the Asia-Pacific region (Figure 1). Indonesia is ITTO's largest producer by volume of tropical roundwood, which totalled 88.6 million m³ in 2023. Although not reported in the Joint Forest Sector Questionnaire (JFSQ), anecdotal information suggests that the proportion of harvest from industrial plantations (particularly eucalypts, acacias, teak and rubberwood) in many ITTO Asia-Pacific producer countries has continued to grow in recent years, while the availability of logs from natural stands has fallen.

The proportion of tropical roundwood to total roundwood production in ITTO member countries was 19 per cent in both 2023 and 2024, with ITTO member countries accounting for 87 per cent of world production of tropical logs. Significant non-ITTO producer countries, in descending order, include Nigeria, Uganda, Paraguay, Ethiopia, the Solomon Islands, Bangladesh, Lao PDR and Bolivia. In the African region, a significant proportion of production (55 per cent) is by non-ITTO member countries, whereas Asia-Pacific production is predominantly by ITTO members (97 per cent). Regional disparities in the rate of domestic conversion of primary products has continued, with Asia-Pacific, Latin America and Africa's conversion of domestically produced logs to at least primary products averaging about 97 per cent, 93 per cent and 90 per cent respectively in 2023.

Note: “World” estimates include data for both ITTO member and non-member countries.

Taiwan P.O.C. has been included in ITTO aggregates.

2.2 Tropical sawnwood production

Tropical sawnwood production by ITTO members continued to grow year-on-year from a low in 2020 of 66.4 million m³, to 69.5 million m³ in 2023, although the volumes have not yet returned to pre-pandemic

levels. Production is expected to continue to grow modestly in 2024 to 70.3 million m³ (Figure 2). ITTO members accounted for over 92 per cent of world tropical sawnwood production in 2023.

Regionally, Asia-Pacific, Latin America/Caribbean and Africa accounted for approximately 78.6 per cent, 11.0 per cent, and 10.4 per cent respectively of total tropical sawnwood production in ITTO producer countries in 2023. In the African region, Cameroon, Gabon, Côte d'Ivoire, Mozambique, and Ghana each produced more than 500 000 m³ of tropical sawnwood. Brazil's production totalled 3.0 million m³ and accounted for about half of production by Latin American producer countries in 2023, while Peru, Ecuador, and Costa Rica were also important producers in the region. Peru's production increased by 25 per cent in 2023 to 943 000 m³ while production in Ecuador declined by 37 per cent over the same period and totalled 230 000 m³. All other major ITTO producers (India, Viet Nam, Thailand, Malaysia, and Indonesia) were in the Asia-Pacific region (Figure 2). Viet Nam's tropical sawnwood production has mainly been sourced from imported tropical logs from border countries and the African region, with the bulk of Viet Nam's domestic log supply sourced from lower grade plantations. ITTO consumer countries produced 15.2 million m³ of tropical sawnwood in 2023, with China accounting for 99 per cent of the volume.

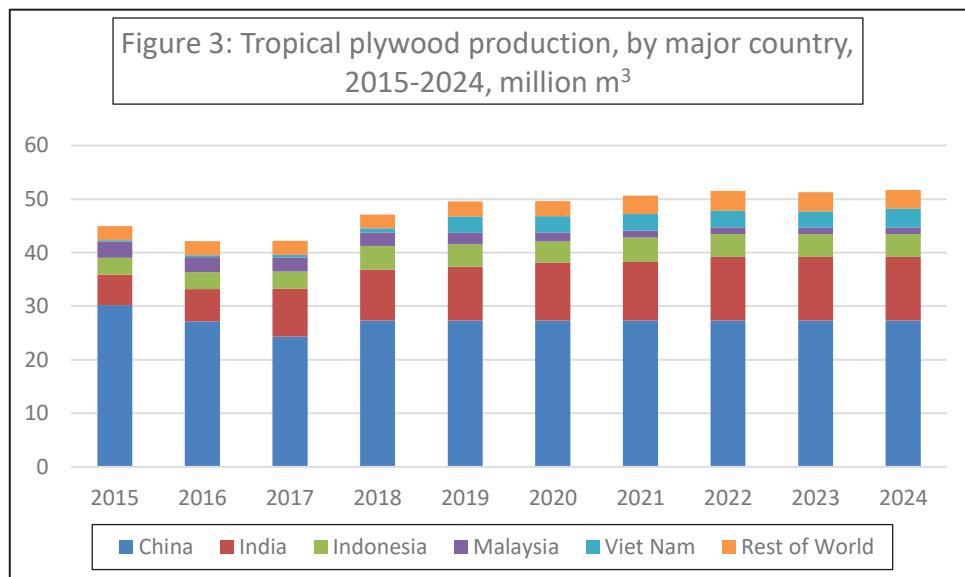

2.3 Tropical veneer production

Production of tropical veneer in ITTO producer countries totalled 7.63 million m³ in 2023, with most production occurring in the Asia-Pacific (79 per cent) and African (16 per cent) regions. Viet Nam (2.9 million m³) and Indonesia (1.5 million m³) were the largest country producers, while Gabon, Côte d'Ivoire, Malaysia, Thailand, Myanmar, Brazil, India and Ghana each produced significant quantities, in excess of 220 000 m³.

2.4 Tropical plywood production

Tropical plywood production in ITTO producer countries contracted slightly in 2023 to 22.7 million m³ and is estimated to increase to 23.2 million m³ in 2024. World production of tropical plywood (comprising ITTO producers and consumers, and non-ITTO countries) totalled 51.3 million m³ in 2023 (Figure 3). About 25 per cent of ITTO producers' plywood production by volume was exported in 2023. Apart from India, which consumes the bulk of its domestic tropical plywood production, a significant proportion of production was exported from other major producers in the ITTO Asia-Pacific producer region, notably Malaysia (87 per cent), Indonesia (74 per cent) and Viet Nam (67 per cent). Production is therefore more sensitive to market conditions in major importing countries, particularly the United States, Japan, and the Republic of Korea, than other tropical primary products. Substitution trends have affected production levels, with tropical plywood continuing to lose market share to temperate and softwood plywood and other lower cost alternative products. The declining availability and rising prices of peeler logs of tropical species from natural forests has led to the extensive use of fast-grown plantation species such as pine, poplar, eucalypts, rubberwood and acacia as core raw materials in tropical plywood manufacture. India has recently reported a

wider acceptance of a range of species for core plywood veneers, from imports of logs and veneer³. ITTO consumer countries' tropical plywood production totalled 27.9 million m³ in 2023, a similar level to the previous year. China accounted for the bulk of consumers' production (98 per cent), based on imported tropical logs, and is the world's largest country producer of tropical plywood, most (98 per cent) of which is consumed domestically. China, India, Indonesia, Viet Nam and Malaysia dominate tropical plywood production among ITTO countries (Figure 3), although Malaysia's production has continuously dropped in recent years, declining 43 per cent by volume in the period 2020 to 2023. Relocation of plywood production facilities to other producer countries such as Viet Nam has also occurred to reduce production costs and avoid prohibitive tariffs imposed by the United States on some Chinese plywood imports.

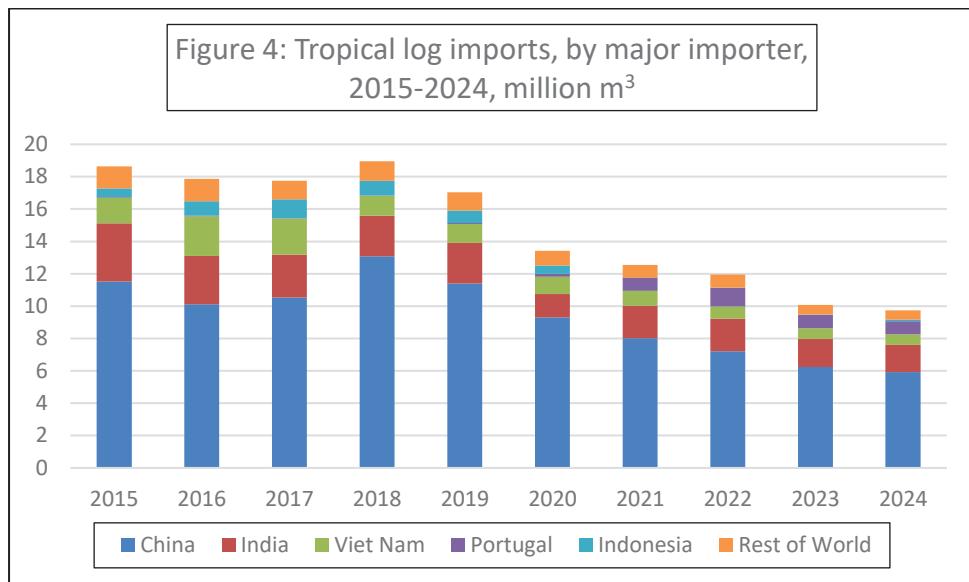

3 Primary Wood Products Imports

3.1 Tropical roundwood imports

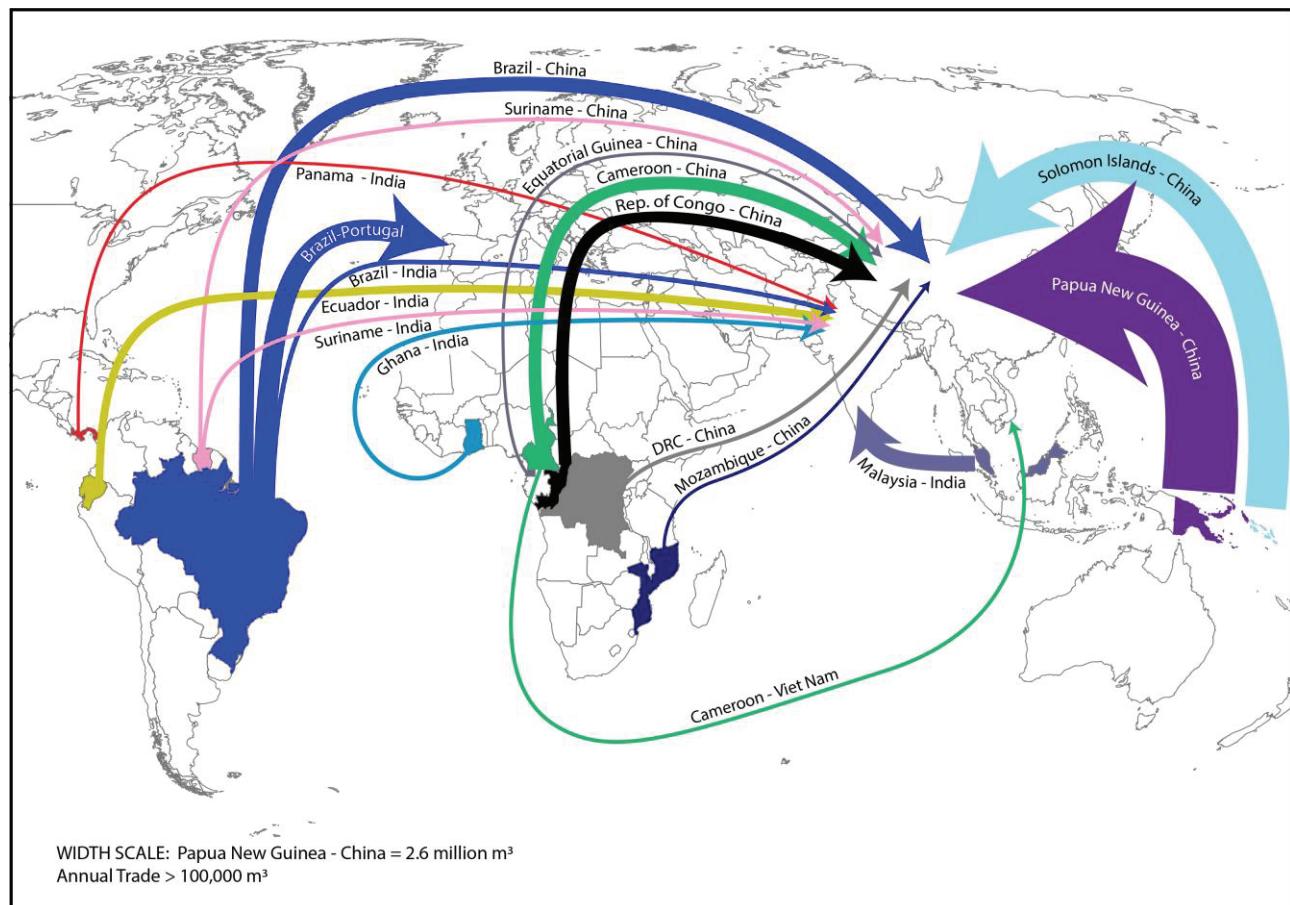

With the exception of 2018 when demand in China had surged, tropical log imports by ITTO members have declined year-on-year over the last decade. In 2013, imports totalled 10.0 million m³ which was the lowest volume in ITTO's 33-year statistical records, and were valued at USD 2 630 million. Imports are expected to decline further in 2024 to 9.6 million m³ (Figure 4).

³ ITTO TTM Report 28:17, 1-15 February 2024

The global tropical log trade continues to focus on Asian markets, with China, India and Viet Nam together accounting for 87 per cent of tropical roundwood imports in 2023. The major directions of the global tropical log trade in 2023 were: from Papua New Guinea (PNG), the Solomon Islands (not an ITTO member), Brazil and West African countries to China; from Brazil to Portugal; from Malaysia, Ecuador, Brazil, Ghana and Suriname to India; and from Cameroon to Viet Nam. (Figure 5).

Figure 5: Major trade flows: Tropical industrial roundwood 2023 (million m³)

China continues to be the most important market in the tropical log trade, accounting for nearly 63 per cent of ITTO tropical log imports by volume in 2023, although import volumes had contracted by over 52 per cent to 6.2 million m³ compared with 2018, a peak year. In 2024, tropical log imports are expected to continue to decline, by 5 per cent year-on-year, to 5.9 million m³.

China's economic recovery from the impacts of the COVID-19 pandemic has been slow, and China's important construction sector has been impacted by a property sector crisis which began in 2021, triggered by a liquidity crunch that severely impacted major property developers. The crisis has continued, with recent data for January to August 2024 indicating a year-on-year decline of over 10 per cent in real estate investment⁴. The sector's previous growth had been driven by speculative investment and excessive borrowing, which had prompted government interventions to stabilise the market. These measures have been challenged by an ageing population and declining consumer confidence, with the crisis having widespread economic effects, dampening consumer spending and affecting financial markets. The government has recently announced that it will lower mortgage rates for existing home loans and reduce the minimum down payment ratio for both first and second homes, in an attempt to ease the crisis. China's construction sector contributes about 25 per cent of GDP and is an important determinant of China's domestic wood products demand. Growth in exports of China's secondary processed wood products has also stagnated since 2021, impacted by declining consumer demand in major import markets, and rising manufacturing and transport costs which have impacted the competitiveness of Chinese exporters. China has recently introduced preferential policies to encourage consumption of interior decoration items and to promote housing renovation, which is expected to increase domestic consumption of wood-based products⁵.

In 2023, PNG and the Solomon Islands were China's major tropical log suppliers, together accounting for 64 per cent of China's imports by volume, but there were also significant supplies from Brazil, Cameroon, Republic of Congo, Dem. Rep. of Congo (DRC), Suriname, Mozambique, and Equatorial Guinea, (see Appendix 2 Table 2-1). In 2023, imports from PNG declined 3 per cent to 2.62 million m³, while imports from the Solomon Islands reached 1.40 million m³, up 3 percent year-on-year. Over the same period, imports declined significantly year-on-year from DRC (down 36 per cent), Mozambique (down 52 per cent) and Equatorial Guinea (down 70 per cent).

In contrast to China, where tropical log imports in 2023 comprised a small proportion (16 per cent) of the total log import volume, India's imports of logs of tropical origin have been more significant (41 per cent). The volume of India's tropical log imports dropped to 1.75 million m³ in 2023 which was 13 per cent less than the previous year. The decline in imports reflects demand levels and supply restrictions to India's plywood industry which is a significant end user of tropical logs. The major suppliers in 2023 were Malaysia (31 per cent), followed by Ecuador (16 per cent), Brazil (10 per cent), Ghana (9 per cent), Suriname (8 per cent) and Panama (6 per cent). India's tropical log supply sources reflect a strong preference for teak from natural stands, although import demand for durable hardwood substitutes and plantation teak have grown, with plantation teak now available from several tropical supplying countries. Preliminary estimates show India's tropical log imports contracting to 1.69 million m³ in 2024.

Viet Nam's tropical log imports have declined year-on-year since 2016, the peak year, dropping to 0.64 million m³ in 2023, 16 per cent less than the previous year. The major tropical log suppliers to Viet Nam in 2023 were Cameroon (35 per cent), Central African Republic (14 per cent), PNG (12 per cent), Rep. Of Congo (11 per cent) and Suriname (8 per cent). Viet Nam's domestic wood products sector has been impacted by a downturn in the real estate sector, constraining domestic consumption of wood-based products. Viet Nam has been undertaking measures to control the legality of its tropical wood imports which may impact the volume and source of future imports of tropical logs.

The surge in Portugal's imports of tropical logs since 2021 from Brazil, which reached 0.742 million m³ in 2023, were predominantly eucalypt species.

3.2 Tropical sawnwood imports

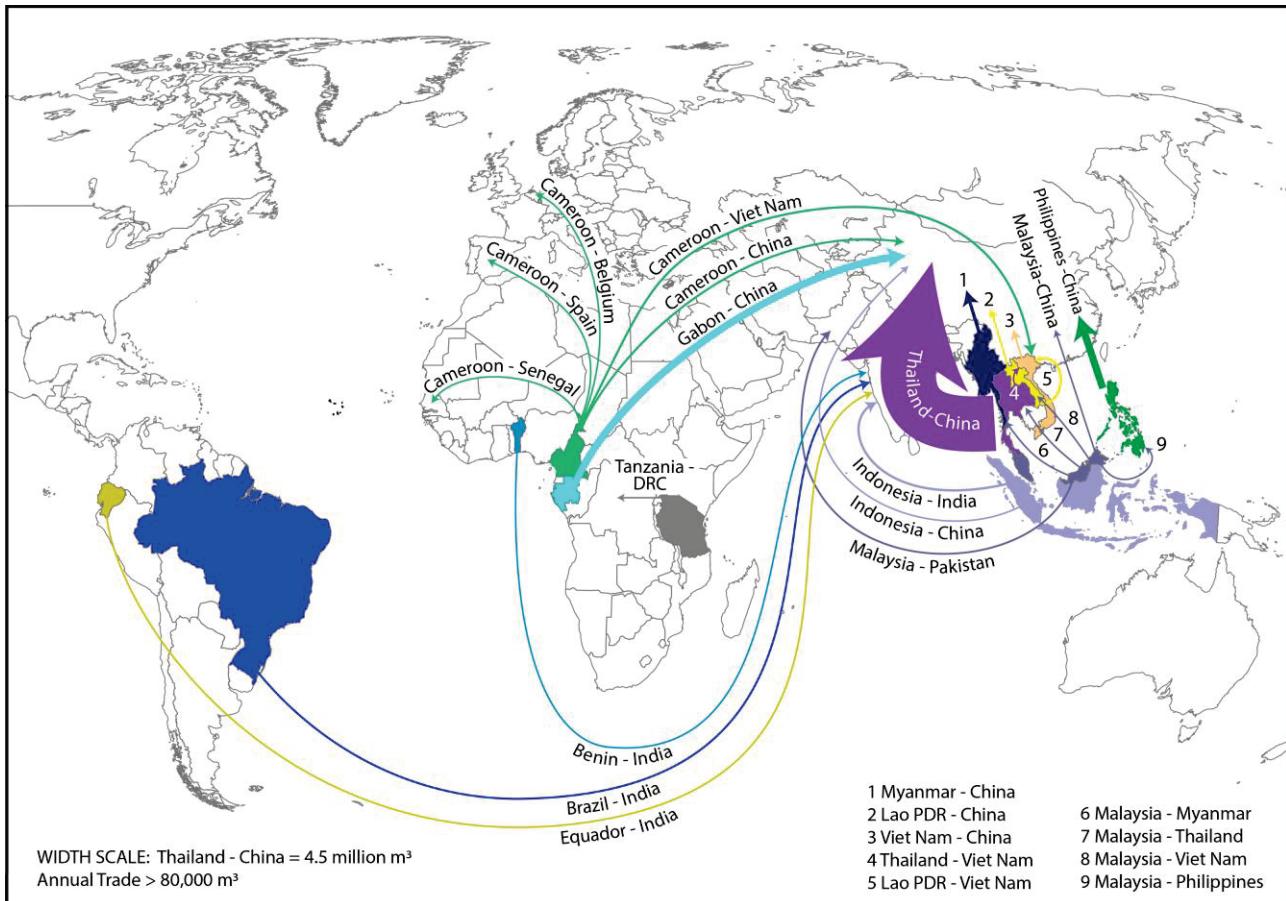

The bulk of the global tropical sawnwood trade (87 per cent of ITTO imports and 65 per cent of ITTO exports) lies within the Asia-Pacific region, with ITTO imports totalling 10.7 million m³, valued at USD 4 497 million in 2023. Imports had increased 4 per cent by volume year-on-year in 2023, bucking the trend in other major wood product imports. The tropical sawnwood trade was only a small proportion by volume (about

⁴ ITTO TTM Report 28:19, 1-15 October 2024

⁵ ITTO TTM Report 28:21, 1-15 November 2024

8 per cent) of the total sawnwood trade (tropical and non-tropical). Figure 6 shows the major trade flows of tropical sawnwood in 2023.

Figure 6: Major Trade Flows: Tropical Sawnwood 2023 (million m³)

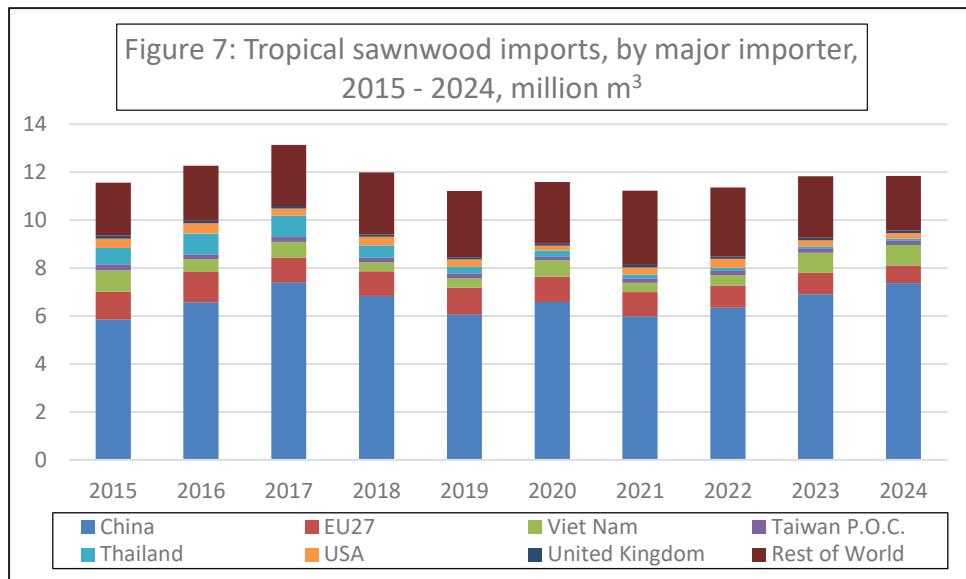

China continues to be the dominant market destination in 2023, absorbing 6.9 million m³ valued at USD 1 921 million, a year-on-year increase of 9 per cent in volume and 1 per cent in value. In 2023, tropical sawnwood imports accounted for 25 per cent of all sawnwood imports (tropical and non-tropical) and this share has been growing in recent years. Over 65 per cent of China's tropical sawnwood imports originated from Thailand. The Philippines and Gabon each supplied 8 per cent of the import volume, with Myanmar, Cameroon, Viet Nam, Indonesia, and Malaysia providing most of the remainder. Import volumes from Viet Nam and Myanmar had surged in 2023, up 146 per cent and 119 per cent respectively, although most of the increase in volume of China's total imports of tropical sawnwood can be attributed to a 17 per cent increase in imports from Thailand. While China's imports from Thailand are predominantly of lower value rubberwood, Africa's supplies are mainly of high value specialty timbers for the high-end market. Imported sawn rubberwood is used in furniture manufacturing (45 per cent), wooden doors (24 per cent), bathroom cabinets (26 per cent), wooden floors and other woodwork (5 per cent)⁶. Preliminary data for 2024 indicates that China's tropical sawnwood imports are expected to increase to 7.38 million m³ valued at USD 2 155 million, up 7 per cent in volume and 12 per cent in value compared with the same period in 2023.

The other major tropical sawnwood importers in 2023 were Viet Nam, India, Belgium, and the United States (see Figure 7). In 2023 Viet Nam's imports had surged, increasing 92 per cent year-on-year to 0.84 million m³ and are expected to remain at about that level in 2024. The major suppliers in 2023 were Cameroon (21 per cent), Lao PDR (21 per cent), Malaysia (16 per cent), Thailand (11 per cent) and Zambia (7 per cent), with significant growth year-on-year from Malaysia, Thailand and Zambia.

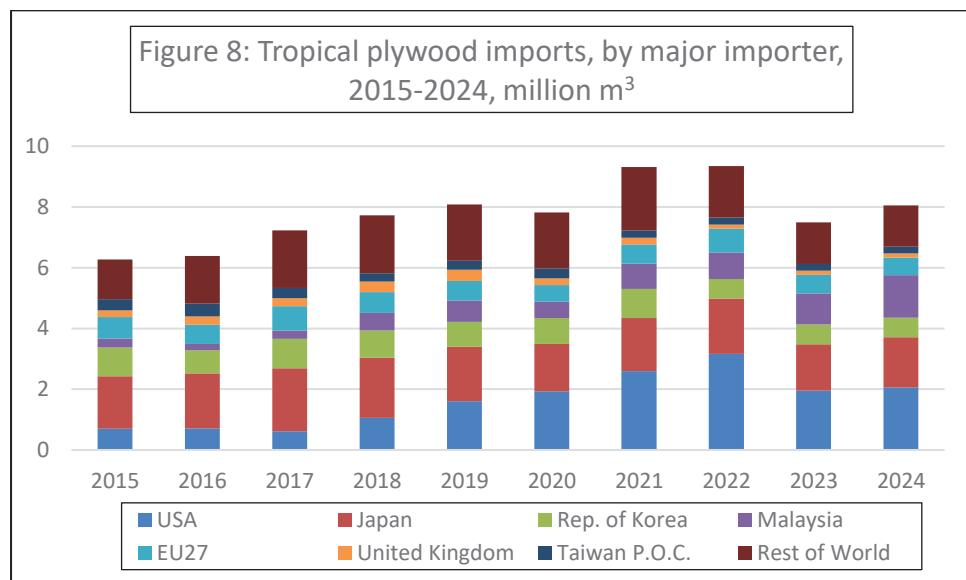

⁶ ITTO TTM Report 26:16, 16th – 31st August 2022.

EU27 imports of tropical sawnwood were down 3 per cent year-on-year in 2023 to 0.89 million m³ and expected to decline further in 2024 to 0.73 million m³, 18 per cent less than the previous year (see Figure 7).

3.3 Tropical plywood imports

The global trade in tropical plywood recovered strongly from the impacts of the pandemic, increasing 19 per cent by volume to 9.3 million m³ in 2021, mostly attributed to significant growth in US imports in response to strong economic growth and housing starts (Figure 8). World imports moderated in 2022 and contracted significantly in 2023 to 7.5 million m³, down 20 per cent on the previous year.

The United States is the major importer of tropical plywood. Imports accelerated in 2022, but plunged in 2023, down 38 per cent by volume to 1.9 million m³. Imports had been negatively impacted by a contraction in the U.S. housing market which had been weighed down by higher mortgage rates and prices for construction materials. The U.S. share of world tropical plywood imports had also declined over that period, from 34 per cent in 2022 to 26 per cent in 2023. In 2023, the major suppliers of tropical plywood to the United States were Indonesia (31 per cent), Viet Nam (27 per cent), Cambodia (7 per cent), Malaysia (4 per cent) and Brazil (4 per cent). In 2023, Indonesia had overtaken Viet Nam as the major U.S. supplier despite a 37 per cent decline in volume. China has previously been a major supplier to the United States, but trade had been impacted by the imposition of anti-dumping and countervailing duties and the relocation of some Chinese companies to Viet Nam and other producer countries. The significant increase in U.S. imports of hardwood plywood from Viet Nam between 2018 and 2022 led to U.S. industry concerns of unfair trade that threatened the economic viability of the US hardwood plywood industry. In response, in August

2023 the U.S. Department of Commerce ruled that imports of hardwood plywood products completed in Vietnam, but mainly produced in China, violated federal antidumping laws and were subject to the duties on Chinese hardwood plywood⁷. U.S. imports from Viet Nam dropped by nearly 50 per cent in 2023, although data for 2024 is currently unavailable.

Japan's tropical plywood imports accounted for about 20 per cent of ITTO imports by volume in 2023, totalling 1.5 million m³, the lowest level in ITTO's 33-year records. In 2023 the major suppliers by volume were Indonesia (44 per cent), Malaysia (35 per cent), and Viet Nam (19 per cent). Imports are expected to rebound in 2024 to 1.6 million m³, although this is still relatively low by historical standards. Japan's tropical plywood demand, which had already stagnated before the COVID pandemic, has continued to be impacted by considerable substitution by domestically produced softwood plywood in response to the relatively high prices and reduced availability of Southsea plywood, and the risk of exchange rate fluctuations which affects imported plywood. In 2023 tropical plywood demand had been impacted by weakening of the Japanese economy and a weak yen which had driven up the cost of imports and eroded Japanese consumers' purchasing power and consumer sentiment. The Japanese housing sector also weakened and had seen a 5 per cent decline in housing starts in 2023 after increasing in 2021 and 2022.

While Malaysia is an important plywood exporter it is also ITTO's third largest importer, with total imports amounting to just over one million m³ in 2023, with 97 per cent by volume sourced from Indonesia and Viet Nam. The other significant importers of tropical plywood in 2023, in descending order by volume, were Rep. of Korea, Taiwan P.O.C., India, United Kingdom, Germany and Mexico. India's imports may be impacted by new standards requirements for imports of plywood which were introduced by the Bureau of Indian Standards in February 2024. They are expected to impact tropical plywood imports, and micro, small and medium-sized enterprises (MSMEs) are reportedly having difficulties in meeting the costs of testing for the new standards⁸.

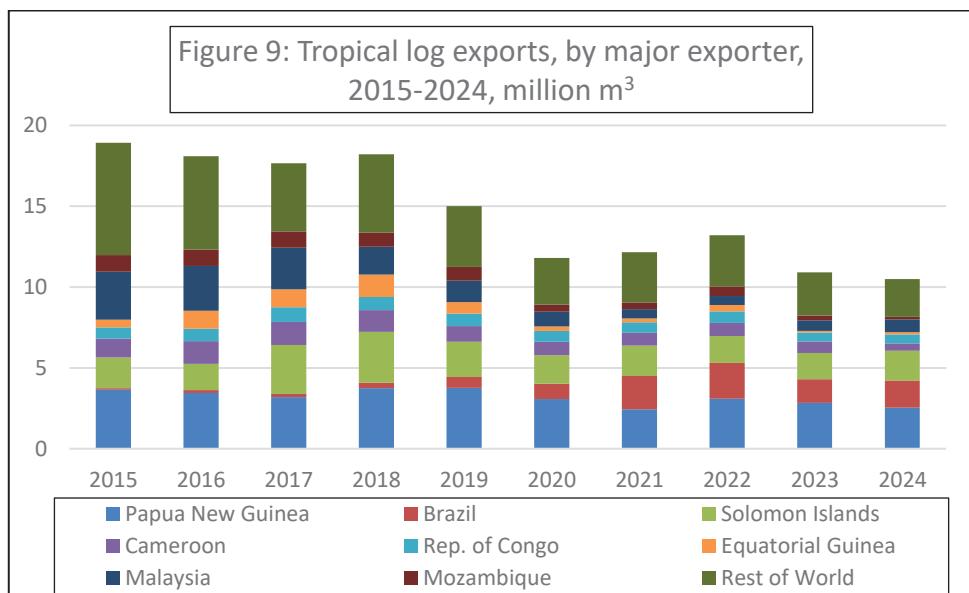

3 Primary Wood Products Exports

3.1 Tropical roundwood exports

In 2023, ITTO producer members exported 8.6 million m³ of tropical logs valued at USD 2 014 million, down 17 per cent by volume and 17 per cent by value compared with the previous year. Producer member exports are expected to contract further in 2024 to 8.0 million m³, with Cameroon and PNG accounting for most of the decline. World exports amounted to 10.9 million m³ in 2023, and also declined 17 per cent by volume year-on-year. The Solomon Islands and Equatorial Guinea, the major non-ITTO exporters, accounted for most of the decline (Figure 9).

⁷ Federal Register 2023. United States Department of Commerce. International Trade Administration. *Certain Hardwood Plywood Products From the People's Republic of China: Final Scope Determination and Affirmative Final Determination of Circumvention of the Antidumping and Countervailing Duty Orders*. A Notice by the International Trade Administration on [07/20/2023](#). Available at: <https://www.federalregister.gov/documents/2023/07/20/2023-15431/certain-hardwood-plywood-products-from-the-peoples-republic-of-china-final-scope-determination-and>

⁸ ITTO TTM Report: 28:3, 1-15 February 2024.

PNG, which has been the largest ITTO exporter since 2011, shipped 2.8 million m³ in 2023, 8 per cent less than the previous year, with the bulk of the volume (93 per cent) destined for China and the remainder to Asian destinations (Viet Nam, India and Japan). Tropical log exports from Brazil had escalated from a relatively negligible base in 2018 (at 0.383 million m³) to 2.23 million m³ in 2022, dropping in 2023 to 1.5 million m³. Exports are expected to rebound in 2024 to 1.7 million m³. Brazil's exports in 2023 were predominantly to Portugal (47 per cent), China (33 per cent) and India (13 per cent) with exports to Portugal and China being predominantly plantation eucalypt species and exports to India mainly plantation teak. In the Latin America/Caribbean region, other major exporters in 2023 were Ecuador (the second largest exporter from the region at 0.35 million m³) as well as Suriname (0.26 million m³) and Panama (0.13 million m³), with India and China the predominant destinations for these exporters.

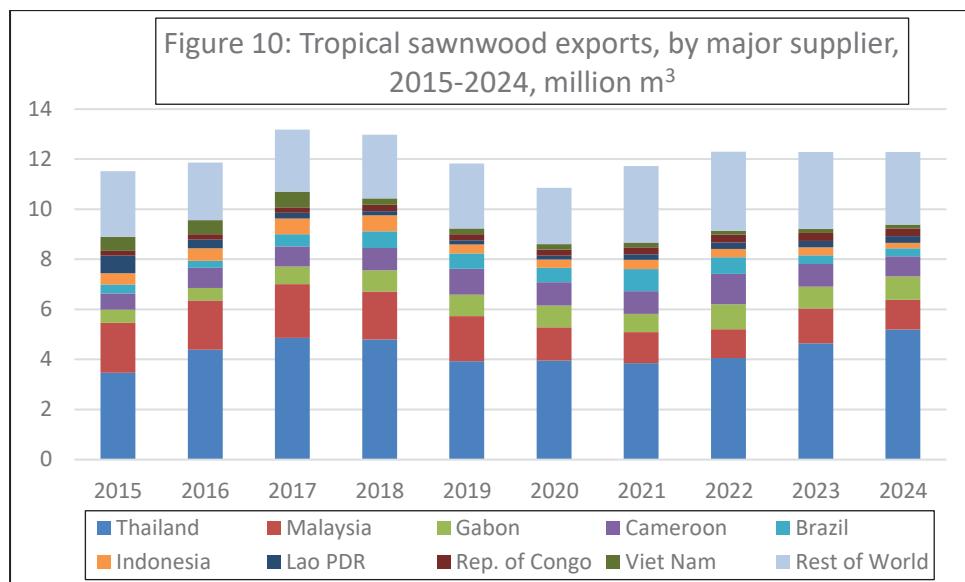

Tropical log exports from the ITTO Africa region have followed the same trend as other major suppliers, declining 20 per cent by volume in 2023 to 2.4 million m³ but expected to contract in 2024 to 1.9 million m³. Cameroon, Republic of Congo, Mozambique, Democratic Republic of Congo (DRC), Central African Republic (CAR) and Ghana were the major ITTO exporters from the African region in 2023, with China, India and Viet Nam the major export destinations. Nigeria and Equatorial Guinea were the largest non-ITTO exporters in 2013 but both countries' exports have declined significantly in recent years. Nigeria had previously been a major log exporter, with exports peaking in 2015 at 1.3 million m³, but the CITES suspension on commercial trade of *Pterocarpus erinaceus* from Nigeria, imposed in 2018, had effectively reduced exports to a minimal level. Equatorial Guinea's exports have contracted from a high of 1.4 million m³ in 2018 to 0.1 million m³ in 2013. A regional log export ban covering 6 of the CEMAC member countries – Cameroon, CAR, Chad, Rep. of Congo, Equatorial Guinea and Gabon - was expected to come into effect in January 2022 but has now been postponed to 1 January 2028, including a gradual phase-out beginning January 2025. If effectively implemented, exports from the region will be expected to contract from 2024, and some countries have already implemented log export restrictions in some form.

It is notable that non-ITTO member countries are also important tropical log exporters, with the Solomon Islands being the second largest exporter of tropical logs in 2023, exporting 1.6 million m³ and expected to increase to 1.8 million m³ in 2024.

Malaysia's log exports have been trending downwards over the last 10 years, reaching a low in 2022 of 0.5 million m² in 2022, the lowest recorded volume in ITTO's statistical records. In 2023, exports picked up slightly and reached 0.6 million m³, with the bulk of the export volume (83 per cent) destined for India and the rest to other Asian destinations (Taiwan P.O.C., China and Japan).

3.2 Tropical sawnwood exports

Tropical sawnwood exports by producer members have increased year-on-year since 2020. In 2023 exports amounted to 11.1 million m³, and in contrast to other tropical primary wood products, exports were up slightly on the previous year (Figure 10). Exports are expected to remain at about the same level in 2024. About 67 per cent of exports (7.5 million m³) were from ITTO producer members in the Asia-Pacific region, with total exports by ITTO producers reflecting trends in Thailand's exports, which comprised 42 per cent of ITTO producer countries' exports in 2023.

Most of Thailand's tropical sawnwood exports are plantation rubberwood and export trends reflect developments in China's secondary processed wood products industries, which absorb over 97 per cent of Thailand's exports. During the period 2019 to 2021, exports had dropped to relatively low levels by historic standards, and totalled 3.9 million m³ in 2021, with Thailand's rubberwood sector being severely affected by declining demand in China and by logistical supply issues from China's imposed measures to control COVID-19. However, exports have trended upwards year-on-year since 2021, reaching 4.7 million m³ in 2023, up 15 per cent by volume on the previous year.

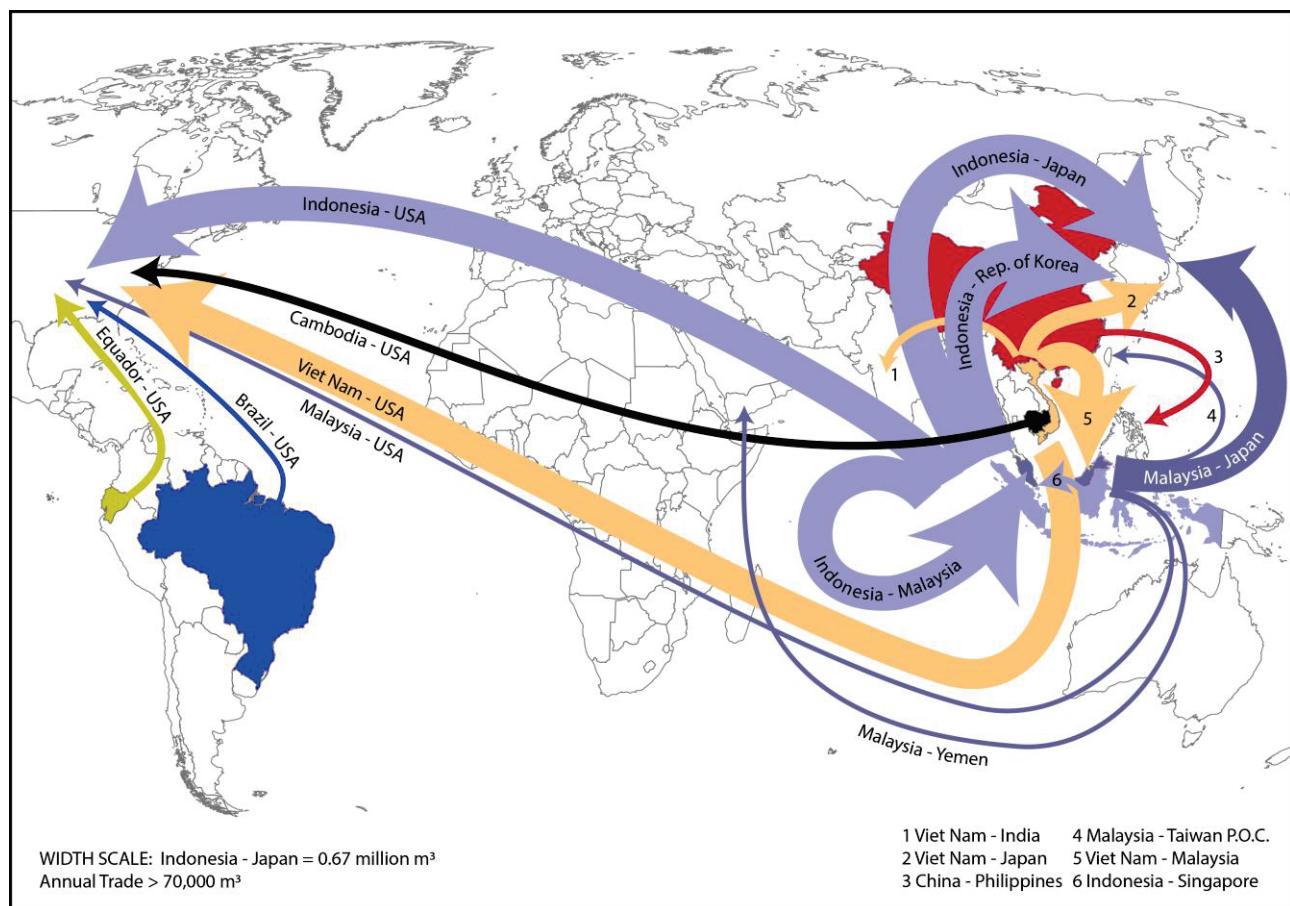

Malaysia's tropical sawnwood exports in 2023 totalled 1.4 million m³, up by more than 21 per cent on the previous year but significantly less than pre-COVID levels. In contrast to Thailand, Malaysia exports tropical sawnwood to a number of markets, with the major destinations being China (27 per cent), the Philippines (6 per cent), India (6 per cent), and Taiwan P.O.C. (5 per cent) although there were a significant number of other important markets. There continue to be significant discrepancies between the trade reported by major importers and exporters of tropical sawnwood, for countries that have reported data for 2023. Malaysia, for example, reported exports of 371,132 m³ to China in 2023, while China reported imports of 108,000 m³ from Malaysia in the same year. Similarly, exports reported by Myanmar in 2023 differ significantly to that reported by major importing countries.

Tropical sawnwood exports from the ITTO African region rebounded from a low in 2020 of 2.7 million m³, increasing year-on-year to 2022, when exports reached 3.6 million m³. In 2023, exports dropped 16 per cent to 3.0 million m³. The major exporters in 2023 were Cameroon and Gabon, together accounting for 60 per cent of ITTO Africa's exports. DRC, the Rep. of Congo, and Ghana also exported significant quantities (over 120 000 m³). Cameroon's exports were predominantly to Viet Nam, China, and EU destinations while Gabon supplied mainly the China market. The region's exports are expected to decline 3 per cent in volume to 2.9 million m³ in 2024. Tropical sawnwood exports from Latin America-Caribbean have declined year-on-year from 2021, plunging 37 per cent in 2023 to 0.69 million m³ and expected to decline marginally in 2024 to 0.61 million m³. Brazil accounted for 50 per cent of the region's exports, Ecuador 18 per cent, and Peru 13 per cent.

3.3 Tropical plywood exports

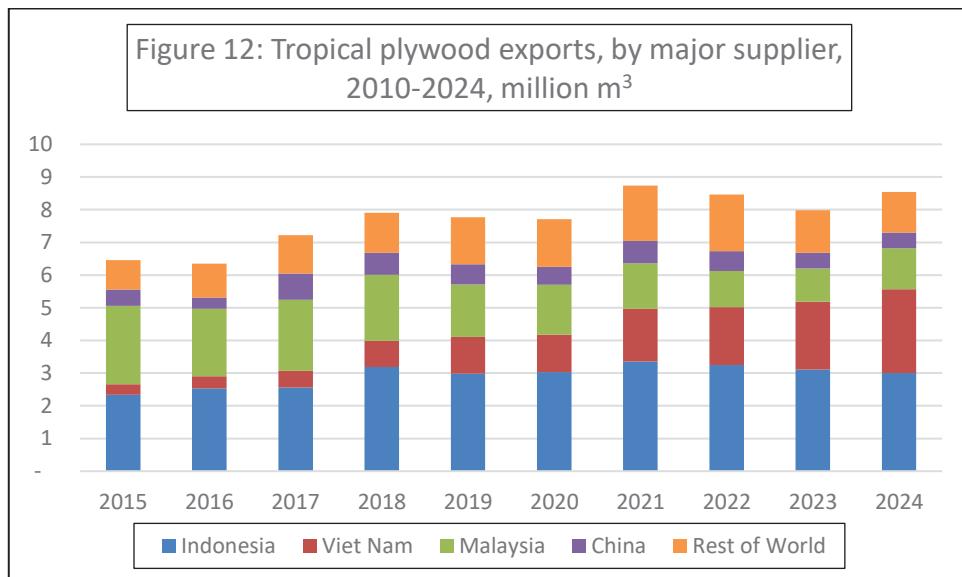

Figure 11 shows the major trade flows of tropical plywood in 2023.

Figure 11: Major Trade Flows: Tropical plywood, 2023 (million m³)

Tropical plywood exports from ITTO producer countries decreased year-on-year from 2021 to 2023. Exports reached a low in 2023 of 6.9 million m³ by volume and USD 3 933 million by value, down 4 per cent and 12 per cent respectively on the previous year. The Asia-Pacific region accounted for 93 per cent of the tropical plywood export trade in 2023. Indonesia was ITTO's largest exporter in 2023, accounting for 40 per cent of total ITTO producer country exports (Figure 12). The other major exporters in 2023 were Viet Nam (30 per cent), Malaysia (13 per cent) and China (6 per cent), with all the major exporters experiencing declining export volumes in 2023.

Indonesia's exports were mainly to Japan (22 per cent), Rep. of Korea (21 per cent), United States (19 per cent), Malaysia (19 per cent), United Kingdom (9 per cent), and the Netherlands (8 per cent). Over half of Malaysia's exports have been to Japan with significant volumes also shipped to the United States (7 per cent), Taiwan P.O.C. (7 per cent) and the Republic of Korea (7 per cent). Malaysia's exports continue to be affected by chronic log supply shortages, mainly due to policies to achieve sustainable forest management, in addition to rising raw material and manufacturing costs and weak demand in Japan, the major export market.

China was the only significant ITTO consumer country exporter, accounting for 50 per cent of ITTO consumer country exports (totalling 1.0 million m³), although exports declined year-on-year from 2021 to 2023. China's tropical plywood exports have been subject to a number of anti-dumping investigations in recent years. A recent investigation was initiated in October 2024 by the European Commission although the volume of tropical plywood imported by the EU-27 from China is relatively small. Indonesia, Malaysia, Viet Nam, and China accounted for 85 per cent of ITTO tropical plywood exports in 2023 and ITTO members accounted for 98 per cent of world exports.

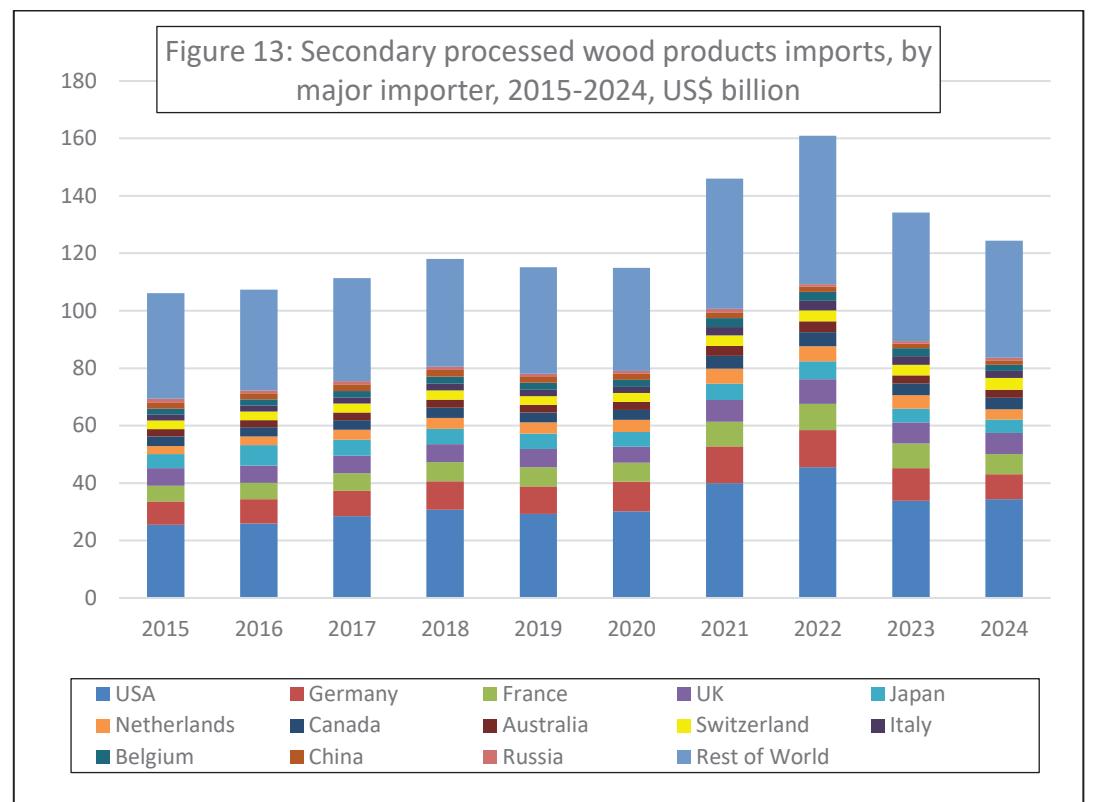

Viet Nam's tropical plywood exports have continued to grow over the last decade, with the exception of 2020 when growth had moderated. During that period, Viet Nam had benefitted from US trade measures imposed on some plywood imports from China and government measures to support the industry. In 2023, exports totalled 2.1 million m³, increasing 17 per cent on the previous year. Exports in 2023, as reported, were predominantly to the United States (25 percent), Malaysia (20 percent), Japan (14 per cent) and India (7 per cent). Viet Nam's exports to the United States, the dominant market, had plunged by 48 per cent in 2023, with Indonesia replacing Viet Nam as the major supplier.

4 Secondary Processed Wood Products Trade

4.1 Secondary processed wood products imports

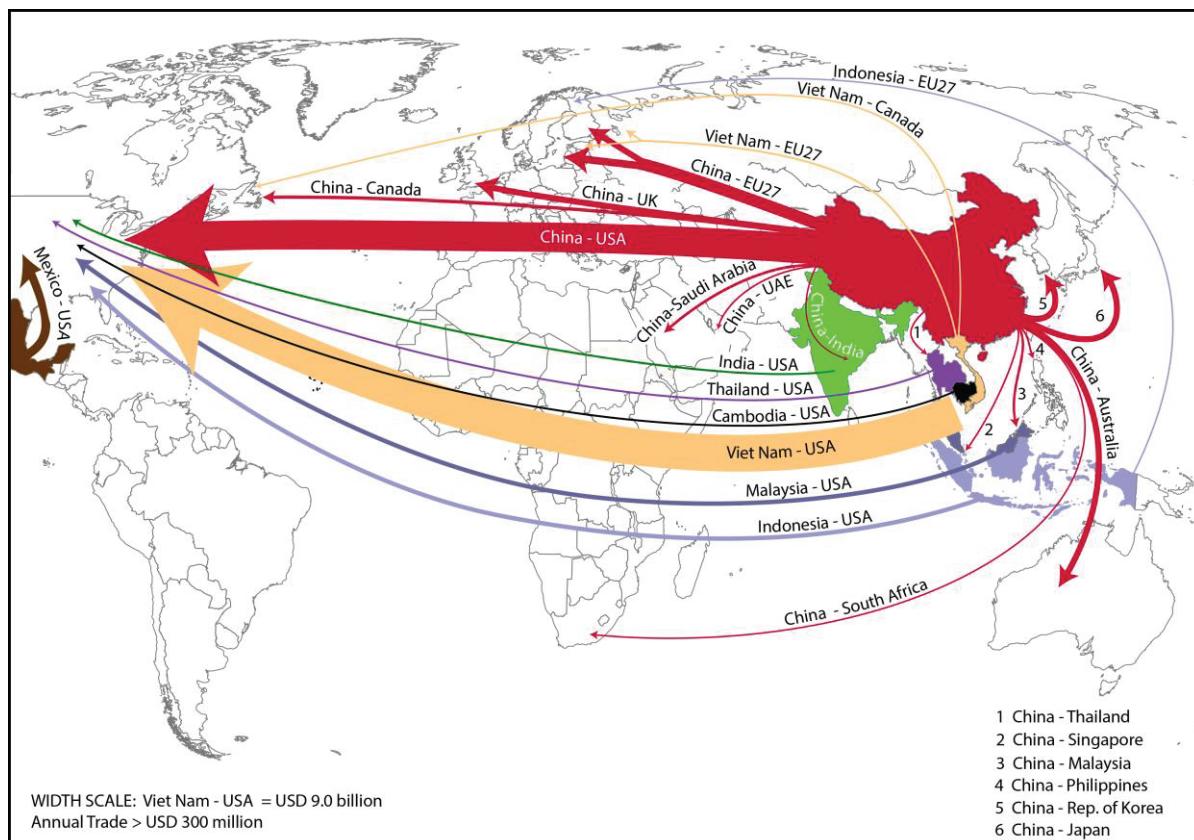

Secondary processed wood products are products which are composed of roundwood (logs) that have already undergone a primary conversion to sawnwood, veneer, plywood, and other intermediate products. Although tropical and non-tropical SPWPs are not differentiated in trade statistics, it is assumed that most of the trade in SPWPs from tropical countries is of tropical origin, based on limited imports of non-tropical wood by tropical countries. Reports on China's furniture manufacturing sector also indicate that a significant proportion of China's wooden furniture production is composed of tropical wood products.

The value of ITTO imports of secondary processed wood products (SPWPs) - nearly two-thirds of which was wooden furniture – totalled about USD 120.7 billion in 2023 and comprised the bulk (90 per cent) of world imports. The value of ITTO imports had soared between 2020 and 2022, reaching a high of USD 145.4 billion in 2022 in response to pent-up demand in major consumer markets, before declining by 17 per cent in 2023. Imports are expected to continue to contract to USD 111.9 billion in 2024 (Figure 13). The bulk of the trade in SPWPs continues to be between ITTO consumer countries, which accounted for about 79 per cent of ITTO exports and 94 per cent of ITTO imports by value in 2023.

Wooden furniture and parts constituted about 64 per cent of global SPWP trade, followed by 'other SPWPs' (16 per cent), builders' woodwork and joinery (13 per cent), mouldings (4 per cent), and cane and bamboo furniture and parts (3 per cent). Figure 14 shows the major trade flows in wooden furniture and parts from China and ITTO producer countries in 2023.

Figure 14: Major Trade Flows: Wooden Furniture from China and ITTO Producer Countries, 2023, (USD billion)

During the period 2020 to 2022, U.S. markets had driven the overall growth in the value of ITTO imports of SPWPs, particularly of wooden furniture and parts. U.S. imports of wooden furniture comprised over 31 per cent of ITTO imports and 28 per cent of world imports by value in 2023. Although the U.S economy had strengthened in 2023, wooden furniture imports contracted in 2023 by 26 per cent to USD 24.1 billion. This reflected weaknesses in the housing sector, with U.S. housing starts (single and multi-unit dwellings) continuing to fall since 2021, and in 2023 they declined by 9 per cent on the previous year to 1.42 million units⁹. According to the Joint Center for Housing Studies of Harvard University¹⁰, there have been numerous barriers to U.S. housing construction including high interest rates and rising inflation, the cost and availability of labour, the price of building materials, the cost and availability of land, and difficulties obtaining zoning or permit approvals. Existing home sales had also declined in 2023 in response to low housing stock, with housing affordability an issue amid high mortgage rates.

A significant proportion of U.S. imports of wooden furniture was from ITTO producer countries – Viet Nam, Mexico, Malaysia, Indonesia, India, Thailand, Brazil, and Cambodia among others - in addition to China, which was overtaken as the largest supplier by Viet Nam in 2019. In 2023, imports from Viet Nam and China comprised 37 per cent and 29 percent respectively of US imports of wooden furniture by value.

The value of EU-27's SPWP imports in 2023 was down 10 per cent on the previous year, and valued at USD 49.3 billion. Economic growth in the EU-27 had stagnated from the end of 2022, constrained by rising fuel prices, and rising interest rates, in addition to disruptions to global shipping. This had resulted in a decline in household purchasing power and consumer spending, and reductions in import demand. In 2023, new housing demand had declined significantly, with construction output contracting by 1.4 per cent, mainly caused by significant challenges in the new residential sector in 15 of 19 Euroconstruct countries, particularly Germany and Italy. Output is expected to contract by 2.7 per cent in 2024, with issues such as high interest rates, inflation and a rise in construction costs continuing to weigh on building construction in the EU-27. Construction output is not expected to recover until 2025, according to Euroconstruct¹¹.

Wooden furniture and parts comprised about 62 per cent of the EU-27's imports in 2023, followed by other SPWPs (19 per cent), builder's woodwork and joinery (13 per cent), mouldings (3 per cent) and cane and bamboo furniture and parts (2 per cent). Although a significant proportion of the EU-27's imports of wooden furniture are from intra-regional suppliers, imports from extra-regional suppliers are mainly from China and ITTO producer countries – Viet Nam, Indonesia, India, and Malaysia, with imports from all the major tropical suppliers down on the previous year. The EU Deforestation Regulation (EUDR), due to be implemented at the end of 2025, will present challenges to micro, small and medium-sized enterprises (MSMEs) in tropical exporting countries to comply with the stringent traceability requirements of the Regulation. While the EUDR will likely result in increases in operational costs for enterprises, there will be a competitive advantage in EU markets for those that are able to comply.

ITTO producers continued to import comparatively small volumes of SPWP products, which were valued at USD 7.1 billion in 2023, but were only 6 per cent of total ITTO imports. The major ITTO producer country importers of SPWPs in 2023 were Malaysia, the Philippines, Thailand, Mexico and Viet Nam.

4.2 Secondary processed wood products exports

ITTO consumers exported USD 104.9 billion of SPWPs in 2023, accounting for more than 79 per cent of ITTO member country exports which were valued at USD 132.3 billion. China provided about 27 per cent of ITTO SPWP exports in 2023 and the country's shipments were valued at USD 35.6 billion. Wooden furniture comprised the bulk (68 per cent) of China's SPWP exports. China's exports of wooden furniture had contracted in value in 2019 to USD 19.9 billion and had been affected by retaliatory tariffs on Chinese furniture imports (among other products) by the United States, the major export market. The restrictions

¹¹ https://www.euroconstruct.org/news/97th-euroconstruct-conference_press/

resulted in diversification of markets and some Chinese manufacturers shifting their production to Viet Nam and other Asian producer countries. Exports remained at that level in 2020 but increased in value by 28 per cent in 2021. Export growth moderated in 2022, with exports then contracting in 2023 to USD 24.1 billion. The major markets were the United States and EU-27 which absorbed 29 per cent and 13 per cent respectively of China's export value, with the United Kingdom, Australia, the Rep. of Korea and Japan importing 6 per cent each of China's exports. China's market destinations are more diversified than that of Viet Nam, which exports predominantly to the United States.

Following a 6-year period of significant growth in the value of SPWP exports by ITTO producer countries, exports plunged in 2023 to USD 27.4 billion, 27 per cent less than the value in 2022 (Figure 15). Asia-Pacific was the dominant ITTO exporting region, accounting for 80 per cent of producer exports, followed by Latin America (19 per cent). In contrast, Africa's SPWP exports have continued to remain at a relatively low level.

Most of the increase in value of SPWP exports from ITTO producer countries during the period 2017 to 2022 can be attributed to the rapid growth in Viet Nam's exports of wooden furniture to the United States, which had reached USD 11.9 billion in 2022 and was the highest value country-to-country trade flow in the world furniture trade. In 2023, however, Viet Nam's SPWP exports had contracted year-on-year to USD 12.2 billion, with exports of wooden furniture to the United States accounting for 82 per cent of the value, followed by EU-27 (4 per cent), Canada (4 per cent). Consumer demand in the U.S. and EU-27 had been constrained by limited economic growth, high inflation and high credit interest rates. Viet Nam's production of wooden furniture had been impacted by supply chain disruptions and high sea freight rates which had pushed up the prices of raw material inputs, increasing production costs while demand in export markets had declined.

After Viet Nam, ITTO producer countries including Malaysia, Mexico, Indonesia, Brazil, India, the Philippines, and Thailand were all significant exporters of SPWPs, with exports predominantly to U.S. and EU-27 destinations. Exports of builders' woodwork and joinery by ITTO producer countries totalled 2.9 billion in 2023, declining 16 per cent year-on-year. In contrast to exports from other major ITTO producers, which are mainly of wooden furniture and parts, SPWP shipments from the Philippines are predominantly builders' woodwork and joinery destined for Japan. They totalled USD 0.9 billion in 2023 and were 31 per cent of ITTO producers' exports of builders' woodwork and joinery. ITTO producers continued to play a more significant role in global mouldings exports compared with exports of other SPWP items, accounting for 37 per cent of world exports in 2023 and amounting to USD 1.7 billion. Brazil exported 36 per cent of ITTO producer country exports of mouldings, followed by Indonesia (27 per cent), Malaysia (11 per cent) and Viet Nam (8 per cent).

Table 1-1-a. Production, Trade and Consumption of All Timber by ITTO Consumers (1000 m³)

Figures in **bold** denote imports recorded by importing country. Figures in *italics* denote exports recorded by exporting country.

Notes about exporters

- + Papua New Guinea, Cameroon, the Rep. of Congo, Ecuador, the Dem. Rep. of Congo and the Central African Rep. did not report any data in COMTRADE for the year 2023.
- ** The Netherlands reported 180,440 m³ of tropical industrial roundwood imports to COMTRADE for the year 2023.

Notes about importers

- + Taiwan P.O.C. and the Rep. of Korea did not report any data in COMTRADE for the year 2023.
- ++ Mozambique reported 69,228 m³ of tropical industrial roundwood exports to COMTRADE for the year 2023.
- +++ Suriname reported 367,778 m³ of tropical industrial roundwood exports to COMTRADE for the year 2023 of which 367,696 m³ were exported to Area, nes.
- ++++ Ghana reported 830,907 m³ of tropical industrial roundwood exports to COMTRADE for the year 2023.
- +++++ Panama reported 235,360 m³ of tropical industrial roundwood exports to COMTRADE for the year 2023.

Figures in **bold** denote imports recorded by importing country. Figures in *italics* denote exports recorded by exporting country.

Notes about importers

* Taiwan P.O.C. and the Rep. of Korea did not report any data in COMTRADE for the year 2023.

** The United Kingdom reported 869,266 m³ of tropical sawnwood exports to COMTRADE for the year 2023.

++ Thailand, Cameroon, Gabon, the Dem. Rep. of Congo, Indonesia, the Rep. of Congo, Viet Nam and Ecuador did not report any data in COMTRADE for the year 2023.

+++ Brazil reported 256,422 m³ of tropical sawnwood imports to COMTRADE for the year 2023.

++++ Myanmar reported 116,739 m³ of tropical sawnwood imports to COMTRADE for the year 2023.

Figures in **bold** denote imports recorded by importing country. Figures in *italics* denote exports recorded by exporting country.

Notes about importers

* The Rep. of Korea and Taiwan P.O.C. did not report any data in COMTRADE for the year 2023.

** India reported 827,067 m³ of tropical plywood imports to COMTRADE for the year 2023.

*** The United Kingdom reported 2,096,396 m³ of tropical plywood imports to COMTRADE for the year 2023.

**** The Philippines reported 293,616 m³ of tropical plywood imports to COMTRADE for the year 2023.

***** The Netherlands reported 2,352,891 m³ of tropical plywood imports to COMTRADE for the year 2023.

Notes about exporters

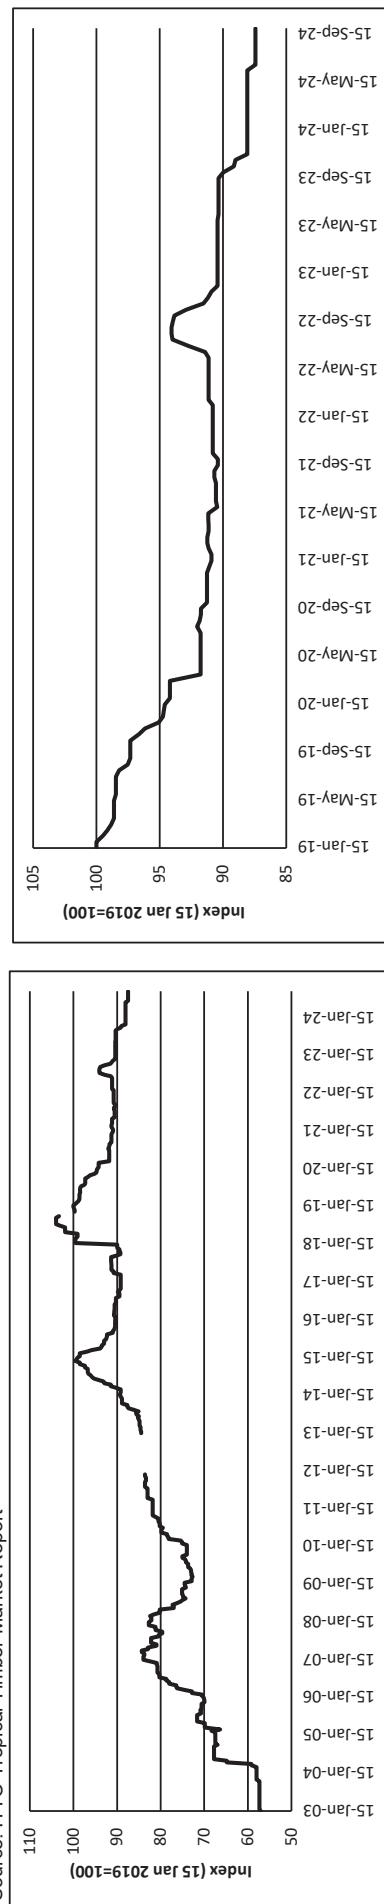

+ Indonesia, Viet Nam, Ecuador, Cambodia, Gabon and Thailand did not report any data in COMTRADE for the year 2023.

++ Cameroon reported 2,429,630 m³ of tropical plywood exports to COMTRADE for the year 2017.

4-1. Tropical Industrial Roundwood Price Indices

4-1-a. West Africa industrial roundwood average export price index*

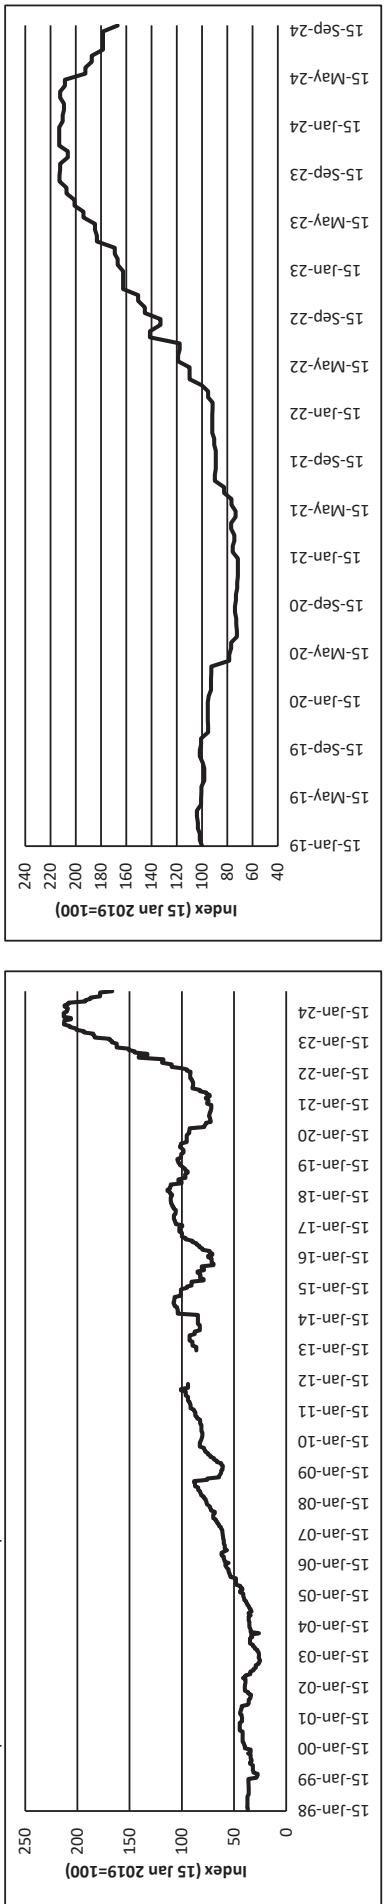

The Index is based on two-weekly nominal euro prices/m³ of acajou, ayous, azobe, belli, bibolo, dibétou, ekki, iroko, kaha, n'gallon, obeche, okan, okoume, maobi, movingui, niove, padouk, sapele, sipo, tali, utile and wawa logs (loyale Merchant/B/B/C/C grades).
Source: ITTO Tropical Timber Market Report

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-1-b. Brazil domestic logs price index*

The Index is based on two-weekly nominal dollar prices/m³ of ipê, jatoba, massaranduba, mirracatira, angelim vermelho, mixed redwood and white woods logs.
Source: ITTO Tropical Timber Market Report.

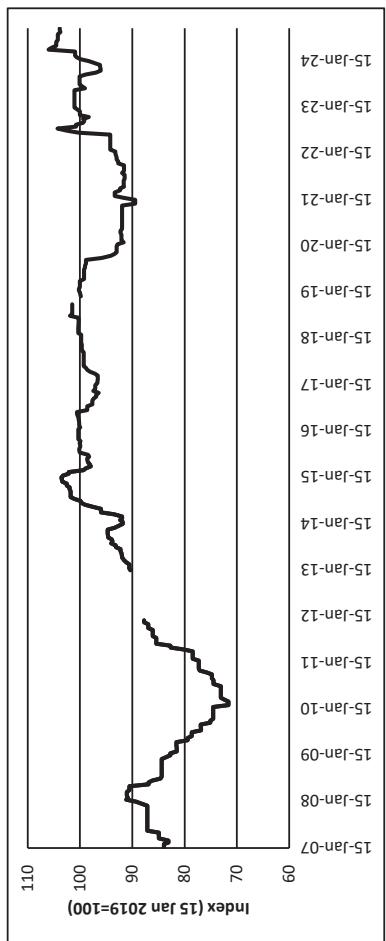

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-2. Tropical Sawnwood Price Indices

4-2-a. West Africa sawnwood average export price index*

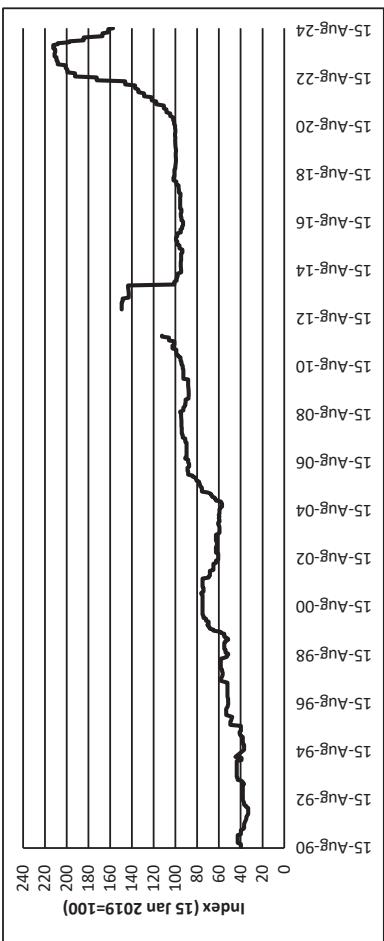

The index is based on two-weekly nominal euro prices/m³ of ayous, bilin  , iroko, moabi, movingui, padouk, okoum  , sapele and sipo sawnwoods (first and second grades).
Source: the ITTO Tropical Timber Market Report.

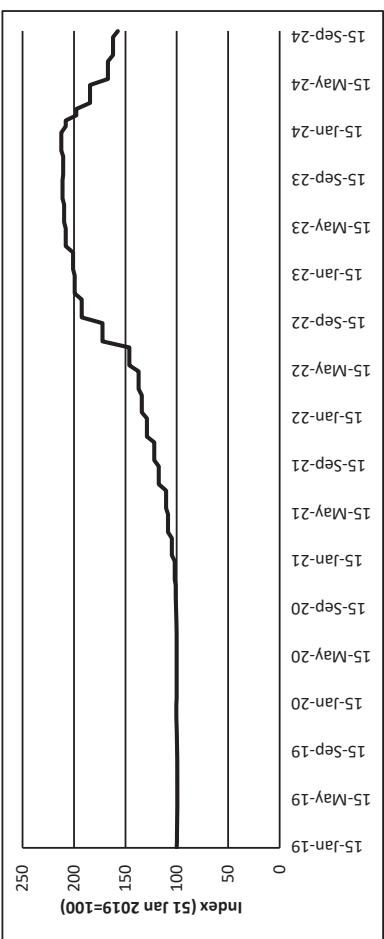

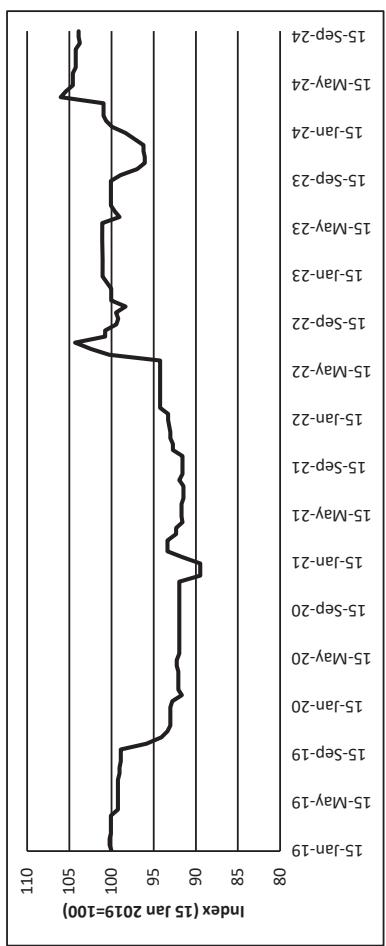

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-2-b. Brazil sawnwood export price index*

The index is based on two-weekly nominal dollar prices/m³ of latoba sawnwood.
Source: ITTO Tropical Timber Market Report.

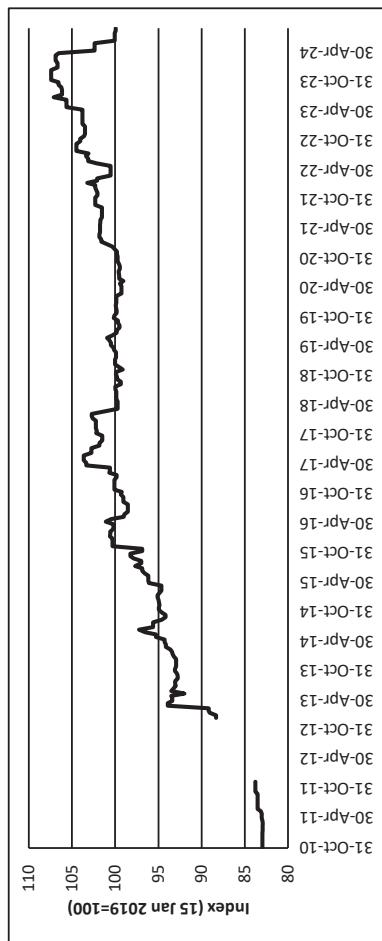

*Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-3. Tropical Plywood Price Indices

4-3-a. Ghana plywood average export price index*

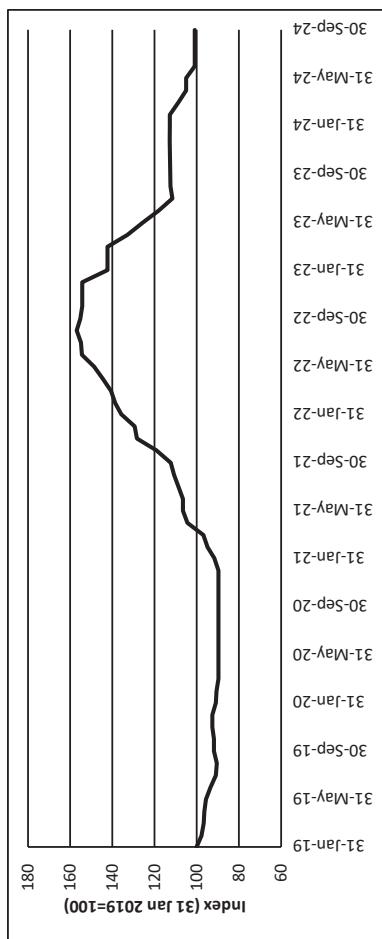

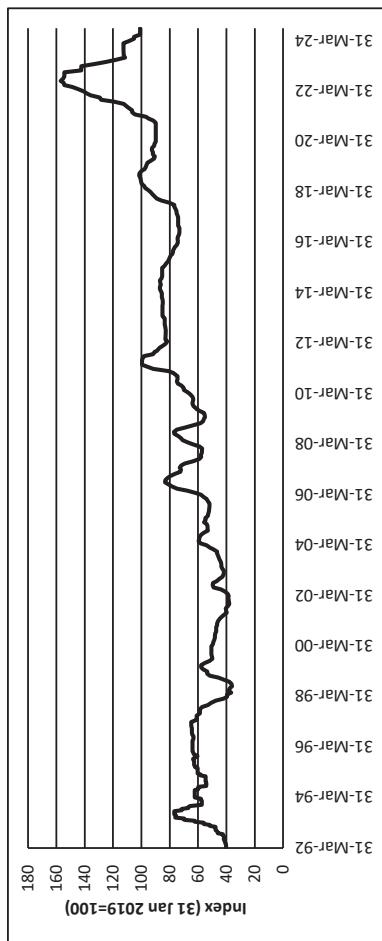

The index is based on two-weekly nominal euro prices/m³ of plywood made of ceiba (BB/CC grades 4/6/9/12/15/18mm), ofram (BB/CC grades 4/6/9/12/15/18mm) and asanfina (BB/CC grades 4/6/9/12/15/18mm).
Source: ITTO Tropical Timber Market Report.

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-3-b. Japan Indonesian plywood average import price index

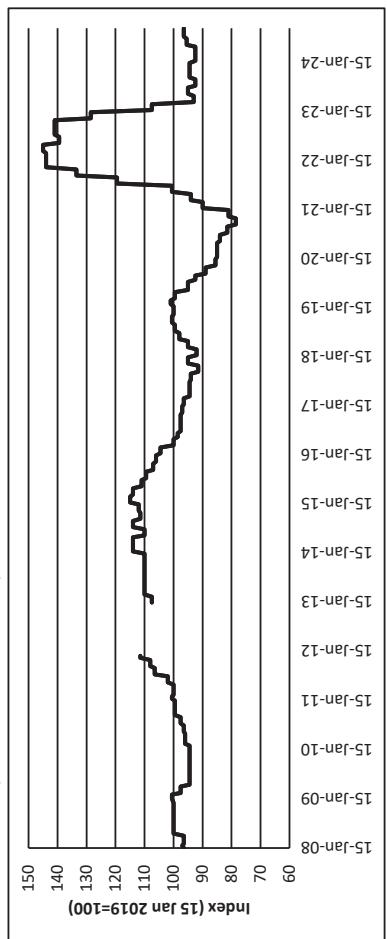

This index is based on two-weekly nominal dollar prices/m³ of Indonesian panels for concrete formwork (12 mm 3'x6' JAS C&F), Indonesian floor bases (3'x6' JAS C&F) and Indonesian thin panels (3'x6' JAS C&F).
Source: Japan Lumber Reports.

4-4. Softwood Sawnwood and Plywood Price Indices

4-4-a. Brazil pine sawnwood export price index*

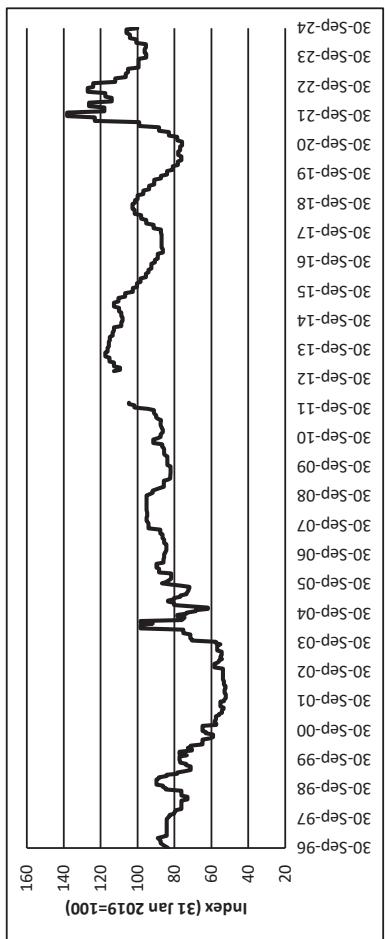

The index is based on two-weekly nominal dollar prices/m³ of pine (kiln dried) sawnwood.
Source: ITTO Tropical Timber Market Report.

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.

4-4-b. Brazil pine plywood export price index*

The index is based on two-weekly nominal dollar prices/m³ of 9mm, 12mm, 15mm and 18mm pine plywoods (C/CC grades, water and boil proof) exported to the EU market.
Source: ITTO Tropical Timber Market Report.

* Price data is unavailable from 15 January 2012 to 15 January 2013 due to the suspension of the Tropical Timber Market Report during 2012.
