Más bosques para el desarrollo de Guatemala

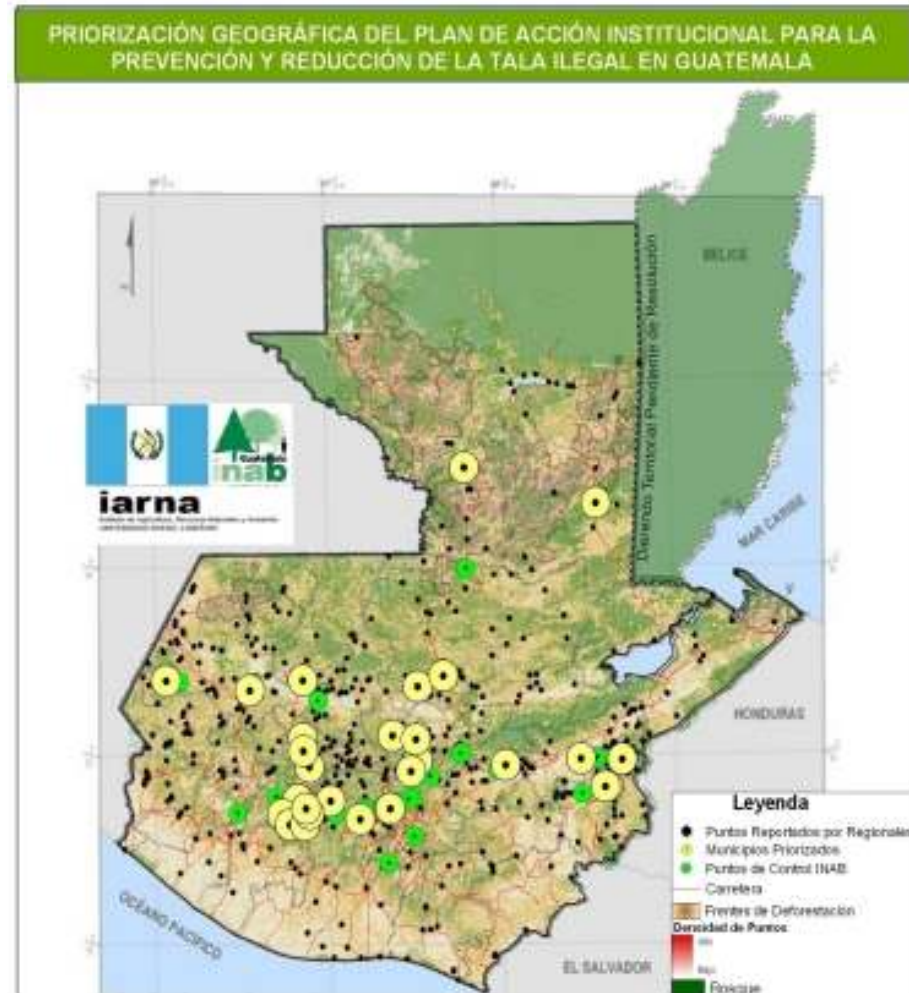

1. Background

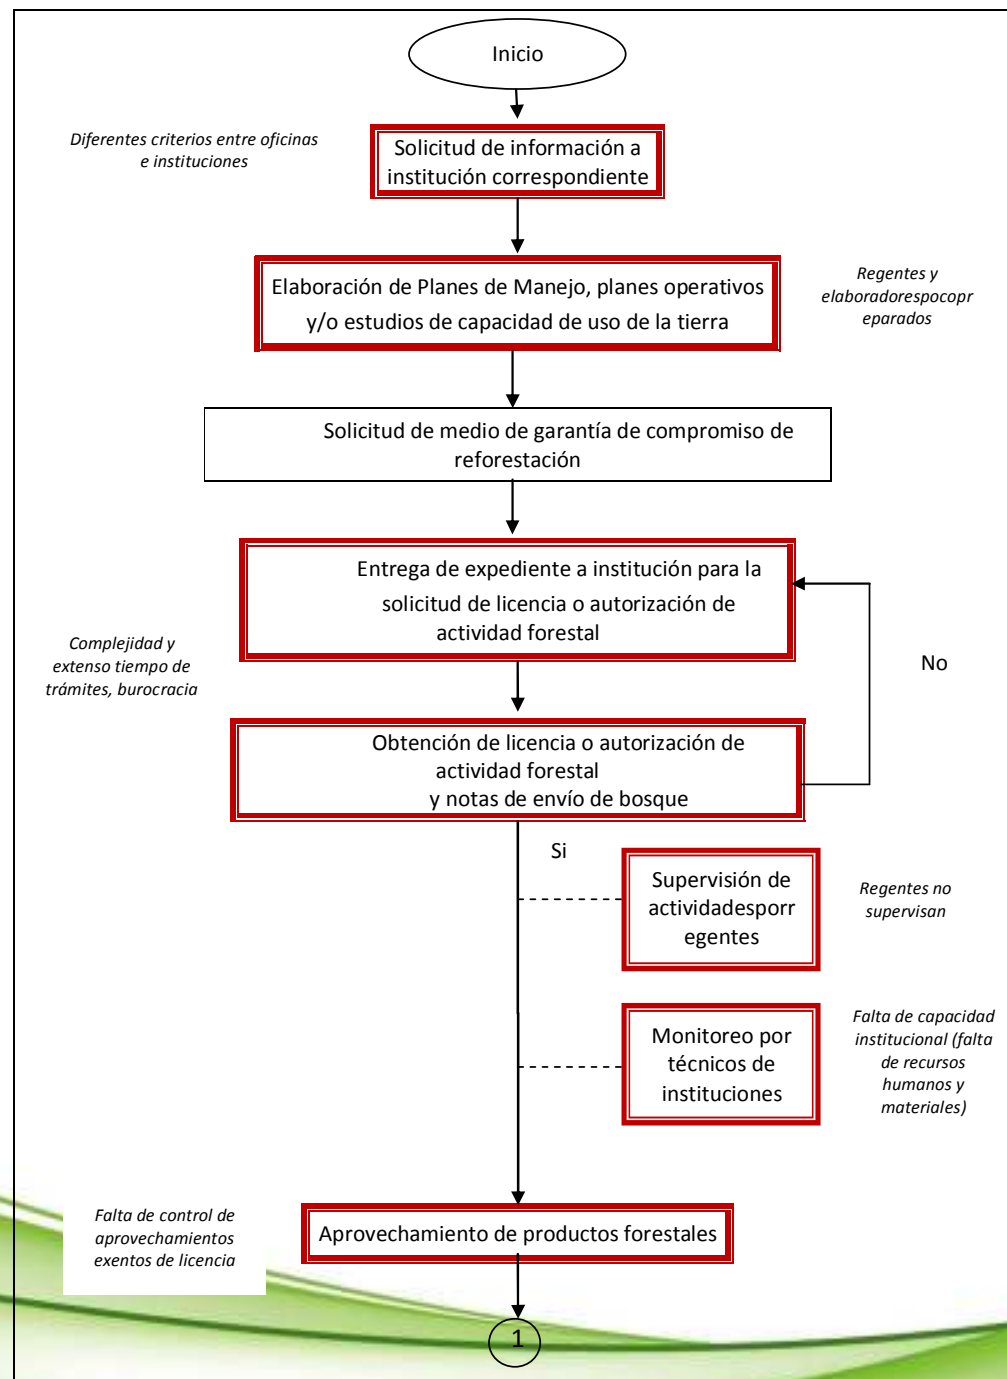

In 2006 the illegal logging in Guatemala was 90%.

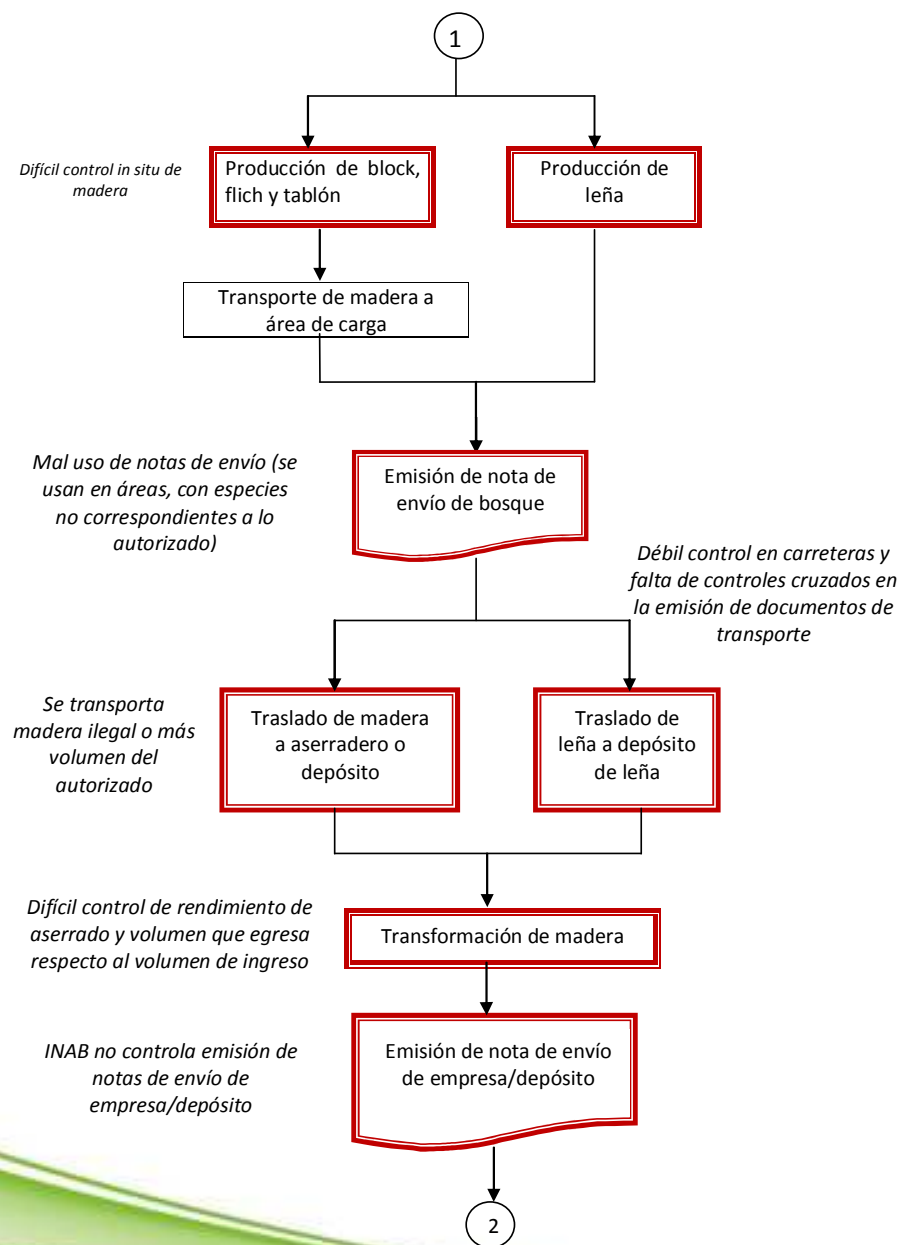

Most of this illegal logging going to the domestic market

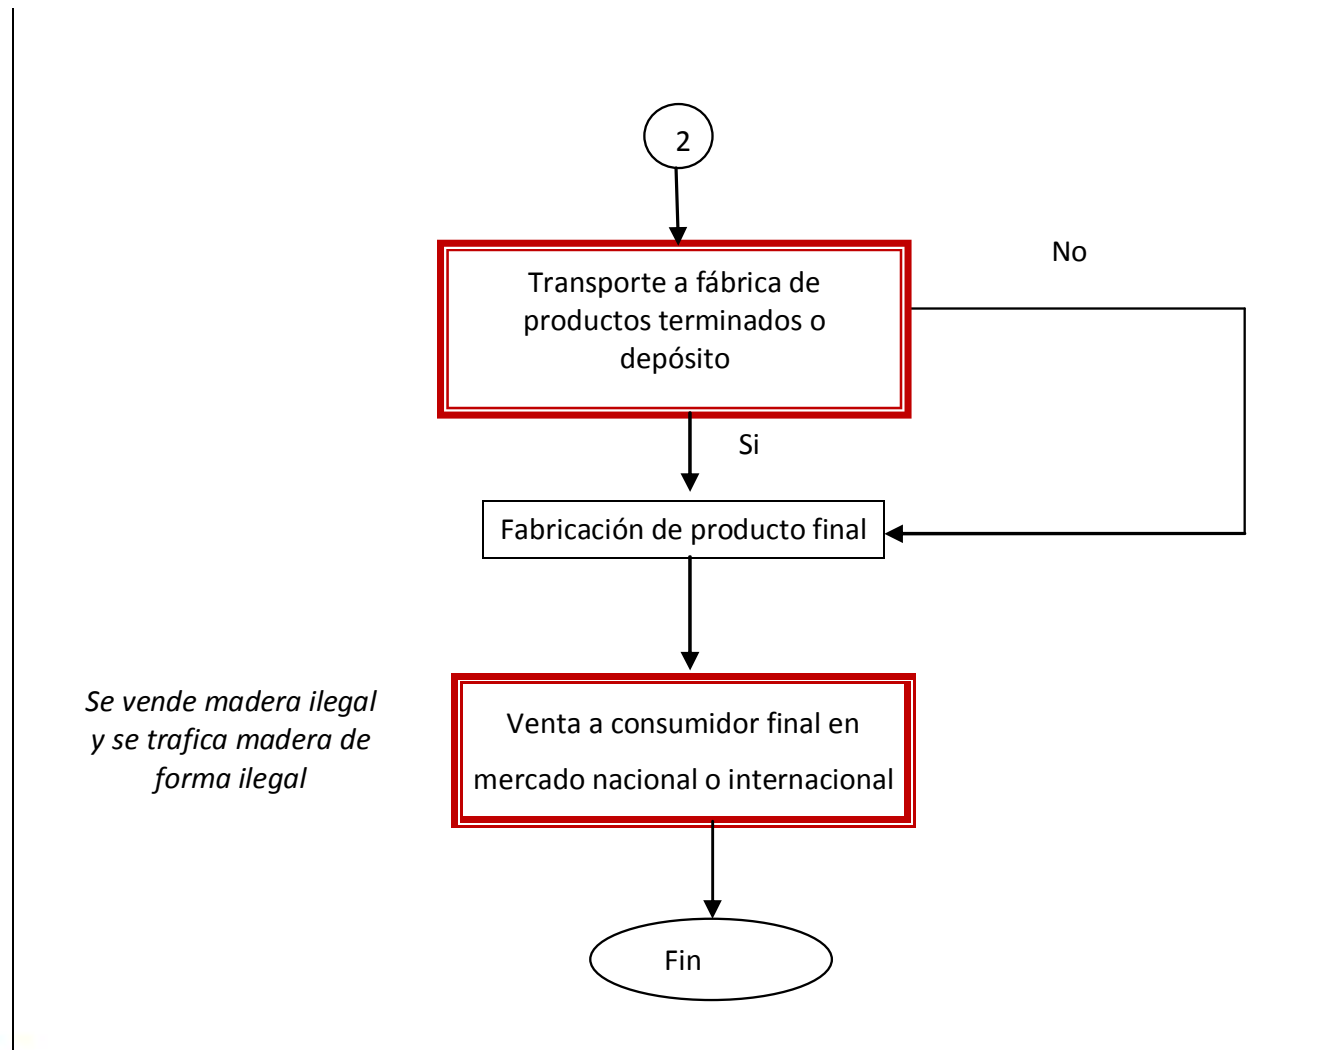

All of the illegal wood is from natural forest

Guatemala has a rate of deforestation around 1% annual

2. Inter Institutional Plan for Prevent and Reduce de Illegal Logging in Guatemala strengthening

Action Lines

1. Revision and actualization of the regualtion

2. Promoting the coordination of the stakeholders

3. Trainning and capacity building

4. Promoting of legal activities

5. Strengthening of the Information Sistem

6. Control and prevention of the ilegal activities

7. Comunication and education programms

3. Promoting legal activities
