# Sustainable Forest Management Through REDD+ Mechanisms in Kampong Thom Province

[www.facebook.com/FA.ITTO.REDDPlus](http://www.facebook.com/FA.ITTO.REDDPlus)

Executing Agency: Forestry Administration  
Financial Support from the Government of Japan

## Livelihood Development Activities

- 2,250 efficient cook stoves were distributed to the CF members.
- 4 Good Agriculture Practice (Good Agriculture Practice – GAP) demo sites were established.
- 296 farmers received trainings on various GAP related topics; i.e. safety vegetable, pesticide, fertilizer and soil quality improvement.
- 15 farmers learned about GAP practices through study tour program.
- A water reservoir tank was constructed for storing usable water in Sraechang Village, Sandan Commune and District, KT Province.

## Capacity Building CFMC and CF Members

- Community Forest Management Committee (CFMC) from the project target CFs received two separated training workshops to strengthen the capacity; (1) role of community forest in sustainable forest management and (2) right of CF in the forestry law.
- Patrollers of the 3 CFs received trainings on using GPS and SMART.

Bunch of documents and technical reports were developed and published.

1. Drivers and agents of deforestation and forest degradation in Tumring, KT Province.
2. Development of adjusted forest reference emission level at KT Province.
3. Review and lesson learned from REDD+ project development in Cambodia.
4. The assessment of existing benefit sharing mechanisms in forestry and REDD+ project forward designing an effective national REDD+ incentive allocation in Cambodia
5. Design, implement and monitor safeguard SFM through REDD+ mechanisms in KT Province
6. Development a commercialization and sustainable financing strategy for REDD+ in Cambodia

Find full report at: [https://www.itto.int/project/id/PD740\\_14-Rev.2-F](https://www.itto.int/project/id/PD740_14-Rev.2-F)

## Awareness Raising

Conducted awareness raising on "climate change mitigation and adaptation as well as REDD+ mechanism for the solution" to farmers in the project areas.

## Supporting on Community Forestry (CF) Patrol

- Ceased 90 cases of illegal activity.
- Protected of encroachment, approx. 110 ha.
- Confiscated 50 m<sup>3</sup> of timber, 11 chainsaws, 6 Koyuns, 190 wildlife traps, and 40 steers of firewood.
- Provided 15 signboards of CF boundary.

## Supporting on Restoration Degraded Areas

Distributed multi-species of trees to targeted CF in the project site to restore forest degraded area.

## Development Objective

Contribute to the sustainable management of forest resources in Kampong Thom (KT) Province in Cambodia through the reduction of deforestation and forest degradation.

## Objective

Establish REDD+ research and development, and training programs in the Tumring Forest to facilitate the achievement of Sustainable Forest Management in KT Province.

## Outputs

1. Stakeholders understand and knowledge of REDD+ improved.
2. Research program on REDD+ in the Tumring Forest in Kampong Thom Province developed and implemented.
3. REDD+ guidelines and training programs strengthened for effective design and implementation of REDD+ activities.

## Project Launching Ceremony

## Organized meetings of PSC and PTC

Organized Project Steering Committee (PSC) Meeting

Organized Project Technical Committee (PTC) Meeting
