<i>Sapelli</i>	<i>85,000</i>
<i>Iroko</i>	<i>58,000</i>
<i>Sipo</i>	<i>95,000</i>
<i>Padouk</i>	<i>55,000</i>

In September the Government of the Ivory Coast banned logging north of the the 8th parallel which will have a dramatic impact on the supplies of Iroko. Prices for sawn Iroko have risen and are now at around Ffr2750 per Cu.m FOB air dry. Sapelle continues to be the most popular redwood in the UK market and prices are firm at around Ffr2800 per Cu.m.

<i>super small</i>		<i>US\$145-155</i>
<i>Kapur SQ Floaters</i>		<i>US\$230-235</i>

In Sabah in response to requests from log exporters, royalty rates on the certain species have been lowered. With the exception of Belian, Agathis and Merbau, the royalty rate as been set at RM230 per Cu.m instead of the earlier RM300. The rate of RM600 remains for Belian and at RM 500 fro Agathis and Merbau.

Efforts are underway to reach agreement with log exporters in Sarawak to harmonise prices and to find ways to compete more effectively with African log exporters.

The Finnish Enso Group has entered into agreement with two Indonesian partners to develop a 100,000 ha. tree plantation on the Sanggau and Siniang timber states in West Kalimantan. Within 5 years an annual supply of 500,000 tonnes of wood for a new pulp mill will be produced.

Domestic Log Prices

Report from Malaysia

Report From Brazil

Logs at mill yard	per Cu.m
Mahogany 1st Grade	US\$420
Ipe	US\$80
Guaruba	US\$40
Mescla(white virola)	US\$46

Logs	Per Cu.m
Domestic (SQ ex-log yard)	
Meranti Bukit (SQ)	US\$240-250
Kembang Semangkok	US\$180-190
Merbau	US\$190-200
Peeler Core logs	US\$135-140
Rubberwood	US\$32-34
Kempas	US\$150-155
Keruing	US\$190-200

Ghana

The log supply situation has not improved as the rains are hampering logging operations. Odum (Iroko) logs are becoming difficult to secure. The cut in supply of Odum from Ivory Coast is putting pressure on Ghanaian producers.

Sawnwood Prices

Logs FAQ	Per Cu.m

Kussia/Billina	70cm + US\$50
Guarea	60cm + US\$60
Chenchen	70cm + US\$45
Cedrella	50cm + US\$45

International Prices

Brazil

No major change was detected by exporters, in either prices or volumes. Most companies have a feeling that the market will continue to be stable and that it is, in general, now better than last year.

The rain season is starting in the Amazon region and the production of veneer and tropical sawnwood will be declining. As a result prices are projected to increase after holiday period is over, that is in the second half of February.

Consumers Report

Report From Japan

The weakening Yen continues to push up the price of imports. The markets for imported wood products are becoming sensitive to the Yen exchange rate. The trade is reportedly satisfied it has enough orders placed and will now wait to see how the Yen moves. Orders for November shipment are high and imports will be above the 500,000 Cu.m level, the highest monthly import for the whole year.

Home Furnishing Imports

Japanese consumers are well known for being strict about product quality, and furniture is no exception. Buyers have sharp eyes for detail, often to a degree which non-Japanese suppliers have difficulty imagining. Japanese consumers also tend to expect the underside of a table and the back of a chest of drawers to be as well finished as the visible part. Japanese traditionally appreciate making hidden parts beautiful. What is most difficult about Japanese consumers is that they often expect the same quality of finishing for a Yen 10,000 chest as one for Yen 100,000.

Despite these consumer demands Japan's furniture imports have increased steadily. Japan imported US\$1.5 billion worth of furniture from January to June this year, a 30 percent increase over 1995.

The main reason claimed for the increase in imports is price. Domestically made furniture has to bear the high cost of Japanese labour and materials, as a result imported furniture is relatively inexpensive compared to Japanese furniture. Japan's furniture imports from other parts of Asia have increased dramatically. Asian-made furniture is designed and manufactured specifically for the Japanese market. There has also been a steady increase in European and American furniture imports into Japan. The experience with imports so far seems to indicate that the Japanese consumer prefers European rather than American furniture for its designs and dimensions.

One of the main features of the Japanese market is that there is a strong feeling for wood, appreciating fine-grained wood. Scandinavian plain wood furniture was popular soon after its introduction in the 1970s because it presented the beauty of wood and it suited Japanese houses and the Japanese lifestyle. Simple furniture with a natural style sells well in Japan. Decorative furniture, for example, a table with a lot of carving, would not suit the Japanese decor. Other popular items in the Japanese market is furniture of a honey-color wood often combining different materials for example a table with iron legs and a wooden top.

The general prospect for the industry in Japan is bright. Although the Japanese economy is said to have not yet fully recovered, people are buying furniture and interior accessories.

Japanese baby boomers' children are now in their early 20s, and this group is beginning to marry and will be buying furniture. A sizable demand is expected in around five

years time. The new generation, which grew up in affluent Japan, is very selective when it comes to choosing products. Most people of the older generation bought furniture for its function, but the new generation seems to be selecting furniture for its comfort. To attract such consumers, a new kind of shop has become popular in Japan. Often called a "lifestyle shop", furniture retailers have started to create such outlets to give an idea of how each item they sell would help create a stylish and comfortable lifestyle for their customers.

(Based on a presentation by a Mitsubishi Corp spokesman)

Report From China

Prices for Imported Tropical Wood Products in Shanghai and Eastern China November 1996 (Yuan/cubic metre or per sheet)

	Per Cu.m
Keruing Log	
Length: 6-20m	1800-2400
Mengaris Log	
Length 6m+	1800-1900
Malaysian Lauan Log	
Mixed	2500-2600
Malaysian Lauan with hollow heart	
Mixed	1200-1400

Lauan lumber	
Thickness: 5-6cm	
Length: 3-4m	2850-3450
Lauan tongued, grooved flooring strip	
18mmx50-70mmx3m	110-125pc
Malas tongued, grooved flooring strip	
18x70mm x2.2-4.1m	110-125pc
Plywood from Malaysia	per sheet
12mm	3.6-4.0
18mm	4.8-5.0

Pulp Project in China

In order to promote the development of forestry and the paper making industry of China and to upgrade the county's pulp and paper industry the State Council of China has planned to set up large scale wood pulp plants during the Ninth Five-Plan period.

Mr. Li Yucai, Deputy Minister of the Ministry of Forestry and Deputy Governor of Guangdong Province recently signed a memorandum of agreement on establishing a wood pulp plant with annual yield of 300,000 ton respectively. Other signatories to the agreement were Mr. Chen Xinghua, General manager of the General Development Company of Chinese state-owned forest farm and Mr. Li Zhuyao, Deputy Director of the Forestry Department of Guangdong Province (who signed the agreement document and agreed to change the current management system of Laizhou Forestry Bureau. Mr. Xu Youfang, Minister of the Ministry of Forestry attended the ceremony with other leading cadres from the Office of the State Council, National Plan Committee, Committee of National Economy and Trade.

China, Singapore Joint Venture

A paper mill project between the General Light Industry Company of Zhenjiang city, Jiangsu Province and Asian Pulp Ltd. of Singapore has been approved by the State Council of China. The plant will be located in the Development Zone of Dagang, Zhenjiang city. The enterprise involves an investment of Yuan 15.1 billion, of which 80% will be provided by the Singaporean partner. Annual sales are expected to top Yuan 8.76 billion, and profit and tax payments of Yuan 2.8 billion are expected when the plant is at full capacity.

The project is located near Da Harbour and incorporates port facilities, a power station and water supply facilities which are to be established by the joint venture.

Oil Palm Board Developed

In 1994, a Sino-Malaysian joint project was initiated to develop multi use panels made from oil palm, the oil palm material was provided by Malaysia and research was conducted by Fujian Forestry college. The research covered palm fibre gypsum board, particleboard of palm fibre and MDF of palm fibre. The palm fibre board was found to have good strength and was yielding a smooth board.

MDF Mills in Yunnan

Yunnan Province contains one of China's important forested areas. The forest products industry in Yunnan has not been developed because of the long distance between Yunnan and the main consuming markets in China and because of the poor infrastructure. In 1995, the sawnwood production in Yunnan was only 460,000

Cu.m, plywood production was 78,000 Cu.m, particleboard production was 58,000 Cu.m...

Because of the growing national demand for MDF, 2 MDF plants with equipment made in Shanghai have been established. The annual capacity of these plants is expected to reach 45,000 Cu m. In addition, 8 MDF plants, with total design capacity of 245,000 Cu.m are being set up. One of them is a plant with an annual output of 60,000 Cu.m. This plant is to be located in Simao and will use German equipment. The Yuqi MDF plant, with annual production capacity of 50,000 Cu.m will use Siempelkamp equipment, the other plants will use equipment made in China.

From Europe, An Update on Germany

In 1996 industrial production of furniture in Germany is estimated to decline by around 3% and the negative trend is expected to continue throughout 1997.

In recently released figures it is emerging that 1995 was the third year of serious recession in the German furniture industry. There has been a noticeable drop in production (down 3.8% in volume), this was due to a decline in both domestic demand (down 1.9%) and exports (down 3%), while imports showed only modest growth (up 1.8% in volume).

In company news, Dodenhof, the large German furniture dealer, will invest DM 100 million in a new furniture store, with 35,000sq metres selling space, in Hamburg-Kaltenkirchen.

Ikea Deutschland, which has 22 outlets in Germany, posted an increase in turnover to DM 2.4 million in the fiscal year ended 31 August 1996. Next year Ikea will open new stores in Hanau, Sindelfingen and Ludwigsburg in addition to a DM 90 million distribution centre in Erfurt. The Erfurt centre will have a staff of 100 and a space of 73,000 sq metres and is set to be inaugurated in late 1997.

Prices in Germany

Wooden Windows

<i>Medium Price Meranti,</i> 120x135cm	DM448
<i>Lower Price PVC,</i> 120x135cm	DM388

Lowest Price, Alder	DM41

News from Other European Countries

The UK hardwood trade is reporting that the upturn in business of the past months has been sustained as demand has improved however prices are still very competitive. Joinery and the furniture sectors are both reporting an improvement and this has spurred demand. If the improvement in sales continues then some people may find themselves short. Gaps are already appearing for some West African timbers.

Furniture production in Switzerland is about DM 1.3 billion per year, of which tables and chairs account for 30%. Exports (about DM 0.9 billion annually) go mainly to Germany (43.2%), which provides 40% of Switzerland's furniture imports (DM 2.7 billion). Since 1990 the Swiss furniture retailers' turnover has fallen from Sfr 4.1 billion to Sfr 3.7 billion, and a further 5% decline was recorded in the first six months of 1996

In 1995 Spanish furniture production increased by 11.5% to Pta 726 billion. Exports were worth Pta 124 billion (up 36% on last year). The positive trend has continued in the first half of 1996, with exports growing by 11.6% to around

Pta 72.8 billion. Growth is slowing in traditional markets, but success is being registered in new markets, especially Russia and Japan.

Company News

HNB, the UK office furniture company located in Newmarket which went into receivership, has been sold to fellow office furniture group Samas Roneo, the UK arm of the Dutch Samas Group. Samas Roneo has UK sales of ú35 million.

Ets Fournier of France, has acquired a majority stake in Sarila Italia, Italian kitchen furniture manufacturer. Sarila, which produces high quality furniture, has a turnover of Ffr 23 million and a staff of 28.

New Plan Furniture (Bradford), production and contemporary furniture manufacturer, has finished building an 80,000 sq ft factory and reorganisation of the manufacturing line will be completed by the end of the year. The new factory will enable the firm to increase its output by 30%.

US Industry Report

The lumber industry has experienced a continuous decline in production since early 1995 due to a general lack of sawmill profitability. This long-term trend is now being further reinforced by adverse weather conditions and other seasonal factors.

While in October there were a few good weeks for logging, wet weather deterred harvesting in certain regions during November. December production of hardwood logs is always far below the average monthly production. This is the result of several factors: a reduced number of working days due to the holiday season, time lost due to hunting in some regions, no or little logging during year end inventory taking, and last but not least production slowdowns due to cold weather and the associated frequent malfunctioning of the logging machinery.

The slow down in production comes at a bad time for the industry as business conditions are improving and there is a higher demand for hardwoods by most endusers. In particular, furniture manufacturers are buying more lumber in order to meet their increased production schedules. These conflicting trends are likely to result in shipping delays and growing supply problems this winter. In North Carolina and the Lake States hardwood log supplies are critical and higher log and lumber prices can be observed already.

Between December 1996 and March 1997, the industry is likely to experience volatile markets. The prices paid for hardwood lumber varies between regions and species and will depend upon the weather this winter. The strongest price increases are to be expected for Hard and Soft Maple and Cherry. Prices for Yellow birch, being a substitute for Hard Maple, will also be influenced by the shortage of Hard Maple. The supply of Red and White Oak is not critical and price may firm to a lesser extent than for other popular hardwood species. Presently, kiln dried Appalachian Red Oak lumber trades within a range of US\$ 1310 and US\$ 1495 per MBF (1" FAS).

Rough Sawn Hardwood Lumber
Appalachian Red Oak
 kiln dried, FAS
 US\$1,470 per MBF

Dressed Hardwood Lumber
North American Species
Appalachian Oak
 planed 2 sides US\$1,535 per MBF

Hardwood Dimension Stock
Appalachian Red Oak Strips
 random length, clear 1 face and 2 edges
 6" to 16' 10% 4'-5' US\$1,477 per MBF

Lumber, Genuine Mahogany
Bolivia, Brazil, Honduras
Select or Better 1 ins Stock
Dock side US West Coast
 Kiln Dry US\$2530 per MBF
 Air Dry/Green US\$2360 per MBF

Lumber, Philippine Mahogany / Meranti
Kiln Dried, kiln dried
Dock side US West Coast
 LR Meranti US\$050 per MBF
 DR Meranti US\$2185 per MBF

Industry sources are anticipating that demand by the furniture industry for genuine Mahogany will also increase. Prices for Mahogany should continue to be firm for the next six months, as many manufacturers are concerned about the quantity of Genuine Mahogany that will be available

later in the winter. The supply of Mahogany from Brazil for the next season is uncertain, and some importers are scrambling for more lumber from Bolivia. An increase in imports of redwoods from Africa may somewhat alleviate the expected short supply from Latin America.

Plywood and Veneer

Hardwood Plywood
Red Oak plywood, 5-ply, lumber core
cross bands of poplar or gum
Both exterior layers of Red Oak
Furniture grade, rotary cut 4' x 8' 0.75" thick
 US\$49.95 per Sheet

Veneer Red Oak, 1/45", flat stock,
Container loads/truck-loads
 US cents 9.5 - 14.5 per sq.ft.

Reconstituted Boards

Particleboard
Industrial grade board, 4' x 8' x 3/4"
South Central Region
 US\$278 per 1000 sq.ft

Medium Density Fibreboard
Industrial grade board, 4' x 8' x 3/4"
 US\$378 per 1000 sq.ft

Millwork

 US\$475.00

Desks for use in the Office
 Conference desk 5 drawers
 Mahogany veneer on particleboard.
 72" x 36", Ht. 29"
 US\$895.00

Wooden Furniture

The most popular timbers in the European hardwood market are those with a light colour and this applies to virtually all enduses. The most favored species are light coloured, good quality beech, birch as well as maple. Ash seems to be at its lowest point and the demand for oak shows little sign of recovery.

Dining Room Table
 18th century, French oval dining room table
 extendible, with casters
 Mahogany veneer on particleboard 64" x 44"
 two 15" leaves, extends to 94", Ht.
 30" Apron to floor 26.5"
 US\$608.00

Dining Room Chair
 18th century French Mallard chair Solid Maple
 21" x 22", Ht. 44.5" Seat 21" x 17.75, Ht. 18"
 US\$186.00

Bookcase for the Living Room
 18th century traditional styled bookcase
 Sheraton accents.
 Base 2 doors one adjustable shelf behind doors
 Top cabinet deck 3 adjustable wood shelves.
 Maple solids and select cherry veneer
 Hand-rubbed cherry finish.
 50.25" x 16.5", Ht. 88.5"
 US\$795.00

US Secondary Products Exports to Japan

A recent report from CINTRAFOR of the US provides statistics indicating a 200 percent increase in secondary manufactured products exports to Japan since 1989 with an 80 percent gain in 1995 over 1994 alone. Doors, windows, joinery products, fabricated structural products, structural panels, pre-fabricated homes, and cabinet markets all experienced strong growth.

The cause of this boost can be traced in part to Japan's decision to deregulate its housing and building materials markets to lower the cost of new homes. The Japanese government has launched a very active program to increase both building component imports and completed ready-to-assemble homes.

The report emphasises the importance of the change in Japan's construction standards as they move toward performance-based rules. Lumber grades from the Western Wood Products Association (Portland, OR) have been recently recognised in Japan, and lumber and plywood products from most other US grading associations will likely be recognized in the near future. In the past this has been a major stumbling block for US producers since building products require JAS approval in order for homeowners to obtain government housing loans.
