### **3.0 CONCLUSION**

The stakeholders' engagement was successfully conducted. The local community representatives and relevant agencies were briefed accordingly on the status of the UBFA project. Reports on existing ITTO project activities were also presented. The activities plan for the new ITTO project was shared and discussed with the stakeholders.

The primary outcome of the stakeholders' engagement was a list of potential activities to be conducted under the community upliftment, as well as information on possible sites to be studied as a pilot community-based conservation area. The most feasible activities to be conducted under community development activities, which have been incorporated into the YPO of the new project (PP-A/60-367), are listed below:

- a) Clearing of the jungle trek and repairing of a small bridge connecting Long Main to Long Lellang village.
- b) Upgrading of sanitary facilities at the Ba Data Bila Meeting Hall.
- c) Construction of a footpath and a small bridge connecting Long Banga village to Long Banga airstrip.

The community were also informed that some of their requests for upgrading basic needs may be addressed through other sources of funding to be implemented by the Forest Department of Sarawak.
